

氢领卓越

荷兰技术 助力实现全球零碳目标

NL

荷兰

第二次 气体革命

五十年前，荷兰探得大量天然气储备。于是，便诞生了全球布局最广、设计最先进的输气管网之一。随着零碳氢气的引入，第二次气体革命已然到来。

氢气除了可以作为原料或燃料，还可作为能源载体，将更多的可再生能源纳入我们的能源体系之中，解决当前系统性难题。尽管挑战重重，但加强氢能发展是实现能源转型成功的关键所在。

目录

氢能	6
全球能源转型的关键一环	
氢能制备	10
实现清洁氢能的竞争力	
运输、储存、配送	14
打造综合氢能基础设施	
氢能应用	18
创造氢能需求	
荷兰氢能旗舰项目	22
携手荷兰的五大优势	24
荷兰氢能技术	26
企业介绍	28

打造氢能合作伙伴关系

气候变化是全球共同面临的严峻挑战。没有一个国家能够凭一己之力与之抗衡。全球社区须齐心协力，有效遏制气候变化所带来的影响。为此，我们不仅需要形成为之共同努力的国际减排目标，也需要集结知识和资源，促进清洁技术的发展和​​应用。

这对实现大规模清洁氢能的应用而言尤为重要。作为用途最广、最灵活的零碳燃料之一，氢能往往被视作全球能源转型的关键一环。从通过可持续的方式扩大制氢产能，到打造全球需求，再到开发必要基建和建立全球输氢物流，氢能潜力巨大，但需要我们共同努力去挖掘。氢能将成为国际商品，在国际市场上连结起不同的国家，让每个国家都能够充分利用其天然资源。

荷兰致力于参与全球氢能经济发展，并扮演高效且富有建设性的角色。正如本指南所展示的，作为西北欧门户、全球油气贸易的关键枢纽，荷兰拥有得天独厚的战略性地势优势及必要基础设施。凭借这些优势，荷兰已经走在了推动欧洲氢能革命的最前沿。北海为开发大规模风能及太阳能光伏发电项目、实现具有竞争力的价格提供了独有的机遇。荷兰也拥有完整的科研及产业生态体系。当地的科研机构及企业能够有效地将理念和想法通过实际可行的综合解决方案落到实处。正因得益于此，荷兰已有覆盖氢能价值链各个环节的技术，包括电解制氢、输氢、储氢，以及工业、陆运和海运、住宅供暖等不同领域的应用技术。

但相比技术本身，开放、务实、外向的荷兰式思维在此中发挥着更重要的作用。荷兰向来以在海内外建立富有成效的合作伙伴关系著称。荷兰在氢能领域的宏大目标及规划紧扣欧盟政策及创新项目，并在北部建成了欧洲第一大“氢谷”，吸引了大量海外投资者和技术企业。在他们眼中，荷兰是谋求开放创新、商业发展的一片热土。此外，荷兰国内的技术产业长期以来致力于根据其他国家及文化的特有需求，实现知识和创新的本地化转化落地。

推动氢能从极富潜力的关键技术发展成为清洁能源系统的基石无法一蹴而就，需要日经月累的努力。但相关技术已经就位，帮助我们稳扎稳打、逐步推进。荷兰氢能产业衷心希望聆听您的想法、愿景和目标，并愿为此尽一份绵薄之力。

氢能 全球能源转型的 关键一环

为了及时阻止气候变化造成更多灾难性的后果，一场全球减排竞赛正在如火如荼进行中。国际合作和技术创新是各国社会大规模减排行动取得成功的关键所在。面对一些长期存在的挑战，清洁氢能的生产、输配、储存、应用和贸易技术则显得尤为重要。

扩大清洁氢能的生产规模需要消耗大量的可再生能源。风力发电在其中发挥着尤为重要的推动作用。荷兰的目标是到2030年实现21吉瓦的海上风电装机容量，并增加至少35太瓦时的陆地可再生能源产能。鉴于人们对清洁氢能的广泛应用寄予厚望，要实现目标可能需要更高的电力产能。

扩大清洁氢能的生产规模需要消耗大量的可再生能源。风力发电在其中发挥着尤为重要的推动作用。荷兰的目标是到2030年实现21吉瓦的海上风电装机容量，并增加至少35太瓦时的陆地可再生能源产能。鉴于人们对清洁氢能的广泛应用寄予厚望，要实现目标可能需要更高的电力产能。

作为《巴黎气候协定》的签署国，荷兰政府已将未来实现脱碳的承诺写入立法，并在国家级的“气候协定”中商定了宏大的目标（见专栏）。另外，荷兰也在积极主动地推动实现可持续发展目标（SDG）。因此，我们在致力于减少碳排放的同时，努力控制这一转变可能对世界各地人民和社区福祉造成的负面影响。作为世界上人口最稠密、工业化程度最高的国家之一，荷兰要实现这些目标将面临巨大的挑战。仅在未来十年内，我们准备投向加速能源转型的资金就将高达数十亿欧元。荷兰计划对包括海上风能在内的可再生能源进行大规模投资。同时我们还推出了其他主要政策，旨在实现大规模的汽车电气化、热泵型住宅供暖及工业流程电气化，以充分发挥这些碳中和手段的作用。

然而，即使制定了这些雄心勃勃的政策，我们依然面临诸多长期挑战。例如，荷兰的大型工业部门需要大量的高温工艺热能，以及化石基原料的

可行替代品。随着我们对风能、太阳能等间歇性能源的依赖越来越高，我们迫切需要开发大容量储能方案，以免造成电网拥堵并确保短期和跨季节的供应安全。实现海洋航运和公路运输部门的脱碳和寻找建筑供暖天然气的替代品，是我们面临的另一个挑战。

氢能：关键一环

人们普遍认为氢能是克服全面脱碳所面临的这些基本障碍的关键所在。它可以在工业流程中替代天然气，用作生产化学品的原料，并为几乎所有的运输方式提供碳中性燃料，特别是那些还未能实现电气化的运输方式。通过电解，氢能可用于储存和输配大量可再生能源电力，为进一步大规模投资风能和太阳能发电铺平道路，并为电网平衡、季节性储能、提供大规模能源基础设施替代方案，甚至是可再生能源的全球出口，开创新的机遇。

荷兰方案

荷兰在打造以氢能为基础的未来方面具备以下独特之处。首先，我们的行动是由前述气候政策和承诺明确驱动的。其次，我们的行动贯穿整个价值链始终。荷兰并未将氢能的生产和应用视为一个单独的问题，而是采取了一种综合的系统方法来发展“氢能经济”。

有关荷兰氢能生态的事实与数据

9百万立方米

荷兰的巨大减排潜力蕴藏在它从欧洲第二大氢能产国（每年生产超过9百万立方米化石基氢能）跃升为全球清洁氢能中心的过程中。

3-4吉瓦/2030年

为了实现碳中性氢能的大规模生产，荷兰立志到2030年增加3-4吉瓦电解槽装机容量（占当年欧盟总目标的10%左右）。荷兰北部地区的目标是，到2030年每年生产65拍焦的清洁氢能。

21吉瓦/2030年

海上风能是扩大碳中性氢能生产的关键推动因素。到2030年，位于北海荷兰区目前处于计划阶段的项目将带来总计达21吉瓦的海上风电容量，同时该区域还具备充足的空间将产能进一步扩大到40-75吉瓦。

13.6万千米

荷兰、比利时和法国目前总计拥有超过1000公里的专用氢能管道。荷兰密集的天然气管网（13.6万公里高质量管道）经改造后，能以可接受的成本运输氢能。此举将加速“国家氢能骨干管网”的建设，使其有望在2027年准备就绪。

在由11家欧洲电网运营商提出的欧洲氢能基础设施网络中，荷兰占据了战略中心地位。据估计，到2030年，仅西北欧的潜在区域需求就将达到400拍焦。

全国有数十个试点项目正在进行中。通过这些项目，公司、地区和地方政府、氢能协会和平台及研究和技术组织（RTO）正在构建一个完整的氢能生态系统。它们不仅关注技术本身，还努力创造需求、提出商业模式以及解决监管、认证和标准化及安全方面的问题。这些通常是在公私合作中以非常务实的方式完成的：荷兰对创新抱以开放的态度，鼓励进行各种探索。

第三，荷兰的氢能观具有明显的全球性质。生活在一个具备良好战略位置的小国，我们一直强烈地意识到应该将目光投向国境之外。这使得荷兰的公司、港口、研究机构和政府均与国外市场建立了良好的联系，在世界各地都拥有强大的合作网络。因此，除了发展本国的氢能生态系统和价值链外，荷兰还努力在全球范围内加速推动大规模采用氢能作为碳中性能源载体。处于全球石油和天然气物流链的战略位置，荷兰的目标是成为欧洲低碳特别是碳中性氢能的生产和运输中心。

坚实的基础

荷兰的这些雄心壮志是有坚实基础支撑的。目前，荷兰已经是欧洲的第二大化石氢能生产国，同时它也下定决心实现氢能脱碳。鉴于大规模生产碳中性（绿色）氢能还需要较长时间，“蓝色”氢能是实现该目标的一个重要中间环节。蓝色氢能是从天然气中提取的，但生产过程中释放的二氧化碳可被捕获和储存，从而大大减少了空气中的碳排放。然而，绿色氢能所需的技术正在快速发展（见下一章），许多相关因素已经准备到位。

荷兰的制造业高度发达，从电解槽关键部件生产商到特种车辆和公交车的制造商，价值链的每一环它都拥有数百家企业。最近推出的电解槽制造平台：EMP-NL则进一步巩固了荷兰这一地位，将超过

促进国际合作

与荷兰氢能企业建立合作关系，可帮助贵公司更好地筹集资金。荷兰企业管理局（RVO）、荷兰外交部、荷兰技术行业商会组织（FME）及其他支持组织负责促进和推动国际B2B合作和跨境财团的发展。如需更多信息，可获取联系方式（第107页）。此外，关于荷兰和欧洲不同氢能补贴的概述，可访问荷兰国家氢能计划的网站（荷兰语）。

www.nationaalwaterstofprogramma.nl

45家本土技术公司和知识合作伙伴聚集在一起，以加速推进氢能经济的创新。同时，荷兰还拥有世界上最先进的天然气基础设施，通过建设全国性的天然气网覆盖到几乎所有家庭和企业。在此过程中，荷兰天然气行业在处理、监测和储存天然气方面积累了广泛的专业知识。此外，我们还是欧洲气态和液化天然气跨境贸易的主要枢纽。在我们寻求扩大和调整现有基础设施的过程中，这些都为我们提供了坚实的基础，以便将已有的设施改造为灵活的电网来实现氢能的规模化推广。

欧洲视角

发展氢能经济是一项重大的事业，需要国家间的团结协作。为此，荷兰努力正在研发、欧洲政策、示范项目和新技术实施等方面开展密切的国际合作，从而让整个世界都能从中受益。所以，荷兰推出的举措与欧洲伙伴和欧盟创新计划高度一致。以下为这方面的一些实例。

清洁氢能伙伴关系。继燃料电池与氢能联合行动计划（FCH Ju）之后，该伙伴关系希望通过在欧盟，特别是在难减排的部门，加快清洁氢能生产、输配和储存，以实施欧盟绿色协议和欧盟氢能战略。

大型项目可获批欧洲共同利益重要项目（IPCEI）。IPCEI 侧重开展有益于欧洲的大型研究、示范和实施项目，与常规国家援助法规的要求相比，这些项目有机会获得更多的公共资金。2021年，荷兰有25个项目获得 IPCEI 提名，尚需欧盟委员会的批准。

荷兰北部是第一个获得欧洲资助的“氢谷”地区。它的潜力得到了广泛认可，获得了来自6个不同国家的数十家公司的支持。在2020年，地区当局、公司和知识合作伙伴联合发布了一项雄心勃勃的投资计划，希望在未来10年投资90亿欧元。该计划涵盖了整个氢能价值链超过50个项目，包括大规模生产、输配和存储设施的开发和一系列应用。

氢能制备 实现清洁氢能的 竞争力

氢能的清洁程度取决于制备方式。为了让氢能在全球能源转型过程中扮演重要角色，我们必须大幅提升清洁氢能的生产规模。水电解是生产清洁氢能的主要工艺。为此，我们需要开展各类创新，提升电解制氢的可靠性以及成本效益。

荷兰国家应用科学研究院（TNO）位于佩腾（Petten）的法拉第实验室是一个创新实验室，专注于优化现有的电解技术，如质子交换膜电解水制氢（PEM）、碱性电解水制氢（ALK）、固体氧化物电解水制氢（SOEC）和阴离子膜电解水制氢（AEM）。在实验室的支持下，电解槽制造商及其供应商能够在不同条件下进行新材料、组件和应用的开发和测试。

无论是荷兰还是其他国家都认为应该增加清洁氢能的供应。尽管清洁氢能行业一直在努力寻求突破，但氢能的成本仍然是化石氢能的几倍。而且，截止目前，那些为扩大电解装置安装规模和降低相关成本所做的努力也因有限的需求而受阻。

新一代电解槽

荷兰推出了诸多专注于提高清洁氢能可负担性的举措，来应对这一重大挑战。其中大部分工作都围绕着荷兰国家应用科学研究院（TNO）位于佩腾（Petten）的法拉第实验室展开，该实验室是欧洲最大的氢能研究设施之一。在这个开放的创新实验室里，研究人员和众多行业合作伙伴正在努力优化现有的电解技术，如质子交换膜电解水制氢（PEM）、碱性电解水制氢（ALK）、固体氧化物电解水制氢（SOEC）和阴离子膜电解水制氢（AEM）。实验室的创新成果专注于提升效率，提高产能，并为目前电解槽中使用的稀有材料寻找便宜耐用的替代品。荷兰研究机构和工业合作伙伴之间实现交叉融合范例之一是致力于推动工业电气化的 VoltaChem。另一范例是可持续过程技术研究所（ISPT）推出的 Hydrohub 创新计划，该创新计划配备针对电解槽的兆瓦级测试中心。

荷兰已着手建设第一个 千兆瓦级电解槽 将于2030年投入使用

除了先进的设施和研究团队外，荷兰的氢能生态还涵盖了各类技术供应商。一项调查显示，尽管电解尚未成为制氢的主流技术，但荷兰已有近百家公司活跃在这一领域或正计划进入相关市场。这些公司包括膜电极等电解槽组件的制造商，以及堆栈集成商、支持技术供应商和系统集成商，它们拥有建造完整电解槽装置所需的专业知识和公司规模。其中多家公司还在其他工业市场积累广泛而宝贵的经验，有助于打造更稳健、高效的电解槽生产流程。例如，它们能实现标准化和自动化的生产流程，或开发高效的水净化技术。2021年，荷兰技术行业商会组织（FME）和荷兰国家应用科学研究院（TNO）携手建立了电解槽制造平台：EMP-NL，旨在连接和构建本国的电解槽供应链。目前，已经有45家公司和研究机构携手合作来加快扩大电解槽的装机容量。

扩大产能

在优化电解槽技术的同时，荷兰氢能公司也在着力解决扩大应用规模所面临的问题。目前的电解装置容量一般为几兆瓦，但为了促进可再生能源的巨大增长，并与规模更大的“灰色”氢能工厂展开竞争，现有的装机容量须扩大100至1000倍。因此，后续建设的制氢厂应该包含数百或数千台电解槽。在Hydrohub计划中，各类研究机构和产业合作伙伴已接受这项挑战，目前正在制定计划，打算于2030年前在荷兰安装一台“千兆瓦电解槽”。作为可持续过程技术研究所（ISPT）Hydrohub计划的组成部分，上述计划还将在位于格罗宁根的汉斯应用科技大学（Hanze University of Applied Sciences）建立一个技术先进的开放式测试中心。

发展海上氢能

最后，与其说越来越多的研究人员和公司专注于电解实施过程，不如说他们关注的是实施的地点。上述观点的提出基于一个客观事实，那便是人们普遍认为氢能是一种理想的电力储存和运输媒介。这也鼓励各国将电解槽安装在离风能或太阳能装置更近的地方，以尽量降低修建传输基础设施的成本和不可避免的能量损失。

该领域最近取得的创新成果包括一台集成了4兆瓦电解槽的风力涡轮机，以及世界上首个位于北海的海上电解平台，名为PosHYdon。此外，位于荷兰海岸的一个现有石油和天然气平台正在被改造成世界上首个海上制氢平台。由海上风力涡轮机产生的电力将用于淡化海水，同时为一台生产清洁氢能的1兆瓦电解槽提供动力。

荷兰改造旧有平台的项目为氢能的长期发展提供了一个有意义的视角。它实现了将废弃的石油和天然气平台改造为海上电解装置的操作。虽然目前海水在用于电解之前须经过淡化处理，但荷兰研究人员正在寻找直接利用海水进行电解的方法，一旦成功，淡水资源匮乏的地区也将获得电解制氢的机会，甚至可能在更远的海上进行大规模电解。同时，荷兰还在探索在北海建设人工岛的可能性，以便未来几年建设的海上风电场可以在此修建氢能生产中心。

在北部沿海小镇Delfzijl，天然气电网运营商 Gasunie和HyCC/Nobian正在计划建造目前世界上最大的电解装置之一（20兆瓦）。建成后，每年将生产3000公吨清洁氢能。同时，两家公司还在研究将电解安装容量扩大到60兆瓦的方案，以便生产可持续航空燃料。(图片：格罗宁根海港 /Koons Boertjens)

在Hydrohub的千兆瓦电解厂项目中，一个由多家公司、大学和知识机构组成的联盟正在为在2030年前设计出具备工业规模的电解厂做着各项准备。该电解厂是可持续过程技术研究所（ISPT）Hydrohub计划的组成部分，此计划还将在位于格罗宁根的汉斯应用科技大学（Hanze University of Applied Sciences）建立一个技术先进的开放式测试中心。

HYGRO专注于生产、运输和配送直接利用风能制成的氢气。该公司目前正在北荷兰省建造一台集成了电解槽的4兆瓦的风机，旨在最大限度地发挥风力发电、氢能生产、管网及储存技术之间的协同增效作用。这个概念优化了风能到氢能的转化过程，氢能的运输成本比电力大幅降低，并大幅减小了空间规划的影响。

位于荷兰海岸的一座石油和天然气平台正被改造为世界上首个海上氢能平台。由海上风机产生的电力将用于淡化海水，同时为一台生产清洁氢能的1兆瓦电解槽提供动力。

E-thor试点项目提出了一项前景广阔的商业模式，而该模式的核心正是一台5兆瓦的电解槽。电解槽由AVR垃圾处理厂产生的电力驱动，制氢过程中产生的氧气由化学公司Tronox用于生产颜料。氢能可作为燃料或原料，也可以与一氧化碳或二氧化碳结合，生产甲醇或其他化学产品。

运输、储存、配送 发展综合 氢能基础设施

实现大规模清洁氢能生产是迈向碳中和未来的关键一步。而通过安全、经济的方式输送大量氢能也同等重要。荷兰的创新技术为推动海内外氢能经济发展助一臂之力。

输氢最直接的方式是管道输送。目前，很少有国家像荷兰一样拥有覆盖全国的输氢管网。这得益于荷兰完善的基建基础。荷兰现已布有超过1000公里的专用输氢管网，连接比利时与法国境内的工业区。

现有的高密度输气管网经过适当改造后也可用于氢气输送，包括掺氢和纯氢输送。在荷兰泽兰省已部署一条12公里的工业用气管道用于输氢，年输送量可达40万吨；同时，在利用现有基建的基础上，泽兰省还开展了数十个居民住宅氢气替代天然气供能试点项目。在未来几年内，我们将加速推进这一趋势。到2030年实现200万户采用天然气替代能源供暖是荷兰应对气候变化的关键政策之一。这将进一步推动建成环境脱碳，并为当地居民提供长期供能解决方案。与此同时，随着天然气需求的减少，将有更多管网可用于输氢，特别是现有管网中大量的“并行”管道。预计到2027年，荷兰将建成覆盖全国的“输氢骨干网络”，连接国内五大工业集群。荷兰国家研究联合体HyDelta正就现有天然气管网改造用于输氢开展大量相关研究。

除了输氢之外，现有天然气基建还为储氢提供了可能，从而根据再生电力供给情况实现季节性存储，或是用于平衡电网负荷。例如，在荷兰北部，天然气储存在大型盐穴中，储量达数十亿立方米。目前，已经有试点项目证实氢气也可通过盐穴实现安全储存。此外，科研人员及行业专家也正在研究陆地及北海海上枯竭天然气田储氢的技术和经济可行性。荷兰储氢和输氢的潜在规模十分可观，可轻松消纳未来10年荷兰北海海域已规划的近21吉瓦海上风电。

要发展氢能经济，我们就需要除了管网之外的其他更灵活的运输模式。荷兰在此领域也正在开展一系列创新工作。例如，荷兰国家应用科学研究院（TNO）的研究员们正与行业合作伙伴共同研发氢气专用储气罐，包括超高压或超低温存储所需材料研究，为实现安全、经济的陆路、铁路、海上运输打下坚实基础。荷兰也有其他企业正在研究氢气与其他材料混合（如氮、二氧化碳或甲苯），转化为载体液体，便于运输，甚至使用现有油罐进行运输。

清洁氢能的市场发展需要可靠的交易平台，并建立高效定价机制。荷兰正通过HyExchange项目进行这方面的探索。在2021年，该项目针对国际氢能交易所需要素进行了研究。HyExchange将继续通过试点项目检验研究成果，模拟可进一步推进全球氢能市场发展的模式。

荷兰13.6万公里的输气管路为发展氢能骨干管网创造了得天独厚的机遇

在荷兰，我们正多管齐下，推进建设境内氢能综合基建，并寻求国际合作机遇，进一步拓展和开发全球综合氢能基建。积极建立合作伙伴关系，携手迈向氢能发展目标对各国共同实现共有气候目标而言至关重要。

氢能枢纽

上述创新成果在为氢能经济价值链下游的输氢端打开新局面的同时，还可应用于大规模（超）长距离氢能运输。面对巨大的全球氢能市场，我们亟需此类解决方案。研究发现，在太阳能和/或风能充沛的地区，可再生电力成本在未来十年可降至每度1欧元。这将大幅提升大规模电解制氢的商业可行性，为其他市场提供碳中和氢能。在未来几十年内，欧洲将成为清洁氢能的净进口市场，而荷兰已经为此转变做好了充分准备。

得益于出色的陆路、铁路和内陆水运基建，以及与欧洲其他国家互连互通的管网设施，荷兰汇聚了欧洲最繁忙的几条运输走廊。作为欧洲最大的石油和（液化）天然气港口，鹿特丹港正在与行业合作伙伴一同推进氢能枢纽的建设工作。目前，已有若干跨国企业计划在鹿特丹投建电解设施。同时，鹿特丹港也已经开始铺设一条氢能专用管道。此外，荷兰也有企业正在开发大型储氢罐技术。除了用于荷兰境内的储氢设施之外，这些企业也在积极寻找未来氢能出口市场的储氢需求。

截止2022年4月，荷兰政府已经与智利、葡萄牙、加拿大、乌拉圭等国签订了双边合作谅解备忘录。未来预计将与更多国家达成合作意向。此类双边伙伴关系将为未来国际合作奠定坚实基础，得到了公共机构及私有企业的高度重视。这也表明了荷兰对打造西北欧氢能走廊的重视，并积极为大规模进口清洁氢能开展准备工作。

Stad aan't Haringvliet村的居民们正致力于逐步淘汰天然气。管网运营商Stedin也已经确认现有天然气基建可为村内600户住宅提供输氢服务。位于荷兰北部的Hoogeveen镇也启动了类似的规划，计划在未来5年内为当地超过500户新建和现有住宅输送氢能。

荷兰管网运营商Gasunie正计划开发其位于Zuidwending第一个大规模储氢设施HyStock。其子公司Energystock目前正在运营一处储气设施，包括6座地下盐穴。在未来，Gasunie将新开发4座专用于储氢的盐穴，总储气量可达2万吨。

荷兰正在打造覆盖全国的输氢骨干管网，总长度为1400公里，预计于2030年建成。骨干管网将与区域骨干网络、大型工业用户集群、港口设施实现互联互通，并连接到荷兰境外的储氢设施和管网。约85%的管网将在现有天然气管道的基础上改建而成。

在泽兰省，现有一条12公里的天然气管道经过改造后用于氢气输送，将陶氏化学位于Terneuzen工厂所生产的氢气输送到附近位于Sluiskil的雅再工厂。这一项目帮助两家化工企业每年减少1万吨二氧化碳排放。

氢能应用 创造需求

打造氢能经济需要投资供应链和基建，但同时也需要创造大规模稳定的需求。科研人员和企业正在探索各类潜在氢能应用场景，寻找减排脱碳效果最为显著的应用领域。

Holthausen是一家发展迅速的家族企业，致力于生产氢能卡车和氢能特种车辆。Holthausen与Hyzon Motors共同成立了合资企业，每年生产约2000台氢能卡车，销往欧洲市场。

工业应用

氢能减排最具潜力的应用领域之一便是高温工艺流程。这些流程所采用的大型设备通常需要消耗大量化石燃料，主要为天然气。而我们的目标是改造工业燃烧设备系统，适应氢气截然不同的燃烧特性。此外，若将氢气与一氧化碳或二氧化碳共同燃烧，还能够大幅替代石油和天然气，作为合成燃料、绿色大宗化工产品（如甲醇、烯烃和芳烃）的基础原料。

交通运输

交通运输方面，在航运、长距离陆运等电气化难度较大的领域，许多荷兰企业也在积极探索创新。例如，荷兰的内陆水运行业计划在未来10年引入150艘氢能驳船；同时，通过南荷兰省发起的泛欧洲项目，我们还将在鹿特丹与意大利热那亚之间的航运走廊沿岸建设加氢站。第一艘氢能驳船已经开始建造，预计2023年下水试运。这将成为零碳海运的重要里程碑。荷兰在陆路运输领域的解决方案包括氢能巴士和卡车、电动汽车增程器，以及加氢站相关技术。

住宅供暖

几十年来，天然气供暖几乎是荷兰家家户户的标配。但这将发生改变。在未来十年，荷兰新建房屋将不再连接天然气管道，数百万现有房屋也将改建采用替代可持续能源。较新的房屋可以安装使用太阳能的电力热泵或是地热能；但对较旧的房屋而言，氢能则是更可行的供暖能源。现有的天然气基建可改建后用于输氢（详见第16页）。荷兰也有十分成熟的冷凝式燃气锅炉制造生态体系，相关企业也正在大力投资氢气替代天然气转型技术。部分企业已经开始销售可使用天然气掺30%氢气的锅炉；100%使用氢气作为燃料的锅炉也已亮相。此外，也有企业正在研发天然气锅炉改造为氢气锅炉的技术。

灵活电力基建

如今，我们的电力愈发依赖可再生能源。但可再生能源存在间歇性特征。为此，保障持续供电缓冲十分重要。目前，天然气和煤炭火力发电厂是风能或太阳能供电骤降时的必要后备。在荷兰，我们正在探索将化石燃料发电厂改建为利用（零碳）氢能作为燃料进行发电的技术，以及大规模储氢技术（详见第16页）。其他创新技术领域还包括灵活电解装置，可用于平衡电网负荷、频率控制，或是结合燃料电池作为应急发电系统。

在靠近连接荷兰与德国、挪威的跨境能源网络的重要枢纽附近，Nuon/Vattenfall正着手准备将现有发电厂改建为氢能发电设施。第一批三台440兆瓦氢燃料电池将在2023年启用，使用（低碳）氢能发电。在2030年之前，其余单元将逐步进行改建，转用清洁氢能。项目落成后，有望成为全球首个使用零碳氢能作为燃料的发电厂。

Nefit Bosch的研发人员着手开发混合式冷凝锅炉，可使用天然气或是100%氢气作为燃料。混合式锅炉将有利于实现大规模氢能转型的经济性。目前，这一技术正在英国进行试点，约有1000户居民住宅将安装氢气锅炉。

由DNV及荷兰玻璃制造企业Celsian牵头成立的公私合作联合体（共30余家企业机构参与）规划了一项为期两年的项目，重点开发新型高温生产工艺所用的燃烧设备，在考虑成本效益的同时，加速推动天然气向氢能的转型。

创新加氢站技术对实现交通运输领域大规模氢能应用至关重要。在荷兰，HyET、Resato等企业已经针对加氢环节的挑战，推出了经验证的技术解决方案，例如低成本、高可靠的高压压缩机。

荷兰氢电（Nedstack）是欧洲最大的PEM燃料电堆生产企业。荷兰氢电的客户遍布全球，其产品也用于建设全球首个兆瓦级氢能发电厂。荷兰氢电目前正积极投入各类项目，参与氢能船舶的研发。例如，荷兰氢电正在与航运行业共同开发海上运输氢电传动系统。目前，荷兰氢电正参与135米长的内河驳船建造工作。建成后，该驳船将用于Delfzijl和鹿特丹之间的盐运输。该项目合作方还包括NPRC、Lenten航运以及引擎供应商Koedood海运集团。

荷兰氢能旗舰项目

氢能旗舰项目展示了荷兰为促进制氢技术发展所作的多种努力。通过与海外产业、政府及企业合作伙伴携手，我们希望采用创新技术解决全球氢能发展的难题，与全球同仁一道，共同遏制气候变化所带来的影响。

Duwaal

项目期限：2024年竣工

合作方: Dirk Barten, ENERCON, E-trucks, Gemeente Alkmaar, GP Groot, HVC, Stadwerk072, Spaarnelanden, New Energy Coalition, NXT, Ontwikkelingsbedrijf Noord-Holland Noord, Participatiefonds Duurzame Economie Noord-Holland, TNO Innovation for life, Toyota Material Handling, Toyota Nederland

Duwaal项目旨在协调促进荷兰西北地区氢能供需。项目由包括HYGRO在内的若干企业联合发起。协作能够保障有效确立项目优先级，为氢能经济快速突破提供助力。

第一批子项目包括：

- 耦合单台风机制氢
- 建设风电制氢陆上高压储氢、运输及配送综合体系，并至少接通5座加氢站
- 联合采购并管理100台氢能重型汽车或发电机组

通过同步建设氢能供需价值链，Duwaal项目从最开始便可实现较为合理的制氢规模，充分发挥氢能的优势，解决“鸡蛋和鸡”的难题，并简化了融资流程。这为兼容未来制氢或供氢项目、纳入所建运输配送系统提供了空间，并可通过规模化生产进一步降低成本、提高效益。

www.hy-gro.net/en/duwaal

PosHYdon

项目期限：2024年竣工

合作方: Nel Hydrogen, InVesta, Hatlenboer, Iv-Offshore & Energy, Emerson Automation Solutions, Nexstep, TNO, Neptune Energy, Gasunie, Noordgastransport, NOGAT, DEME Offshore, TAQA, Eneco

PosHYdon试点项目是北海综合氢能开发利用的典范，也是全球第一个通过海上平台制备绿氢的项目。项目合作方深信，绿氢是能源转型的关键所在。通过该试点，我们将进一步探索海上大规模制备绿氢的安全路径。海上绿氢制备将为大规模深水海上风电开发提供创造更多可能。海上风能能够直接转化为绿氢，并通过现有输气基建运送上岸。这将进一步推动海上风电开发，并显著降低终端用户用能成本。PosHYdon项目旨在整合位于北海的三大能源体系：海上风能、海上天然气及海上绿氢。项目将利用Neptune Energy的Q13a-A平台，淡化海水进行电解制氢。

“除了密布的天然气管网之外，荷兰还有其独特的优势所在。我们能够大量开发北海风能，风力资源丰富，可供给海外市场。而风电则能够用于制氢，并通过掺氢的方式与天然气一同通过现有输气管道运输上岸，为交通领域或是荷兰居民住宅供能。PosHYdon项目是加速这一发展的关键所在。”

www.poshydon.com/en/home-en/

HYGRO

POSHYDON

HyStock 储氢项目

项目期限：2020 -2022

合作方：Gasunie

荷兰必须实现更可持续的发展：2050年碳中和是我们志在必得的目标。低碳氢能是实现可持续发展重要推手，而工业应用则应首当其冲。由于氢能供需存在波动性，所以我们需要大规模地下储氢技术。这也是为何Gasunie的子公司HyStock在Veendam附近的Zuidwending开发盐穴储氢的原因。

项目第一座盐穴（200吉瓦时）预计于2026年投入使用。据估计，为满足2030年储氢需求，需要建成4座盐穴。项目设施将供所有有需求的企业机构用于短期或长期储氢。在初期，储氢设施将与荷兰北部输氢管网相连接；后期将接通荷兰国家输氢管网。2021年和2022年期间，HyStock通过示范项目，采用A8井眼对盐穴储氢进行了测量和验证，为储氢的安全性、机械完整性、压力、作业方法、微生物学表现提供了极具价值的信息。示范项目的成果将用于开发荷兰首座全规模储氢设施：位于Zuidwending的A5盐穴。现有的A8井眼也将最终开发成盐穴用于储氢。

www.hystock.nl/en

HEAVENN

项目期限：2020 -2025

合作方：Stichting New Energy Coalition, Qbuzz, Gemeente Groningen, Nobian Industrial Chemicals, Nederlandse Aardolie Maatschappij, Nederlandse Gasunie, Gemeente Emmen, Emmtec Services, Cemtec Fonden, Inicio, Fundacion Para El Desarrollo De Las Nuevas Tecnologias Del Hidrogeno, Aragon, Engie Energie Nederland, Gemeente Hoogeveen, Hyenergy Transstore, Energy, Rijksuniversiteit Groningen, Totalenergies Marketing Nederland, Green Planet Real Estate, European Research Institute For Gas And Energy Innovation, Bytesnet Groningen, H2tec, U.V.O. Vervoer, Ewe Gasspeicher, EBN, Groningen Seaports, Lenten Scheepvaart, Nederlandse Particuliere Rijnvaart-Centrale Cooperatie Ua, Hydrogen Ireland Natural Resources Association Company, The European Marine Energy Centre, Shell Nederland Verkoopmaatschappij, Hyenergy Consultancy

北荷兰是首个获资助开发氢谷的地区。欧盟委员会下属燃料电池与氢能联合行动计划（FCH JU，现更名为清洁氢能合作伙伴关系）为氢谷开发拨款200万欧元，公私联合资助总额达700-800万欧元。HEAVENN（全称：北荷兰谷地环境氢能应用）项目于2020年1月启动，致力于在北荷兰地区建立完整的绿氢产业链，为期6年。该项目为大规模全产业链示范项目，覆盖制氢、输氢、储氢、本地用氢，打造“氢谷（H2V）”综合体，为在欧洲及全球其他地区复制氢谷模式提供蓝本。该项目将在北荷兰的Delfzijl、Zuidwending、Emmen、Hoogeveen和Groningen部署和整合现有及已规划项目集群，推动氢燃料终端的不同应用，并保障不同集群间的互连互通。促进输配气基建的建设和部署将是该项目对接绿氢供应与用户终端的关键所在。

www.heavenn.org

瓦登海绿色船运

项目期限：2020 -2024中

合作方：Bredenoord, Nedstack, Electric Ship Facilities, Damen Shipyards, Groningen Sea Ports, Stichting Wad Duurzaam, Eekels TBI, Port of Harlingen, Hogeschool InHolland, Stokkel Engineering, Conoship International, Stichting New Energy Coalition, Bureau Scheepvaart Certificering (BSC), EQUANS, Port of Den Helder, Vereniging FME

为打造无化石燃料瓦登海船队，瓦登海绿色船运项目旨在2030年前实现船队减排60%。经FME协调，港口管理署、造船企业、供应商、研究机构、政府部门希望通过合作实现瓦登海清洁、无化石燃料船运，打造国际级示范项目。项目合作方旨在达成下述目标：

- 加速瓦登海碳中和及无化石燃料船队创新
 - 为低碳和碳中和船运（包括使用绿氢制备碳中和岸电）开发（港口）相关设施
- 在上述目标下，共设立了10个子项目，旨在实现2030年减排60%的整体目标。其中，5个子项目已经启动，其余5个正在开发中。
- H2生态进化项目：旗舰子项目，旨在提高对氢能船运的认识。
 - Den Helder港绿氢项目：由电解制氢设施建设、氢能船只测试设施建设两部分组成。
 - 绿氢制备岸电项目：在瓦登海港口进行移动燃料电池发电机组的设计、测试和部署。
 - 海运甲醇燃料体系：开发并小规模测试用于海运的直接甲烷燃料电池技术。预计将在娱乐用船舶、捕鱼船、帆船上率先使用该技术。

GREEN SHIPPING
Waddenzee

携手荷兰的 五大优势

1. 高质可靠

荷兰汇集了一流的技术专业知识和创新实力，致力于提供高质量、高可靠产品和解决方案。采用荷兰技术即意味着向最严苛的（欧洲及国际）标准看齐。

2. 国际视野

几百年来，荷兰致力于开拓国际商业合作，深知跨境、跨文化合作成功的秘诀。荷兰常年被评为全球非英语国家中英语水平最高的国家。

3. 卓越技术

荷兰拥有悠久的高新技术创新历史，人均专利数全球排名第二，并拥有全球顶尖清洁能源技术研究机构、半导体技术全球领先企业，以及精良的机械制造企业。

4. 联合创新

在荷兰，我们始终致力于打造灵活度高、适应性强的专业企业及研究机构合作网络。荷兰境内有数十个“实景实验室”，通过真实环境，为基础研究成果转化试验提供试点场所。

5. 专家资源

荷兰组建了多个国家层面的清洁能源专家联合体，为潜在合作方搭建沟通联络的桥梁，快速寻找到合适的技术提供方、科研专家，或是多元专家团队。我们有着共同的目标：齐心协力，应对全球挑战。

Dutch hydrogen expertise

Looking for specific expertise or technological solutions?
In this section Dutch technology providers with international track records introduce themselves and their portfolios.
Consult the table on p. 28/29 to identify possible partners in your next step towards hydrogen successes.

Creating international partnerships is essential to stimulate the Dutch hydrogen economy

Nations worldwide are in transition towards a renewable-powered energy system to fight the threat of global warming. The latest IPCC report stresses the urgency of increasing the speed and scale of renewable deployment to reach the goals of the Paris Agreement.

Hydrogen can – and in my opinion will – play a key role in minimising the impact of the transition towards a climate-neutral and circular economy. Hydrogen has a multitude of potential applications across energy-intensive sectors. It can be used as feedstock and replace fossil fuels in high temperature processes in our industry.

Due to its high energy density it is suitable for long distance transportation purposes, and it can partially play a role as a sustainable backup energy source for longer term/seasonal storages.

However, truly incorporating hydrogen into the global energy system remains challenging. Large-scale (sustainable) hydrogen production, a new European and international infrastructure, and a global hydrogen market are still in the early stages of development. This market is expected to be of a similar form and magnitude as the current oil and gas markets, especially given the global nature of climate challenges. And hydrogen is only one of several available alternatives.

To achieve a truly integrated hydrogen system requires a cooperating international community. The Netherlands' enormous experience with natural gas, as the 'gas roundabout' of North-West Europe, makes it the ideal and well willing candidate for a substantial and constructive role within a hydrogen-based economy. Our ports provide a geographically strategic position that we can use to become the center of a European and perhaps a global hydrogen market. Furthermore, Dutch knowledge institutions and regional entrepreneurial ecosystems, such as the green hydrogen valley, are extremely effective in translating ideas into practice within and outside of the Netherlands. As this brochure illustrates, the Netherlands is also home to a wide variety of ambitious companies, ready to kick-start the European and global hydrogen market. I'm proud of this Dutch ambition to lead the development of hydrogen markets.

Both in technological innovation and business development, the pace of activity in the Netherlands is rising sharply. Creating international partnerships is essential to stimulate the open Dutch hydrogen economy. It is our joint responsibility to turn initiatives into concrete projects and operational systems, thereby demonstrating hydrogen's full potential in a sustainable energy system.

We understand that realising hydrogen's full potential will take a long time in which considerable challenges must continuously be overcome. Our aim is to support you in achieving your projects, ambitions and goals.

www.nflux.nl
petrus@nflux.nl

Building new value chains – that is what drives us. We understand the complexity of transitions and know how to bring market, government, innovations, business cases, technology and policy together. In each of our focus fields (energy transition, raw-material transition, climate adaptation, circular), we have developed and initiated programs with a multitude of partners from business, government and society. Examples include the boosting of sustainable heat projects in the Amsterdam Metropolitan Area, CO₂ as a feedstock for future proof industry and developing international hydrogen value chains.

&flux initiated several international hydrogen value propositions, one of them being an industrial

import chain between north Africa and the Netherlands. In Estonia we established the hydrogen strategy for Port of Tallinn. Through our research and cooperation with business and government partners we have started to build on a new economic proposition with Port of Tallinn as the central node in the hydrogen ecosystem. Furthermore, we developed a hydrogen action perspective for the Estonian Aviation Cluster to help them become part of the Estonian hydrogen value chain. Our last initiative is setting up a hydrogen valley within Estonia, enabling companies and government to establish hydrogen projects along the full value chain. In the Netherlands, &flux works on the application of hydrogen in several business sectors such as horticulture and the flower and bulb sector.

54events: Dutch Hydrogen Days

www.vakbeursenergie.nl/nl/dutch-hydrogen-days
beurs@54events.nl

Every autumn, 54events organizes the Dutch Hydrogen Days – during Zero Emission | Ecomobiel, Vakbeurs Energie and Industrial Heat & Power, events also organized by us. With daily dedicated seminars on all main stages!

We organize trade fairs, conferences, seminars and summits in the context of the energy transition in The Netherlands. It is our mission to help people and organizations to enrich their expertise and strengthen their network so they can grow their businesses.

Dutch Hydrogen Days 2022:

- Tuesday 11 October: hydrogen in mobility
Hydrogen is gaining ground in mobility, especially for heavy transport by road, rail and shipping. Advantages are ease of use and flexibility. Condition: the availability of

hydrogen filling stations – work in progress.

- Wednesday 12 October: hydrogen in the built environment
For the built environment, hydrogen is being looked at as a cost-effective alternative in the long run, for (electric) heat pumps and district heating. For its distribution, tests are carried out using the reuse of existing natural gas pipelines.
- Thursday 13 October: hydrogen in industry
The use of sustainable hydrogen is seen as an essential part of a climate-neutral industry in 2050. Especially in the chemical industry, sustainable hydrogen can eventually largely replace the use of natural gas.

The Dutch Hydrogen Days 2022 will take place in the Brabanthallen in 's-Hertogenbosch. Free entry for professionals!

ABB is a leading global technology company that energizes the transformation of society and industry to achieve a more productive, sustainable future. By connecting software to its electrification, robotics, automation and motion portfolio, ABB pushes the boundaries of technology to drive performance to new levels. With a history of excellence stretching back more than 130 years, ABB's success is driven by about 110,000 talented employees in over 100 countries.

ABB's broad portfolio encompasses the full hydrogen value chain from production, transportation, storage to consumption. We are working closely with partners and our customers to create the new hydrogen ecosystem.

ABC-Techniek B.V.

Mr Rob van Dijk
Coenecoop 58
2741 PD Waddinxveen
The Netherlands

+31 (0)182 634 139
www.abc-techniek.com
info@abc-techniek.com

Over a period of three decades ABC-Techniek became a well-known and established system integrator for customers around the world.

Work together to find the best solution and a no-nonsense mentality are important factors that contribute to the growth of our company. Besides this our technical know-how, high internal standards of quality and the passionate drive for our areas of expertise are indispensable. Therefore, we can call ourselves an innovative player in the field of engineering, fabrication and renovating of control systems and electrical and instrumentation (E&I) installations.

ABC-Techniek is an ISO-9001 certified organisation with a proven knowledge along with experience in the design as well as delivery of

control- and distribution panels for a power supply up to 690VAC and 3200A. Furthermore an extensive experience in wiring of electrical and instrumentation installations and finally an expertise in explosion protection. Our professional knowledge offers you an integral approach from the designing process to realization, pre-operational and start-up, maintenance and services.

ABC-Techniek provides products and services for the hydrogen and renewable energy industry, petrochemical and process industry (ATEX/IECEX). Our staff is certified to execute inspections in particular on electrical installation in hazardous locations. The professional competence is warranted by the IECEX O5 Certification of Personnel Competence (CoPC).

AECOM

AECOM provides decarbonisation professional and project delivery services to support clients to transition from carbon powered infrastructure to more sustainable alternatives. We help customers to decarbonise portfolios, transition to sustainable alternatives and deliver innovative energy solutions in the production, handling, and usage of hydrogen for a full range of mobility, heating and storage outcomes. We provide single-source multidisciplinary engineering, environmental, project and construction management services across the whole hydrogen value chain. Our combination of global experience and integrated technical capabilities delivers strategic solutions that improve and modernise infrastructure; enhance sustainability and resiliency; and benefit communities.

AEG POWER SOLUTIONS

Since decades, AEG Power Solutions has ensured continuous availability of power and the safe operation of critical applications in all environments thanks to a wide portfolio of power supply systems and services. Our distinctive expertise spans AC & DC technologies and we have developed world-class engineering capabilities that span conventional and renewable energy platforms.

We leveraged our unique power electronics, grid integration and conversion expertise to develop power solutions supporting the energy transition, from wind power generation to energy storage and hydrogen production. AEG PS is a proven specialist for storage converters in On/Off Grid energy storage applications thanks to our bi-directional system, Convert SC Flex.

For hydrogen production, our high current rectifiers Thyrobox DC3 are a solution of choice to supply power for the electrolysis process. We provide the complete power block (transformer + rectifier) solution with the integrated grid compliance requirement and low losses. The power blocks ranges from 500 kW – 10 MW blocks which can be connected together to supply the electrolyser cells for large scale projects above 100 MW. AEG PS is working with electrolyser OEM's, EPC's and integrators to support them with our power solutions. We have been an active player in this field for over 8 years and have developed a field expertise to best support our customers.

Air Products Netherlands B.V.

Mr Rogier Blokdijk
Boyneweg 10
3197 LK Botlek-Rotterdam
The Netherlands

+31 (0)10 296 06 74
www.airproducts.com
ninfo@airproducts.com

Air Products has been a leading global producer of industrial gases for more than 80 years. With a strong focus on energy, environment and emerging markets, Air Products supplies essential industrial gases and related equipment to dozens of industries including refining, chemicals, metals, electronics and food and beverage.

Air Products is the world's largest hydrogen producer. We believe that hydrogen, the most abundant of all elements, will be the solution – the future of energy. Through our partnerships

we are already working towards a hydrogen-based world where hydrogen and fuel cell technology will play a central role in decarbonizing heavy duty vehicles and industry. Air Products is active throughout the complete hydrogen value chain including production, distribution, storage and dispensing and has been at the forefront of hydrogen refueling for decades. Air Products has experience with more than 250 hydrogen refueling station projects in 20 countries. Air Products' technologies are used in more than 1.5 million refueling operations annually.

info@allesoverwaterstof.nl

We focus on the societal acceptance of Hydrogen. For this we host one of the major Dutch Hydrogen Websites. And we organise the 'Hydrogen Experience', practical and interactive workshops on Hydrogen for Companies, Schools and Government institutions.

In these workshops we let people actually experience Hydrogen by making it, storing it and using it in many ways during the event. And we advise others on how to involve stakeholders in their Hydrogen projects. We believe the end users should be involved from the beginning and not at the end.

We organise practical and interactive workshops on Hydrogen for Companies, Schools and Government institutions. In these hands-on events we let people experience Hydrogen in many different ways. We make Hydrogen, demonstrate how our (miniature) Hydrogen car works, show our Hydrogen scooter and our Hydrogen Drone. And we bake some Dutch pancakes on our Hydrogen Stove.

It is an ideal event if you are looking for Hydrogen inspiration as a kick-off for Hydrogen Projects. But we also love to visit schools to teach children and students, communities or inspire business teams.

AMF Bakery Systems – AMF Den Boer

Mr Lex van Houten
Edisonweg 50

www.amfbakery.com
sales@amfbakery.com

Bakeries and food producing companies around the world partner with AMF Bakery Systems – inclusive of AMF Tromp and AMF Den Boer – for best-in-class unit equipment and complete system solutions, from mixer to marketplace. Through innovative, precision engineering informed by our master bakers' expertise, AMF designs integrated production solutions for soft bread and buns, artisan bread and rolls, pizza and flatbreads, cakes and pies, pastries and croissants, and beyond. Single units machines and complete lines, at market standard and sometimes tailor made is what we offer and market for many years. Den Boer is our oven building company, where we produce production ovens, tunnel ovens or band ovens for many food applications, like bread, cake, muffins, pizza, pie, pastry, crackers, rusk, cookies and many more. AMF Den Boer has introduced the world's first

Hydrogen fuelled tunnel oven, than can bake at 0,0% emission and thus improve the bakery footprint immediately. Our Hydrogen burners can be retro-fitted onto existing ovens, and also Hybrid models are available, where natural gas and Hydrogen are combined, to make a first sustainable step for bakeries, until prices of Hydrogen drop more.

AMF Europe is part of a global company with facilities in the United States, Latin America, United Kingdom, the Netherlands, China, and Singapore, collaborating with more than 600 teammates worldwide.

With a mix of global networking and local charm, the AMF Europe teams encompass a culture of passionate people who are committed to developing better food and better lives for their teammates, families, customers, and community.

www.thomassen.energy
info@thomassen.energy

Ansaldo Thomassen (ATH) is a leading supplier of technologically advanced aftermarket gas turbine components, performance upgrades, in-house component repair and outage services for existing GE heavy-duty gas turbines. We offer flexible and comprehensive Service Agreements (FSA's), ranging from parts supply and reconditioning to full scope agreements including remote monitoring and diagnostics and inventory management.

Major objective of this project is to develop a cost-effective ultra-low emission (sub 9ppm NOx and CO) combustion system retrofit for existing installed gas turbines in the output range of 1 MW to 300 MW. At the centre of this innovative high-technology project is the patented and novel aerodynamic trapped vortex FlameSheet™ combustion technology platform. Fuel flexibility and stable operation from 100% natural gas to 100% hydrogen and any mixture thereof, is a key requirement.

Our vision is to supply cost effective advanced retrofit solutions for a Clean Energy World. ATH is leading a consortium targeting the demonstration of gas turbine retrofit technology for hydrogen. Together with our partners we are currently working on our High Hydrogen Retrofit Project.

Antonius

ANTONIUS

The energy transition is taken place right now and we are living it together. Green hydrogen will play a key role in regulating our energy needs based on supply and demand. Therefore the storage of renewable energy and the infrastructure is an important part of the whole process.

Antonius can be your industry partner for storage and transport design of energy. We are an experienced fabricator that can design your production process and build your newly developed product. Your idea will be transferred into a design ready for production. As your partner we will take care of the complete project management, fabrication and assembly of your product. Over 80 years of craftsmanship in

shaping metals brought us to the level we are at right now. With our extensive knowledge of materials and production methods, with the best qualified welders in the industry and our special machines we can produce high quality products against all applicable standards. Our craftsmanship is the reason why customers and engineering firms do contact Antonius at an early stage.

We have an ideal situated production location (40,000 m²) with a direct waterside connection, to transport big parts by ship worldwide.

Meet our strength and challenge us to experience our craftsmanship. Let's work together and make this green deal! ANTONIUS.

AquaBattery B.V.

Dr. Jiajun Cen
Lijnbaan 3C
2352 CK Leiderdorp
The Netherlands

+31 (0)6 39 65 66 09
aquabattery.nl
jiajun.cen@aquabattery.nl

AquaBattery is a deep-tech company based in the Netherlands working to revolutionize green energy storage. Our mission is to cut energy bills and catalyse the development and uptake of renewable energy technologies across the EU and beyond. We recognize that renewable energy is only part of the solution, and only through pairing it with cheap and scalable energy storage solutions can truly make an impact. AquaBattery was founded in Leiden in 2014 to commercialize the world's cleanest energy storage solution: a battery that can store renewable energy in water and salt (such as seawater). Our team is composed of leading experts in water membrane technologies and the energy storage industry, combined with the leadership of visionary founder Dr. Jiajun Cen. Together, the team combines 50+ years of engineering experience with 25+ years in business and management.

We are supported by a network of exceptional partners, such as Climate-KIC, TU Delft, The Green Village Delft, and technical experts at Imperial College London, REDStack, and Wetsus. Our technology has been successfully demonstrated through several prominent installations in the Netherlands and in Italy and has reached TRL 6. Our saltwater battery is a flow battery where power and storage capacity are decoupled. The user can decide on how large the respective components of power or storage capacity need to be in order to suit the application. The cost for scaling up the storage capacity is low, one just needs a larger tank, some salt and water. At locations where space is not the limiting factor, we can realize virtually unlimited storage capacities. This makes our battery very well suited for long-duration storage (10+ hrs).

AVK Nederland BV

Ms Dana Hofman
Radeweg 12
8171 MD Vaassen
The Netherlands

+31 (0)578 574 490
www.avknederland.nl
info@avknederland.nl

AVK Nederland is part of the AVK Group, market leader in the field of appendages in the segments: water, gas, wastewater, fire protection and industry. Our range consists of a wide variety of valves, fire hydrants, couplings, street covers and accessories that all meet the highest standards in terms of safety, durability and quality. Every day, AVK solutions help deliver clean water and sustainable energy to millions of people in households and industries all over the world. We assist in transporting, treating and reutilizing wastewater, and in assuring safe, secure surroundings ready to battle unfortunate events of fire. We work towards a better, more sustainable future, where natural resources are used and managed wisely. We want to make our

performance on social responsibility concrete and objectively demonstrable by means of the CSR Performance Ladder certificate, level 4. AVK would like to contribute to a successful and safe energy transition. Hydrogen can become an important link in the energy supply of the future. It is a sustainable option as a raw material and energy carrier. Moreover, the infrastructure needed to transport and store it is already largely available in the Netherlands. With AVK gas valves you are ready for the future with our KIWA certification for hydrogen. AVK also contributes to projects testing hydrogen distribution. In the Netherlands gate valves are supplied to a project with TU Delft 'The Green Village' where 100% hydrogen is being tested.

BA2C

Mr Willem Frens
Lange Poten 29
2511 CM The Hague
The Netherlands

info@ba2c.com
+31 (0)6 48 35 32 63
www.ba2c.com

BA2C Europe / Latin America (BA2C) is a green hydrogen and renewables chemicals/fuels/ electricity project developer. It is our aim to be (one of) the first project developers introducing new, but most efficient, technologies to produce green ammonia (NH_3), methanol (CH_3OH), synthetic fuels from renewable electricity, municipal and organic waste feedstock. In this way we decarbonize existing brownfield industrial production sites (to make use of the existing assets) or set-up greenfield plants in areas where renewable electricity, municipal and agricultural waste is cheap. BA2C cooperates in its projects together with leading technology developers from all over the World.

With our knowledge with energy transition and industrial transformation BA2C also advises

companies and ports to define best strategies to become energy efficient and reduce CO_2 emissions while keeping a good and interesting business case.

BA2C also invests in other green molecule development projects. Examples are the well-known Liquid Wind initiative (to produce renewable methanol from biogenic CO_2 and green hydrogen) and HyAPC, a venture of BA2C. This last Netherlands technology is an oxy-fuel combustion technology using green hydrogen and green oxygen (both from an electrolyser). In future we are convinced HyAPC will play an important role to balance the (renewable) electricity system. Another activity of BA2C is guiding and supporting scientists to develop new generation technologies.

Battolyser B.V.

J.P. Vrijenhoef
Karel Doormanweg 5
3115 JD Schiedam
The Netherlands

+31 (0)10 473 92 73
www.battolyserbv.com
info@battolyserbv.com

Battolyser is a Delft University of Technology spin-off that aims to stimulate the development, production and commercialization of the Battolyser technology. Koolen Industries, Proton Ventures, Professor Fokko Mulder and Delft Enterprises are the shareholders which foresee a big market potential for the combination of a Battery Electrolyser type of equipment.

The technology is patented and consist of an integrated battery electrolysis system, which can store and supply electricity very efficiently as a battery and is called 'Battolyser'. During loading as well as when the battery part is fully loaded, the Battolyser starts acting as an electrolyser, splitting water into pure hydrogen and oxygen at elevated pressures.

By combining battery technology with electrolysis, the Battolyser achieves an outstanding overall efficiency of up to 93%, depending the operation and it offers users of a Battolyser a flexibility in applying sustainable energy at the moment when they need it as well as producing hydrogen in case the local grid is congested (curtailed). This means Battolysers can be used to secure continuous production of production processes using as well green energy during periods of low production of sustainable energy.

At this moment the scaling-up of the Battolyser is in progress and Battolyser expects a 4,0 MW / 4,0 MWh installation to be operational in the course of 2022.

Berenschot

We work with Dutch and European organizations in the energy sector, users, industries and governments to conduct system studies, roadmaps, strategic- and policy advice. Our services related to hydrogen are embedded in a systemic view:

Scenario studies: we provide insight into the consequences of choices with regard to our energy system, both economically and energetically. Recently, we developed four national scenarios for a low carbon future in 2050 (II3050). In all scenarios hydrogen (green & blue) plays a pivotal role in system balancing, storage and decarbonisation of sectors.

Flexibility and system integration: we provide support in quantifying the potential and feasibility of flexibility measures like power-2-gas and

hydrogen storage. Currently, we are developing a blueprint for a Hydrogen Exchange in the Netherlands. We analyse the technical, energetic and economic consequences of flexibility measures in the short and long run. We often work together with the energy industry.

Techno-economic analysis: we help to translate ambitions into plans for technology options like heat pumps, heat networks or carriers like hydrogen in order to arrive at the best future-proof solution with low costs and high durability.

Implementation of the strategy: we have extensive experience with organizations that operate in a mix of a regulated playing field of government and business. We help you with your strategy, design of the organization and the optimization of business processes.

Bosch Rexroth B.V.

www.boschrexroth.nl
sales@boschrexroth.nl

rexroth

A Bosch Company

Green hydraulics: basis for efficient H₂ supply. The political framework is in place. Now it is important to find the right technologies for the rapid introduction of green hydrogen. Hydraulics is one of them, as it can compress hydrogen highly efficiently and safely. Last but not least, filling stations are thus particularly reliable and energy efficient.

Proven industrial hydraulics solutions are a major help in building the H₂ infrastructure. With Bosch Rexroth as a partner, the players benefit from needs-based support. This ranges from robust and safe components to engineering support and complete solutions.

When setting up H₂ filling stations, manufacturers and operators can choose from several approaches: For H₂ compression up to 900 bar and a delivery rate of approx. 100 kg/h, either highly dynamic cryogenic pumps or highly efficient compressors with linear or rotary drives can be considered. If smaller delivery rates are required, servo-hydraulic compact axes generate advantages because they require little space, especially for retrofitting in urban areas, and can be put into operation quickly thanks to the Plug & Produce preconfiguration.

Safety shut-off blocks and valves from Bosch Rexroth also prove their worth when transporting H₂ in pipelines. In addition, the hydraulics expert's close-knit service network creates the best conditions for optimum on-site maintenance.

Bredenoord

Mr Franz Hullegie
Zutphensestraat 319
7325 WT Apeldoorn
The Netherlands

+31 (0)55 301 85 01
www.bredenoord.com
info@bredenoord.com

Bredenoord is an independent family-run business that develops, supplies, maintains and operates the most reliable and cutting-edge decentralized energy systems worldwide and, consequently, provides its customers with energy security. Bredenoord continuously works on developing the energy solutions of the future and is one of the initiators in developing hydrogen applications in mobile and temporary energy, with a focus on sustainability, low emission and safe operation. Development of the first hydrogen genset started as early as 2006 and resulted in the Purity in 2009, which has powered various events, among other projects. With over ten years of experience with the Purity, Bredenoord continues the development of a hydrogen genset and takes part in various demos and pilots.

Through a clever combination of fuel cells and battery packs the Purity can be used straight away for projects with a low power demand. Bredenoord keeps aiming for innovative use of hydrogen technology for mobile power installations and, for example, also researches the use of hydrogen in combustion engines for gensets. These various research projects take place in collaboration with a variety of partners. Bredenoord is always open for new collaborations in this field.

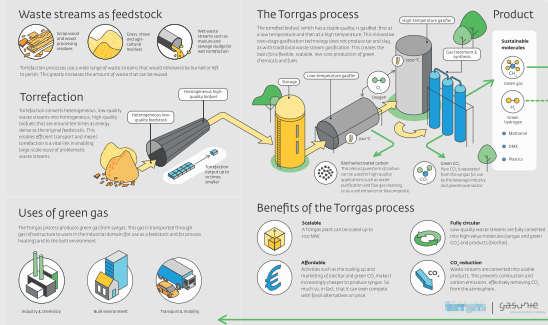

BrigH2

Mr Marc van Doorn

Torrefaction and gasification

Innovative and scalable technology that produces a sustainable synthetic gas

BrigH2 : The Renewable Alternative. BrigH2 plans to start a 50 MW gasification unit to produce 6300 mtpa renewable hydrogen, pure bioCO₂ and Biochar. The Demonstration plant will be situated on Brightlands Chemelot Campus and will serve the industrial users on the Chemelot site, but also intends to produce Fuel Cell grade Hydrogen for the mobility sector.

The project is in the feasibility phase at the moment. The location of the plant on the Chemelot campus fits exactly with the circularity target of the campus and the site. The feedstock will be torrefied biomass, where torrefaction does create a significant extension of the area where the biomass is gathered. Torrefaction also creates an uniform feedstock for the delicate process, reducing the investment costs per ton of renewable hydrogen to the max, but has proven

itself in the quality of the syngas produced and the potential for uninterrupted continuous production. Next to the hydrogen production, BrigH2 also provides a long term sustainable route for CCU processes due to the biogenic origin of the CO₂ produced, as well as negative CO₂ emissions by connecting to the CCS infrastructure under development on the Chemelot site. Alternatively the CO₂ prevents an additional fossil CO₂ emission once applied in greenhouses. The Biochar is of exceptional quality and suitable for a large number of applications now dependent on petrochemical coke of low sulfur. The technology is developed in Groningen on a 1 MW scale and is further scaled towards a 2 x 12.5 MW unit to produce Methane from syngas in Delfzijl.

Bronkhorst Nederland B.V.

Mr Ger Jan Dorland
Lunet 10c
3905 NW Veenendaal
The Netherlands

+31 (0)318 551 280
www.bronkhorst.nl
info@bronkhorst.nl

Bronkhorst is leader in low flow fluidics handling technology. The small robust flowmeters of Bronkhorst are very well suitable for testing fuel cells and electrolyzers, both for research and production applications. Our instruments are ideally suited for delicate control of the pressure or flow of single gases, liquids or fluidic mixes to support development and quality issues. We also support improvements to LOHC (liquid organic hydrogen carrier) and hybrid hydrogen carrier technology. The IN-FLOW range of instruments can be applied to measure high quantities of hydrogen at production sites. Because we offer low flow liquid flow control technology as well, our instruments are used in odorant delivery to hydrogen or natural gas that are injected in gas grids.

Bronkhorst offers an extensive product range of thermal, Coriolis and ultrasonic flow meters and flow controllers for low flow rates of gases and liquids. Its flow instruments are used for a variety of applications in laboratory, machinery, industrial and hazardous areas. By sharing their knowledge and closely cooperating with OEM customers and research organisation in the field, Bronkhorst develops customer specific low flow solutions, e.g. of multifunctional, pretested modules or skids for gas, liquid or vapor flow control.

Bronkhorst is a truly world-wide organisation with an extensive network of distributors and service stations across Europe, the Americas, Africa, the Middle East, Asia Pacific in Japan.

Bürkert Fluid control systems

Mr Jasper Luik
Minervum 7220
4817 ZJ Breda
The Netherlands

+31 (0)6 22 39 34 35
www.burkert.nl
jasper.luik@burkert.nl

Bürkert Fluid Control Systems is one of the world's leading manufacturers of measuring, control and regulating systems for liquids and gases. Bürkert products are used in a wide range of industries and applications, ranging from labs to medical, bio-engineering and aerospace technology. With a portfolio of more than 30,000 products, Bürkert is the only supplier to offer all fluid control system components, from solenoid valves to process and analytical valves, from pneumatic actuators to sensors. With its headquarters in Ingelfingen in Germany, the company has a wide-ranging sales network in 36 countries and more than 3,000 employees. Bürkert develops customized solutions and innovative products at its five Systemhaus locations in Germany, China, and the USA. The product portfolio is topped off by extensive services, from consulting and conception,

through implementation, to maintenance and training.

A rule of thumb applies in the language of engineers: the quality of a system is proportional to the quality of its components. In fact, the peripherals are coming more to the fore among experts – with control and regulating system modules as well as intelligent process related coupling of these components. This is where Bürkert has been active for over 60 years. As one of the few providers who can cover the entire process chain involving measuring, controlling and regulation.

It is no wonder, that the Bürkert product range includes precisely those components which are optimal for use in hydrogen technology: certified modules with low power consumption, a wide temperature range, chemically resistant properties and a good price-performance ratio.

Stichting Cenex Nederland (Cenex NL)

Ms Theodora Skordili
Overhoeksplein 2
1031 KS Amsterdam
The Netherlands

+31 (0)20 369 98 83
www.cenexgroup.nl
hello@cenexgroup.nl
theodora.skordili@cenexgroup.nl

Cenex NL is an independent not for profit research and consultancy organisation on zero emission mobility and related infrastructure, and the circular economy with regards to mobility. Cenex NL is not driven by shareholders or returns-on-investment and was founded in 2018 for the purpose of accelerating transition to clean transport by providing technical expertise and disseminating lessons learned across Europe.

Cenex NL is a strategic partner of the UK's first Centre of Excellence for Low Carbon and Fuel Cell Technologies (Cenex UK – est. 2005). The Cenex organisations are established players in the European hydrogen community through:

- Active on-going participation in European R&D work:
 - H2ME (2016-2022): EU's largest FCEVs and refuelling infrastructure demo;

- ZEFER (2017-2022): Commercial and operational viability of high-usage vehicles;
- HyTrec2 (2014-2020): Hydrogen vans, trucks and refuse collection vehicles in North Sea Region.
- Market studies that analyse the European hydrogen market, enabling conditions and policy landscapes for technology take-up.

We offer expertise to automotive industry, early adopters of FCEVs and policy makers looking to implement strategies to accelerate the use of clean hydrogen in mobility. Examples include:

- Performance analysis of vehicle and refuelling infrastructure at real-world operations;
- Customer value proposition and business case of hydrogen in land transportation;
- Life Cycle Analysis of FCEVs and refuelling infrastructure.

Cohesys

ir. M.H.F. van Woensel
Dempseystraat 14
5453 JR Langenboom
The Netherlands

+31 (0)6 54 70 02 12
www.cohesys.nl
marc@cohesys.nl

Cohesys is a consulting company on metallurgical and/or production related issues. With more than 30 years of working experience we have done many projects in high (and low) tech environments. Our projects include setup for laboratory scale production up till mass production. We are busy in semiconductor production and the nuclear industry, but find ourselves equally at home in a foundry.

We excel in fast and reliable literature search and advice and train your people in metal and hydrogen related questions. We understand production in all stages, from drawing board till mass fabrication. If you don't know how to start or how to scale your production process up to the next level: call us.

Connectr - Energy innovation

Mr Jeroen Herremans
Westervoortsedijk 73
6827 AV Arnhem
The Netherlands

+31 (0)85 483 09 88
www.connectr.nu
info@connectr.nu

Connectr, where new energy innovations emerge and grow. The Province of Gelderland has a strong energy cluster centred in Arnhem, where Connectr is located. Arnhem is known as the Hydrogen Tech capital of The Netherlands due to the concentration of SME companies in the value chain of high tech hydrogen solutions. By ensuring the vitality and growth of that cluster, Connectr contributes to the energy transition, the regional economy, and the human capital agenda. The strength lies on the implementation level: new ideas are immediately tested and put into practice from Connectr, and they can grow from there.

Connectr is a triple-helix foundation funded by public and private parties as well as knowledge institutions. Partners are the city of Arnhem, The Province of Gelderland, HAN University of Applied

Sciences including SEECE and ACE, Development companies as OostNL and KiEMT, IPKW, Generation E and many energy related companies resident in Connectr or the region or actively connected with projects.

Connectr consists of an Innovation Program, an Innovation Lab and Shared Facilities. In the midst of these components, the Core Organization provides connection, reinforcement, and acceleration.

Focus strengthens the contribution to the global energy transition. That's why Connectr focuses on three key technologies that are already developing strongly in the region and that will add value on an international level.

1. Power systems engineering
2. Electrochemical energy storage
3. Sustainable drive systems

ConPackSys B.V.

Mr Mark van der Linde
Burgemeester De Raadsingel 61
3311 JG Dordrecht
The Netherlands

+31 (0)87 639 11 11
www.conpacksys.nl
sales@conpacksys.nl
info@conpacksys.nl

ConPackSys is an engineering firm located in Dordrecht, the Netherlands close to the Rotterdam and Antwerp harbours. We specialize in the engineering, packaging, construction and commissioning of compressor systems for the industry. This entails the technical design, fabrication and testing of the compressor itself but also its auxiliary systems; drivers, process equipment (coolers, separators), piping, control and instrumentation, noise enclosures and lube oil systems. These are all required for safe and sound operation of the compressor. ConPackSys has experience with applications for hydrogen and carbon dioxide (including Carbon Capture and Storage).

Compression is going to be important throughout the hydrogen value chain. Compression is required for storage of hydrogen, for transportation from A to B and also at the end-user. Hydrogen can be converted to green chemicals, to generate electricity or is used in mobility. ConPackSys is able to provide solutions for each of these applications with compressor duties ranging from 10 kW up to 10 MW. We specialize in tailor made and turn key systems for our clients.

Corre Energy Storage

Mr Arnold Frinks
Paterswoldseweg 806
9728 BM Groningen
The Netherlands

+31 (0)50 790 10 00
www.correenergystorage.nl
info@corre.energy

Corre Energy Storage is a Dutch, Groningen headquartered business, that develops large scale renewable energy storage. The technique we use is called Compressed Air Energy Storage (CAES). We aim to develop several projects across Northern Europe, enabling the integration of renewables at large-scale and catalysing the energy transition and the Green Hydrogen Economy. Corre Energy wants to develop its first CAES project in Zuidwending, the Netherlands through its subsidiary Corre Energy Storage. CAES provides an energy balancing solution for both TSO's and renewable energy portfolio operators, without which countries like the Netherlands will be unable to reach the targets of 70% renewable energy by 2030. Why this project? In order to guarantee a sustainable future – also for future generations – CO₂ emissions in the Netherlands (in Europe

and throughout the world) will have to be reduced drastically. In accordance with the Paris Climate Agreement, as society we produce more solar and wind energy every year. However, this growth also has its limitations. For example, the wind and the sun cannot be influenced, which means that sometimes too much and sometimes too little green electrical energy is produced. On days when more energy is produced than the market needs, installations sometimes have to be switched off, causing the loss of valuable energy and investments. On days when too little green energy is produced, natural gas has to be used and CO₂ is released. In short: it is very difficult for society to accurately absorb fluctuations in the electricity network without wasting energy or emitting CO₂. The Corre Energy Storage project in Zuidwending offers the solution for these problems.

Danfoss Drives

Mr Ruud Versluis / Mr Remco Buskens

ENGINEERING
TOMORROW

Get on target with Hydrogen. Danfoss enables its customers to deliver the most sustainable Green Hydrogen. We can provide a grid-friendly, approved solution with impressive energy efficiency. Low harmonics and a high power factor ensure a competitive power supply for the electrolyzer at hand. With long experience in power conversion combined with a leading position in the world, Danfoss is an ideal partner for investment in the emerging hydrogen market. Our experience ensures that a system is fully scalable and economically viable. Make use of expert application know-how from Danfoss professionals all over the world:

- Danfoss technology improves stability of the power supply by supporting a diverse range of energy generators and energy storage systems.

- We can reduce the capital investment required for grid infrastructure. Certified for grid code compliance in a wide range of countries, we enable fast system certification for system integrators.
 - We mainly are working through OEM and System Integrators.
 - At our Application Development Center (ADC) in the Netherlands we can support with engineering, testing (up to 2MW) and simulation facilities.
- Optimizing the use of renewable energy and stabilizing the grid is a precondition for a cost-effective transition to a decarbonized energy system. The Danfoss portfolio consists of Drives, DC/DC converters, Grid converters, Active Front End, Motor Drives, Heat exchangers and Valves.

De Boer SPS

A.H. de Boer
Norgeweg 42
8433 LN Haulerwijk
The Netherlands

+31 (0)6 30 54 48 86
www.deboer-sps.nl
info@deboer-sps.nl

De Boer SPS is founded in 2008 and is an independent company specialised in development of new sustainable energy techniques and business. Examples are projects related to (bio) LNG, production of bio gas, bio methanol, energy from waste concepts etc.

De Boer SPS has developed logistical solutions for the storage and transport of gasses including hydrogen for several customers. New techniques like LOHC and liquid hydrogen where considered and further developed for upscaling and use. Furthermore, De Boer SPS has developed several concepts for (bio) LNG distribution and storage and can be also used for hydrogen distribution concepts.

Secondly, De Boer SPS is involved in new techniques for capture and re-use of CO₂. During the capture of CO₂ also H₂ is produced and with additional (green) hydrogen, this is the basis for several base chemicals and fuels like methanol, ethanol and urea.

Every project and initiative is unique and the approach of De Boer SPS is unique for every project. Please contact us for further acquaintance is our mutual approach will work for your company.

deltalinqs-climate-program
info@deltalinqs.nl

Within the Deltalinqs Climate Program (DCP) we work together on the climate transition of the Rotterdam Port Industrial Complex. In the DCP, Deltalinqs works with its members and partners on three themes: future energy mix, sustainable fuels & energy carriers and circular harbor & industry.

The role of the DCP is to connect the right parties to each other, to provide those parties with information and inspiration, and to help our members start innovative projects.

This includes projects across the full hydrogen value chain, including import as well as blue and green hydrogen, infrastructure, and industrial applications in hard-to-abate industries, as well as transport.

In the 'Versnellingshuis' we work together with public partners to mitigate barriers which are inevitable when starting new and innovative projects. Through our involvement in the Data Safe House, we help our infrastructure partners prepare the grid of the future.

Demaco Holland B.V.

Mr Ronald Dekker
Oester 2
1723 HW Noord-Scharwoude
The Netherlands

+31 (0)226 332 100
www.demaco-cryogenics.com
info@demaco.nl

Demaco is an expert in the field of cryogenic technology, we build infrastructures to facilitate the transport and application of industrial gases at extremely low temperatures. Between -160 and -271 degrees Centigrade, to be precise. We work with some of the most recognized companies and institutes around the world. Demaco has worked in the hydrogen industry for over three decades. All projects are executed respecting all engineering and design standards for equipment for potentially explosive atmospheres (ATEX). It is applied to all types of electrical or non-electrical apparatus and as well as safety devices, ensuring reliability. When it comes to hydrogen cryogenic equipment, Demaco is a turn key supplier, we assume overall responsibility and support customers around the world as a solution provider through the complete journey, starting from the idea to the

commissioning of the equipment. Demaco provides the design, manufacture, installation of cryogenic equipment including control system. Demaco serves the hydrogen market with the following products:

- Hydrogen filling stations or loading bays for filling trucks
- Hydrogen loading arms for refueling ships
- Hydrogen transfer lines from the tank or liquefier to the application either on-shore or off-shore
- Hydrogen cryostats
- Hydrogen distribution boxes
- Hydrogen purifier
- Hydrogen liquefiers (small/compact)

Since Demaco works on both standard and highly advanced projects, we have built up a vast experience. Consequently, no cryogenic issue is too ambitious.

Demcon

Mr Jan Leideman / Mr Barend Vermeulen
Institutenweg 25
7521 PH Enschede
The Netherlands

+31 (0)88 115 20 00
www.demcon.com
info@demcon.com

Demcon energy systems develops advanced technical solutions and provide innovative products in the field of sustainable energy. It draws on the extensive multi-disciplinary engineering know-how and production expertise that Demcon has built since 1993 for a very wide range of applications and technologies. The fast-growing Demcon group of companies currently employs 750 people in its branches in Best, Delft, Enschede, Groningen, Maastricht, Münster (Germany), Tokyo and Singapore.

One of the focus areas of Demcon energy systems is the development of technologies and equipment for the production of green hydrogen by means of water electrolysis. Together with partners, Demcon develops and supplies electrolyser modules for the decentralised

production of hydrogen for transportation and industrial applications, and other systems related to energy production and storage.

In addition to supplying complete systems, Demcon offers engineering and OEM production services to support our customers with the development and manufacture of their own solutions. Areas of expertise include mechatronics system engineering, multiphysics modelling, electronics and software development and industrial automation. Our customers can thus benefit from the unique combination of the very broad engineering excellence within the Demcon group and the deep understanding of the technical challenges in the sustainable energy sector that is the specialty of Demcon energy systems.

Desu Systems BV

Mr Mark Nater
Weg en Bos 20

The Netherlands

+31 (0)10 461 03 33
www.desusystems.com
mark@desusystems.com

Special Hazard Fire Detection & Suppression

Desu Systems strives to make hydrogen production, storage and the fuelling process as safe as possible. Being the European Master distributor for Spectrex flame detectors, we supply to OEM's, contractors and fire safety companies.

We have several flame detectors in our portfolio that can detect an (invisible to the human eye) hydrogen flame within (milli)seconds. Our products are known for their long life and fault-free operation.

Our Hydrogen flame detectors are already in use in many hydrogen filling stations, hydrogen powered vehicles, equipment and in storage facilities all over the world.

With our skilled staff and local stock we strive to provide fast and friendly service. Is your hydrogen project safe? Just give us a call.

Doeko B.V.

Mr Hendri Sas
Thomas van Heereveldstraat 1
6551 AK Weurt
The Netherlands

+31 (0)24 679 07 50
www.doeko.nl
h.sas@doeko.nl

For more than half a century, Doeko is specialized in High tech tooling. Through those years, Doeko gained a lot of experience in cutting tools, plastic injection tools, precision mechanics and mechatronics. Experience that can not be matched with machines or systems. We design and manufacture high-tech components, modules and systems based on precision engineering and machining. We look at your complete production process with a helicopter view and then design the optimal assemblies down to the smallest detail. Doeko is able to produce your components to the highest precision. In our own modern workshop, we work with 53 highly skilled and experienced people. Besides the people,

we work with 25 robots that can run 24/7. The engineering of tooling for your product, can be (partially) done by our inhouse engineers. Doeko believes in hydrogen and wants to help you in producing the right tools and machinery for your product. Whether you have a functioning production line, prototype or design. Together with us, we can bring your product to the next level! As a specialist in high precision tooling we believe that we can help you. When you want to discuss how we can help you with producing your product, please visit our website or contact us. We deliver the smartest solution for your production process!

Dorhout Advocaten N.V.

mr J.F. Koenders MRICS
Van Ketwich Verschuurlaan 98
9721 SW Groningen
The Netherlands

+31 (0)50 520 65 20
www.dorhout.nl
j.f.koenders@dorhout.nl

Dorhout Advocaten has a good reputation in the northern part of the Netherlands as a medium-sized law firm for companies, central and local government, non-profit institutions and other organisations. Our firm employs specialised lawyers in various fields of law. They combine their knowledge with an understanding of commerce. We base our approach on the differences that each sector has. We work in tailor-made teams with the interests the client as our common goal.

Furthermore, Dorhout Advocaten is a law firm for entrepreneurs in the northern part of the Netherlands. Doing business means seizing opportunities and dealing with risks. With our specialist knowledge and over 80 years of experience, we ensure that our clients can translate opportunities into action in a responsible manner and that risks can be

managed so that problems can be solved or avoided.

We are committed to:

- providing services of the highest quality, quickly and with determination
- one office for all legal questions
- an organisation with short lines of communication and a single point of contact for all cases
- competitive rates

Energy law covers a wide range of public and private law areas. Each energy source and each part of the energy chain – production, supply and transport – has its own specific legal aspects and regulations.

Energy law has taken on major proportions in the Netherlands in recent years, mainly due to the liberalisation of the electricity market.

Douna Machinery B.V.

H. Wijnja
Hidalgoweg 1
8938 BA Leeuwarden
The Netherlands

+31 (0)58 284 96 60
www.douna.nl
h.wijnja@douna.nl

Douna Machinery B.V. is a factory active in mechanical machine building for 98 years. Ultimate experience in prototype construction of various machines where the gas industry is the biggest part. With our own engineering department, we can assist from idea to assembly and production of complete machines. Nowadays Douna is connecting green technologies, for example for future energy supply or energy storage. In addition, precision large machining, certified welding, assembly and measuring in a conditioned measuring room are key words that belong to Douna's craftsmanship. The industrial hydrogen ecosystem in the Northern Netherlands is receiving a significant boost with the start of the WAviatER project in January 2022. Douna plays a significant role

in this project as developing partner. With consortium partners we build an 1 MW Hydrogen production technology for the Aviation sector and Energy applications as demonstration facility on airport Eelde, delivery September 2023. On the roof of Douna Machinery factory 1400 solar panels generate 550.000 KWh of electricity per year. That is enough to provide about 200 households with power for a year. In addition, it will also save 124 tons of CO₂. With this roof, Douna provides for its own electricity use and has the possibility to provide electricity to other companies on the industrial estate in the future. Douna Machinery is located in Leeuwarden, almost the center of 'the Hydrogen Valley' in the Northern of the Netherlands.

Duiker Combustion Engineers

Mr Albert Lanser
Turfschipper 91
2292 JK Wateringen
The Netherlands

+31 (0)174 282 700
www.duiker.com
sales@duiker.com

Duiker specializes in developing, designing, supplying, installing and servicing advanced combustion solutions, tailored to customer needs for liquid and gaseous fuels for the oil refining, chemical and process industry worldwide. At Duiker we believe in jointly realizing inventive solutions that make a meaningful contribution to people and the environment and hereby Duiker's motto is 'Thousands of process solutions, you can rely on our experience'.

The following products & technologies in relation to hydrogen are relevant:

1) Stoichiometry Controlled Oxidation (SCO) for conversion of fossil fired power stations into renewable ammonia (as hydrogen carrier) fueled power stations for zero CO₂ emission electricity.

- 2) Multi-Fuel Combustion Technology: engineered flexible solutions for revamping existing process heater/furnaces from fossil fuels into low carbon or renewable fuels.
- 3) Stoichiometry Controlled Oxidation (SCO) for conversion of renewable ammonia (as hydrogen carrier) into high temperature heat for the process industries. This SCO technology is scalable, proven and commercially available.
- 4) Ammonia cracking technology, developed by Duiker based upon their proprietary SCO technology for converting renewable ammonia into affordable & pure hydrogen. This ammonia cracking technology has been developed for large, world scale ammonia cracking at low costs and for high conversion yields.

Dutch Boosting Group

Mr Gijs Stigter
Vendelier 57-C
3905 PC Veenendaal
The Netherlands

+31 (0)318 540 404
www.dutchboostinggroup.nl
info@dutchboostinggroup.nl

At Dutch Boosting Group, we are system thinkers for the living environment. Always with the bigger picture in mind. Continuously looking for new ideas. Our working method is based on a systematic approach. By explicitly balance needs and interests we believe to create sustainable solutions. We are driven by improvement and curious about new ideas and future-proof solutions. We innovate, we improve, we accelerate: that's how we boost!

We have been successfully applying our expertise for many years in complex Infrastructure projects, Spatial Development and Energy Transition. Sectors in which we see a crucial role for the application of hydrogen. In order to create the highest impact, we boost the application of hydrogen on various levels. Some examples:

- Quick Scans for organizations to determine the most suitable set of solutions, including hydrogen to attain its sustainable energy goals.
- Network analyses for governmental organizations to steer their policy making, by providing overview of stakeholders needs to adopt hydrogen applications, spatial distribution of local potential hydrogen availability and demand.
- Program/Process management of regional hydrogen programs and processes in order to accelerate the development and to stimulate local initiatives in order to boost innovation.

The challenges we face are complex. To find solutions, we are always open for joint ventures and collaborations in order to boost the implementation of hydrogen.

Dutch Marine Energy Centre (DMEC)

Mr Justin den Hartog
Hellingweg 11D
2583 DZ The Hague
The Netherlands

www.dutchmarineenergy.com
justin@dutchmarineenergy.com

DMEC is an international accelerator and service centre for marine energy solutions. We believe that marine energy will be a crucial driver to realise our global energy transition and foster sustainable growth. By advancing innovation, mobilising capital and shaping policies, we create multipurpose energy solutions for a wide variety of markets, including green hydrogen production.

Electricity produced using marine energy applications can be used for offshore or nearshore green hydrogen production. Possible ways of doing this vary from using wave energy converters for producing hydrogen at decommissioned platforms, to future use of salinity gradient technology and tidal turbines to produce hydrogen at existing infrastructures like the Afsluitdijk or the Eastern Scheldt barrier. We foresee a promising future for green hydrogen and marine energy is ready to be a part of this.

DWG

Mr Marcel van Veen
Admiraal Lucashof 5
3115 HM Schiedam
The Netherlands

+31 (0)6 86 85 83 93 / +31 (0)10 760 86 00
www.dwg.nl
info@dwg.nl
marcel.vanveen@dwg.nl

AHEAD OF TOMORROW'S CHALLENGES

Ahead of tomorrow's challenges. At DWG, we firmly believe technology has the power to make people's lives better. Technology has the potential to make the world more efficient, safer and more sustainable. Processes can be accelerated, maintenance costs can be reduced, re-work can be minimised, data can be secured, and it doesn't stop there. All technology will make the future a lot brighter and needs a dedicated expert who knows how to use the right technologies. An expert who can work out and understand your processes. At DWG, our office is full of such experts. DWG delivers total asset process engineering & design, functional safety, hardware electrical & instrumentation, industrial automation & IT engineering (including cyber security) plus SLA for 7/24/365 maintenance contracting. DWG is specialized and certified partner for Siemens,

ABB and Wonderware. AutoCad and EPlan are used as separate hardware E/I tooling but COMOS as a true single database in the middle of digitalization, supporting the transition of document oriented organizations to more data centric, based on the DWG company (but also more and more production companies) vision and strategy. We add value by the DWG ITS (Industrial Things Server) by analysing data via wireless secure smart sensorics to generate domain KPI dashboarding including AI (Artificial Intelligence) and algorithms for customer specific decision criteria. DWG mainly works at projects in the BeNeLux in the 3 harbour regions Rotterdam, Amsterdam and Antwerp! Ready for the future and beyond. Design goes hand in hand with achievement: and we can do both.

E&E advies

Mr Theo Smit
Helperpark 288
9723 ZA Groningen
The Netherlands

+31 (0)50 360 44 33
www.eeadvies.nl
info@eeadvies.nl

E&E advies

Consultants of E&E advies focus on connecting the energy transition to economic development. E&E advies supports governmental organisations, the industry and public-private partnerships to develop ambitions, strategies and policy. We perform exploratory research, we advise on policy and strategy, we monitor and evaluate policy or business cases and provide program- and project management.

Our result-oriented approach is based on our wide experience with clients in industry, governmental organizations and research institutes and strong analyses based on both quantitative and qualitative data.

Recently, we worked on several hydrogen projects:

- We developed energy roadmaps for Dutch Provinces and municipalities;
- We performed exploratory research on hydrogen production, infrastructure and use in Fryslân and Drenthe. Based on in-depth research and interviews, we identified regional opportunities and actively involved stakeholders from industry, governmental organizations and universities in our research;
- We have performed analysis that provide insight in the economic value of the energy transition and presented the results in factsheets;
- We monitor climate ambitions of several Dutch municipalities and provinces.

Eekels Technology B.V.

Mr Oscar Grooten
PO Box 4
9600 AA Hoogezand
The Netherlands

+31 (0)88 799 12 75
www.eekels.com
o.grooten@eekels.com

For over 110 years, Eekels has been operating in the Marine & Offshore and Industry & Infrastructure markets. Its employees, totalling almost 600, carry out projects and maintenance & service operations in technical automation, electrical engineering and mechanical engineering.

Eekels has specific expertise in electrical drive systems, shore power connection systems, ship systems (including alarm and monitoring systems) and process automation. Eekels takes care of the entire process from engineering, panel building, implementation and start-up to maintenance and service.

We design, build and commission fuel cell systems including electrical conversion in a range from 100 kW to 500 kW and integrate them for vessels.

For the infrastructure we provide energy storage systems and provide electrical power with hydrogen as an energy carrier. These setups provide energy for construction sites and in harbour areas as mobile shore facility.

Ekinetix B.V.

Mr Jaco Reijerkerk
Houtkopersstraat 17
3334 KD Zwijndrecht
The Netherlands

+31 (0)78 610 34 11
www.ekinetix.nl
info@ekinetix.nl

Ekinetix: a leading advisory and engineering firm in the energy transition, with extensive expertise in hydrogen technologies. We cover the entire value chain, from concept development and feasibility studies to the complete realization of technical installations (EPCM).

Ekinetix engineers have been involved in nearly all novel product-market developments for hydrogen in the energy transition in the Benelux. This is possible by our extensive expertise and knowhow in high-tech gases solutions.

We provide turnkey project management and system integration for technical installations. That includes the design, construction and commissioning of installations for hydrogen production and storage, (multimodal) hydrogen refuelling stations and distribution hubs.

Our benchmark advisory work includes building blocks of current hydrogen policy and developments: Green Hydrogen Economy Northern Netherlands; Hydrogen: Opportunities for the Dutch Industry; Permitting guide for Hydrogen Refuelling Stations; A One-Gigawatt Electrolyser Design.

Our clients trust us in all aspects of the hydrogen value chain: industrial gases and energy companies, fuel retail, shipping, grid operators, public bodies and knowledge institutes. We are the connecting factor in the hydrogen value chain. We deliver innovations in sustainable energy, using our >20 y experience and broad network. If you have an innovative idea in energy transition, Ekinetix can help you realize it. Ekinetix. Realizing Energy Transition.

Ekwadraat Advies BV

Mr Jan Zuidema
Ynduksjeweij 4
8914 CA Leeuwarden
The Netherlands

+31 (0)88 400 05 00
www.ekwadraat.com
info@ekwadraat.com
jzuidema@ekwadraat.com

Ekwadraat guides and advises companies and entrepreneurs in the realization of projects in the field of energy saving, sustainable energy and energy saving.

For hydrogen projects, Ekwadraat provides (among other things):

- feasibility studies;
- subsidy applications;
- permits;
- certification;
- justifications for subsidy obligations and legislation and regulations;
- and PPA's.

Elestor BV

Mr Guido Dalessi
Westervoortsedijk 73, Bldg BF
6827 AV Arnhem
The Netherlands

+31 (0)6 53 72 97 59
www.elestor.nl
guido.dalessi@elestor.nl

Elestor has introduced an innovative electricity storage technology for grid scale applications, based on the flow battery principle. With this, the electricity storage costs (aka Levelized Cost of Storage) are reduced to an absolute minimum. Low cost, abundant active materials (hydrogen & bromine) are used, combined with a patented system design and easy to manufacture compact cells.

This triple cost reduction strategy enables introduction of viable business cases, essential to stimulate the adoption of electricity storage, and thus to accelerate the energy transition. In the end game the technology has all the properties to replace fossil power plants (bi-directional power plants) and has the potential to become the equivalent in large-scale long duration electricity storage of what Lithium ion is today for mobility.

The essential difference of Elestor's technology with conventional batteries is that power (MW) and capacity (MWh) are uncoupled: The Elestor technology is 100% modular and virtually any desired MW-MWh combination can be designed, enabling very cost-effective bridging of long periods during which hardly renewable electricity is generated. With a progressing dependency on intermittent energy sources (sun, wind), this property becomes increasingly distinctive, if not decisive, for the energy transition to succeed. Another unique feature is that the Elestor technology can be integrated in hydrogen infrastructures and electrolyzers, resulting in largely reduced production costs for green hydrogen. This has been concluded and quantified from an in-depth feasibility study, carried out in cooperation with a large European energy corporate.

Eltacon Engineering BV

Mr Riccardo Vitali
Coenecoop 57
2741 PH Waddinxveen
The Netherlands

+31 (0)182 634 100
www.eltacon.com
sales@eltacon.com

Eltacon Engineering supplies gas treatment systems for the Power Industry and Oil & Gas market. Located in The Netherlands, Eltacon is an independent engineering contractor since the year 1987. Over the years we have obtained an excellent reputation in the design and fabrication of tailor made equipment.

For applications on the energy transition and related markets we have supplied several hydrogen treatment and mixing stations. In order to reduce carbon emissions hydrogen can be mixed to the current fuel gas stream to a suitable fuel gas mixture. By means of flowmeter, pressure reduction, measurement of Wobbe index etc. the downstream mixture will be regulated automatically. Eltacon will supply the complete treatment system based upon skid mounted units.

Reference projects have been delivered to (among others) Russia, Poland and Belgium and include natural gas mixing with hydrogen, nitrogen, BOG's and COG's.

For end-users, EPC contractors, turbines manufacturers and other clients Eltacon delivers high quality products with flexible services. The company itself is very flexible and is able to meet the variety of requests from the market.

The same as our clients, we are constantly striving for new solutions that minimize environmental impact. Conversely, they want to maximize productivity while generating a reliable supply of energy. Eltacon Engineering can meet those market needs, and others, thanks to our extensive experience and recognized know-how.

Enablemi

Mr Erik Matien
Friesestraatweg 213
9743 AD Groningen
The Netherlands

+31 (0)85 301 10 50
+31 (0)6 24 58 52 02
www.enablemi.com
info@enablemi.com
erik@enablemi.com

Enablemi is specialized in developing and managing innovation projects, which contribute to the Sustainable Development Goals. Regarding innovation, we believe the technology is at the heart of innovation, but it cannot go without a strong network and good collaboration. Therefore it is our aim to bring together companies, educational and knowledge institutions, governments and end-users (quadruple helix) to accelerate development of new energy technologies.

We have consultants with technical, financial, marketing and project management backgrounds. Who all use their qualities to accelerate the energy transition by coordinating innovations from their origin, the idea, to a plan, to the implementation of a finished product or service.

A snapshot of recent activities showing our involvement with regards to hydrogen technologies:

- Development of several research projects for various consortia involving Eindhoven University of Technology, on the topics of system integration and asset planning.
- We researched the feasibility of setting up a hydrogen boat-racing class in the North of the Netherlands, as an impulse-instrument for the Northern hydrogen economy.
- Involved in consulting, development and project management of multiple PAW (Programma Aardgasvrije Wijken) field labs involving the transition from fossil gas to sustainable alternatives including full or partial hydrogen substitution.
- Arranging funding for startups and companies, specialized in hydrogen technology.

ENERGY B.V.

Ms Katharina Bouchaar
Burg. J.G. Legroweg 45a
9761 TA Eelde (Groningen)
The Netherlands

+31 (0)6 49 05 20 62
www.energy.nl
info@energy.nl

ENERGY is an international engineering consultancy specialised in the development of Green Hydrogen ecosystems, also known as Hydrogen Valleys. We provide the following technical and strategic consulting services:

- Project development
- Technical project design
- Identification & Application for EU Funding
- Project management
- Stakeholder engagement & public awareness
- Capacity building

In cooperation with our international partners, Energy has led the technical design, and supported the development and delivery of several Hydrogen Valleys across Europe such as the BIG HIT project in the Orkney Islands, UK, the HEAVENN project in the Northern Netherlands

and the GREEN HYSLAND Flagship Project in Mallorca, Spain as well as EU Hydrogen IPCEIs. For these multi-million, integrated cross-sector projects we provide technical support, and bring together international stakeholders from the private sector, government and civil society, to develop economies of scale and bring down costs to support the implementation of green hydrogen as a key pillar of the energy transition. In order to create a full-fledged hydrogen economy, we also contribute our more than 20 years of experience in the hydrogen sector to support immersive training and educational programmes. ENERGY is also an active member of the European Clean Hydrogen Alliance and the EU Clean Energy Island initiative.

ENGIE Services Nederland N.V.

Mr Pieter Blok
Kosterijland 20
3981 AJ Bunnik
The Netherlands

www.engie.nl/zakelijk/technische-
dienstverlening
pieter.blok@engie.com

ENGIE is an international leading company in the business of technical services and renewable energy generation. The 6.000 employees of ENGIE in the Netherlands support consumers, institutions and commercial companies to make the change to a more sustainable way of working and living. At ENGIE, we believe that Hydrogen will accelerate the transition to green energy in regions around the world for the benefit of all. Green Hydrogen, produced through the process of electrolysis will provide:

- Decarbonised solutions in mobility on both water and land
- Grid stabilisation services to solve congestion problems
- Storage capacity of intermittent energies

Renewable hydrogen, or hydrogen as a by-product, is a versatile energy vector that can be used to decarbonize many applications. At ENGIE, we offer solutions that are present across the entire value chain: strategy, design, engineering, construction of energy efficient assets, digital platforms, operations, and financing. We are committed to delivering the expected results. Our proximity to our customers allows us to enhance local resources, through production and decentralized Hydrogen storage for local uses.

Are you a company or local authority looking for partners capable of providing you support and advisory to develop carbon free solutions? ENGIE can work with you in your zero carbon transition goals, design integrated turn-key energy solutions that meet your specific needs.

EnTranCe | Centre of Expertise Energy

Zernikelaan 17
9747 AA Groningen
The Netherlands

+31 (0)50-595 65 00
www.en-tran-ce.org
info@en-tran-ce.org
l.j.van.der.velde@pl.hanze.nl

EnTranCe|Centre of Expertise Energy contributes as a learning, practice-oriented knowledge community to a clean, renewable and affordable energy supply. Scientists, students, businesses and authorities all come together at our center of expertise to share knowledge. With our premise people in power, we develop the innovations that are much needed for the energy transition and strengthen the regional knowledge economy.

The multidisciplinary energy research carried out by EnTranCe is mainly on the level of villages, districts, neighborhoods or companies. This is where large-scale energy suppliers and infrastructure meet small-scale, local energy initiatives. And this is where the main breakthroughs will be needed to ensure a successful transition.

Project examples:

- Groene Waterstof Booster: helps entrepreneurs to realize hydrogen innovations and ideas. With a financially attractive scheme (voucher program), we give companies access to a strong and broad network in the Netherlands and unique test opportunities on the grounds of EnTranCe.
- Waterstof Innovatie Netwerk Groningen: a hydrogen facility which companies and organizations can use to accelerate the development of hydrogen techniques. With WING, SMEs can host hydrogen training sessions for staff, conduct physical tests and demonstrate technology.
- Hydrohub MegaWatt Test Centre: a state-of-the-art research facility on the grounds of EnTranCe to optimize and scale up the production of green hydrogen via electrolysis.

ERIKS Nederland

Mr Teun Blik
Toermalijnstraat 5
1812 RL Alkmaar
The Netherlands

+31 (0)88 855 85 58
www.eriks.nl
info@eriks.nl

ERIKS is a specialized industrial service provider that offers a wide range of technical products, co-engineering and customization solutions, as well as related services for all possible hydrogen applications. We help customers in a variety of industrial segments to improve their products' performance and reduce their total cost of ownership. Over 5000 skilled colleagues worldwide serve customers in their original equipment manufacturing (OEM) and maintenance, repair and overhaul operations (MRO).

Our technical know-how is the basis of our specialism. We have built up deep expertise in the areas of sealing & polymer, gaskets, valves & instrumentation, industrial & hydraulic hoses, industrial plastics, power transmission & bearings and tools, maintenance & safety products.

We supply A-brands as well as our own ERIKS products. Besides we have our own departments for engineering, clean manufacturing, assembly, condition monitoring, smart asset management, inspection and field service engineers.

At ERIKS, we stand for doing good business. We value long-lasting relationships with all our stakeholders and contribute to a better and more sustainable society. ERIKS sees hydrogen as an important sustainable energy carrier for the near future. We are working on building this hydrogen fuelled world by combining hydrogen knowledge and products available in all our expertise areas. Our team of hydrogen specialist in the Netherlands is at your service for a customized solution.

E-Trucks Europe B.V.
Mr André Beukers
Leemskuilen 41
5563 CL Westerhoven
The Netherlands

+31 (0)40 204 22 93
www.e-truckseurope.com
info@e-truckseurope.com

E-Trucks Europe develops, produces, sells and rents hydrogen trucks. This concerns heavier trucks with an energy-consuming structure such as garbage trucks, but also vehicles with a crane, hook-arm system, tipper or cooling installation on board. We have been doing this as a family business since 2010 from our workshops in Westerhoven (the Netherlands) and Lommel (Belgium).

In 2013, we launched our proof of concept of a hydrogen refuse truck, which we used to collect waste paper in the city of Eindhoven for a year. Then we took the time to use the experiences of the test period to improve the truck and the hydrogen-electric system, in which we use a fuel cell. We have now delivered zero-emission refuse

trucks to various Dutch cities such as Amsterdam, Breda, Eindhoven, Groningen and Helmond. We also have orders from Belgium, Germany and Italy. There is great interest from almost all countries in Europe for our hydrogen refuse trucks. The European Commission is stimulating this development based on its vision for the future of hydrogen and its Clean Vehicles Directive to green mobility.

As E-Trucks Europe we actively collaborate with more than 70 chain partners. In practical terms, this means a.o. that we develop projects together around new hydrogen refuelling stations. If you are also interested or if you have any questions, please do not hesitate to contact us.

Feenstra
Mr Jan Liefing
P.O. Box 88
8200 AB Lelystad
The Netherlands

+31 (0)320 278 000
www.feenstra.com
info@feenstra.com

Feenstra started in 1947 and is since its establishment a major player in the Dutch market for installation and services of energy supply systems in dwellings. Both for private residential and housing corporations. These energy supply systems consist of solutions for heat, cold and electricity generation and storage. With more than 800 field service engineers, Feenstra is also active in the field of renewable energy solutions and the energy transition. We are front-runners with our partners in the field of hydrogen-projects, for existing and new buildings. For Feenstra's 800,000 customers we are always looking for new solutions whereby sustainable and comfortable living play a central role.

Technology Centre Europe
 Van der Klok Beheer BV
 Technology Centre Europe FINN BV
 Mr P.M. van der Klok
 Veenstraat 11
 9502 EZ Stadskanaal
 The Netherlands

+31 (0)599 622 216
 www.finn.nl
 peter@vanderklok.nl

TCE Van der Klok Beheer and TCE FINN are Netherlands based companies. They started in 2011 to streamline research, engineering, design and manufacturing components to finalize and bring to market innovative, green technologies designed to operate in the current world infrastructures.

This is a brief history summary of the TCE companies including the development of its technologies and products. In addition, an overview of the principles involved, a description of the products, testing protocols and results, and the current and future outlook for the company. This will be followed by sales projections, market development strategies and opportunities, growth needs and recognized challenges.

TCE has many years experience in engineering and production Hydrogen electrolyzers. The TCE Hydrogen System is a patented electrolytic retrofit technology for diesel engines. The product gases (oxygen and hydrogen) are an enhancement additive to the diesel fuel, not a fuel replacement. Using water, the product gas is produced in pods via an electrolytic process near the engine. The amount of gas produced is directed by the integrated computer system and determined by the power load of the engine. The harder the engine works, the more product gas is produced. It is then safely injected into the airstream just prior to combustion. TCE is specialist in machining high precision volume Electrolyser part and Electrolyser assembling.

Fluor

Fluor is a global, publicly traded engineering, procurement, construction (EPC) and maintenance company. We work with clients in diverse industries around the world to design, construct and maintain their capital projects. Fluor has more than 46 years of experience in the hydrogen industry with 50 plants producing a total of more than 2,300 million cubic feet per day of hydrogen, including the world's largest hydrogen production plant at the time. Moreover, Fluor has its own independent electrolysis expertise, and knows the licensors of the basic elements and the developers of the hydrogen electrolyzers applying these technologies. With this knowledge, we can assist clients to select the right application for their objectives.

Fluor in The Netherlands offerings:
 We successfully executed projects in Europe for

more than 75 years using a multi-office execution approach. With Fluor's offices in Hoofddorp, Bergen op Zoom, Geleen and Rotterdam, plus Stork, A Fluor Company, we can support clients with additional technical and project support. Our comprehensive solutions span the entire project life cycle and deliver capital efficiency. Industries served includes Advanced Technologies & Life Sciences, Oil & Gas, Refining, Chemicals & Petrochemicals, Gas Processing & Underground Gas Storage.

- Conceptual Studies, Full Front End Engineering and Design
- EPC and Project Management Consultant (PMC) capabilities
- Zero Base Execution
- Value Improvement Programs
- Organizational Effectiveness
- Integrated Partnership Programs

FME

FME is the Dutch employers' organisation in the technology industry. The 2,200 affiliated companies include technology start-ups, trading companies, small and medium-sized industrial enterprises as well as large industrial conglomerates. Our members are active in the fields of manufacturing, trade automation and maintenance in the metal, electronics, electrical engineering and plastics sectors.

Around 400 members are active in the renewable energy sector and 130 members in the hydrogen sector. Together with our members we coordinate and participate in multiple hydrogen projects in the Netherlands and in an international setting.

FME members employ a total of 220,000 people, have a combined turnover of € 91 billion and their exports total € 49 billion.

We connect and mobilize companies, knowledge institutes, end users and investors in order to find solutions to the global challenge for a greener future. Please connect with us if you are looking for a specific company, product or service. Let's work together!

Frames Renewables

Mr Jordi Zonneveld
Eikenlaan 237

www.frames-group.com
info@frames-group.com

Frames Renewables; the best of both worlds. We are a manufacturer and supplier of renewable energy systems with the flexibility and innovativeness of a start-up and the professionalism and reliability of a renowned industrial supplier. Specialized in design and turnkey supply of installations for hydrogen generation (electrolyser systems), hydrogen storage and hydrogen applications for industry, horti- and agriculture and mobility. At Frames Renewables, we work closely together with our clients to put the unique power of our knowledge, skills and dedication into action in order to offer the best possible solutions.

Frames was founded in 1984. For 35 years we have built a reputation of quality and reliable systems to serve the international oil & gas industry. Driven by our ambition for sustainability,

Frames Renewables was founded in 2010. Our Drive is based on two things.

First of all we feel the responsibility to put our know-how to work to create a cleaner and better world of tomorrow. We know, this sounds fluffy, but at Frames Renewables we don't stop at bold statements and bullshit claims. We develop and deliver solutions that help you reduce CO₂ footprint, turn waste into value or switch to sustainable applications.

The second thing that drives Frames Renewables is our relentless drive to solve problems. With our technical background we accept any challenge and what better way to do this then together with customers on real-life problems.

We collaborate with clients around the world to provide tailor made or standardized plug-and-play products.

Fujifilm

Mr Jeroen van Nunen / Mr Mert Colakoglu
Oudenstaart 1

The Netherlands

www.fujifilm.com
www.fujifilmmembranes.com
jeroen.van.nunen@fujifilm.com
mert.colakoglu@fujifilm.com

FUJIFILM

Value from Innovation

Fujifilm is the world's largest imaging company. Many of Fujifilm's new products find their roots in the company's original product: photographic film. However, our activities nowadays extend over a much wider area than only photographic film. Using the experience and know-how from our imaging history, we have diversified into many new markets. Today more than 70% of the products sold by Fujifilm have been developed over the last decade. These include medical and life science applications. But also highly functional materials have been developed for semiconductor, photovoltaic, automotive, water treatment and gas separation applications. Based on our long standing knowledge in coating thin functional layers onto substrates, Fujifilm is developing membranes for various industries. The first achievements of Fujifilm membrane technology are in the field of water purification

and natural gas treatment. In those business areas, membranes are increasingly competing on price and performance with conventional purification techniques. The development of Fujifilm's ion exchange membranes and gas separation membrane technology takes place at the R&D labs of Fujifilm in Tilburg, The Netherlands and in Tokyo, Japan.

With the growing need for green energy and carbon neutral future, hydrogen electrolyser technologies become an important cornerstone to meet the national, European and global CO₂ reduction targets. Membrane technology will play an important role in this for with several electrolyser types like Alkaline, PEM or AEM. Besides the technology, economy of scale will be required to meet cost down targets for green hydrogen as indicated by the international institutes and governmental roadmaps.

Future Proof Shipping

Ms Marjon Castelijns
Weena 505
3013 AL Rotterdam
The Netherlands

+31 (0)10 800 54 34
www.futureproofshipping.com
start@futureproofshipping.com

Future Proof Shipping

Future Proof Shipping (FPS) offers zero-emissions marine transportation services to enable players across the value chain make the transition to zero-emissions. We are connecting and enabling the entire maritime and green energy value chain, starting with logistics service providers and cargo owners who are ready to take the lead.

As a zero-emissions vessel owner, we are building our own fleet of zero-emissions inland and short-sea vessels, which we offer for charter. With our zero-emissions advisory, we are enabling others to make the transition to zero-emissions through technical, financial, and

commercial support as well as project development and management.

Over the next five years, we aim to build and operate a fleet of 10 zero-emissions inland and short-sea vessels based on long-term time charter contracts to operators, logistics service providers and cargo owners/shippers. We do this by retrofitting existing diesel-propelled ships in partnership with other investors or their current owners who are looking to adopt a zero-emission business model.

One of our current projects is to retrofit the Maas, an inland container vessel to sail 100% on zero-emissions hydrogen fuel.

gAvilar B.V.

Kamerlingh Onnesweg 63
3316 GK Dordrecht
The Netherlands

+31 (0)85 489 71 30
www.gavilar.nl
info@gavilar.nl

gAvilar specializes in gas pressure regulation. We produce regulators and systems (stations) including safety devices for network companies and industry in the world. Mainly still for natural gas but more and more for other gases, because of the energy transition, like biogas (green gas) or hydrogen.

Our products are suitable for hydrogen, confirmed by Kiwa for some specific ones, and are therefore used in several pilot projects in The Netherlands. One of them called H2@Home that is going to test a special regulator in a typical 'home' situation at The Green Village, a test location at the Delft University campus where they installed a small hydrogen network to be able to heat a standard house with hydrogen.

This product closes the hydrogen supply based on external sensors, gas detectors, that are installed in the most critical places inside the house. The project is subsidized by the Dutch Government.

Also for the purpose of hydrogen blending we have developed an electronic volume converter that can calculate the calorific value of the gas. It works with an optional gas quality sensor and enables the invoicing for real energy instead of cubic meters.

GF Piping Systems

Mr Willem Kool
Lange Veenteweg 19
8161 PA Epe
The Netherlands

+31 (0)578 678 222
www.georgfischer.nll
nl.ps@georgfischer.com

As the leading flow solutions provider for the safe and sustainable transport of fluids, GF Piping Systems creates connections for life. GF supplies high-quality plastic piping systems and related products for industrial applications, water/gas utility and building technology. GF connects resources, technology, and people, enabling positive change for a better future. Creating intelligent products and solutions for every flow application makes our world more connected and ensures the safe preservation and transportation of global (fluid) resources.

We offer holistic solutions for the hydrogen economy: from hydrogen production to storage and transport/distribution to utilization. With many years of experience in the field of gas

supply and industrial water treatment we have a comprehensive portfolio of high-quality and reliable solutions for hydrogen technology. For our product lines ELGEF PLUS and MULTI/JOINT 3000® PLUS system we have already received the KIWA certificate AR214 *Suitability of hydrogen gases* and thus offer a complete range for hydrogen distribution.

In the field of hydrogen production, GF Piping Systems can create added value thanks to its broad product portfolio and many years of experience in water treatment, cooling applications and customer-specific product design and prefabrication, which are all efficiency-increasing, weight-saving and corrosion-resistant.

Platform Groene Hart Werkt!

Ms Yolanda Ledoux
P.O. Box 13
2400 AA Alphen aan den Rijn
The Netherlands

+31 (0)6 46 97 32 05
www.groenehartwerkt.nl
yledoux@alphenaandenrijn.nl

Platform Groene Hart Werkt! (PGHW) is the regional platform for circular economic initiatives in 'The Green Heart' of the Netherlands. In co-operation with ten townships in the middle of the country PGHW inspires, connects and facilitates entrepreneurs, start-ups, council representatives and students in all circular economy aspects. A major part is dedicated to the hydrogen business.

Building a sustainable economic future means co-operation in many ways. By facilitating and sharing knowledge between partners in our network we contribute to a proper circular economy for our region and country. The hydrogen business is on top of our list. Not only

we contributed to some concrete projects but we also work together with an innovation centre and university students on a hydrogen project in the automotive industry: the 'Hydrogen Education Bus'. An animation movie about the meaning and application of hydrogen was made in co-operation with a consultancy and engineering firm and issued by us. This year together with Provincie Zuid-Holland we started a 'regional hydrogen program'. Purpose of this program is to stimulate the hydrogen economy and the use of zero emission energy carriers in our region.

Contact us to see if we can help you with your circular and hydrogen business and ideas!

Groningen Seaports

Mr Robert van Tuinen
Handelskade Oost 1
9934 AR Delfzijl
The Netherlands

+31 (0)596 640 400
www.groningen-seaports.com
info@groningen-seaports.com

Groningen Seaports: Hydrogen hub of Europe. Groningen Seaports is the port authority for the port of Delfzijl, Eemshaven and the adjoining industrial sites. We provide the complete package of port services to industrial and commercial clients. In addition to this, the Eemshaven plays a central role in the development of the energy-related industry.

In this capacity, Groningen Seaports supports and strengthens the production of green hydrogen. There are multiple hydrogen projects in development within the Delfzijl and Eemshaven area. These are projects relating to the construction of electrolyzers and hydrogen plants, the creation of specific port facilities, the development of a plastic pipe system

('backbone'), but also the use of hydrogen in public transport and the development of hydrogen filling stations. Groningen Seaports is therefore fully committed to innovation and offers space and facilities for test centres, start-ups, scale-ups, pilot and demo plants.

Europe's biggest green hydrogen project starts in Groningen. A consortium of Gasunie, Groningen Seaports, Shell Nederland, RWE and Equinor is working on the realisation of the NorthH2 project: the production of green hydrogen using electricity generated by a gigantic offshore wind farm. The amount of green hydrogen produced, initially at Eemshaven and later possibly also offshore, is expected to be around 800,000 tonnes a year by 2040.

H2ARVESTER

Mr Marcel Vroom
Peizerweg 97
9727 AJ Groningen
The Netherlands

+31(0)6 22 46 51 61
www.h2arvester.nl
info@h2arvester.nl

H2arvester is a circular energy system for a local and/or regional economy: local-for-local & scale-by-scale. Regional employment is leading and is in line with the concept of the 'short-chain': local producers add value to the environment and short chains help to realise the ambitions for a circular system. This is a unique opportunity to contribute to the energy transition to sustainable energy and a sustainable economy at a local and regional level, in addition to the large-scale production of energy.

H2arvester is a partnership for research, product development and realisation of movable and autonomous systems for the generation of solar energy and the production, storage and applications of electricity and hydrogen.

H2arvester was founded by L'orèl Consultancy from Groningen and npk design from Leiden. L'orèl Consultancy, npk design and LTO Noord are the inventors of the H2arvester system and have all the qualifications for energy research, technical development, facilitating pilots and outsourcing the production. H2arvester won the RVO competition 'Solar power in agricultural areas' at the end of 2017.

Selected Dutch (and preferably local) agricultural mechanisation companies are engaged for the production, installation and maintenance of the mobile solar systems. For the realisation of the electrical systems, hydrogen production and storage systems, we collaborate with system suppliers and market leaders in these industries.

H2 Circular Fuel BV

Mr Hans te Siepe
Fabrieksweg 4
8015 PT Zwolle
The Netherlands

+31 (0)6 51 54 12 31
www.h2cif.nl /
www.h2cif.com
hans.tesiepe@h2cif.nl

H2 Circular Fuel is a Dutch company. It has specialized in building applications to extract H_2 from H2Fuel ($NaBH_4$), reducing it to $NaBO_2$ and to regenerate this Spent Fuel back to $NaBH_4$.

H2Fuel is a patented technology for the production, storage and release of hydrogen. For its production, no electrolysis is required. The hydrogen is stored under normal atmospheric conditions in a powder. Release takes place without additional energy, using ultrapure water. Not only is one hundred per cent of the hydrogen stored in the powder released but, as a bonus, the same amount of hydrogen is released from the water, as well.

In dry powder form, the hydrogen can be stored for an unlimited period, is in energy terms the maximum attainable result, has no safety risks and, throughout the production process from production through consumption, features no harmful emissions at all. Once the hydrogen has been issued, the residual substances can be returned to the powder state with hydrogen stored in them: this makes H2Fuel the world's first circular fuel. H2Fuel can be deployed in all sectors of society and the economy and, as a result, forms by far the preferable alternative to both fossil fuels and other sustainable alternatives.

H₂O Systems Holland BV

Dr. Jos M.C. Plas
Blondeelstraat 96
3067 VA Rotterdam
The Netherlands

+31 (0)6 81 13 36 26
www.h2osh.com
info@h2osh.com

H₂O Systems Holland (H₂O) designs and produces systems that generate 'Warmth from Water'. Hydrogen extracted from water is widely seen as the most valuable alternative fuel.

H₂O introduces the 'next generation' hydrogen powered home heating systems. The system converts water into hydrogen by low power electrolysis and burn the hydrogen to produce heat.

H₂O systems are designed for consumer use in single home units and in the future also available for multiple units and apartment buildings. The system is developed as an alternative for the currently used fossil fuel powered systems. The system is fully emission (CO₂) free.

The system's unique points are being a 'closed system' that 'on location' and 'on demand'

generates hydrogen. Burning hydrogen makes sure the system generates energy and subsequently supplies heat for house warming and tap water.

The critical elements 'closed' and 'on location' imply no transport, no infrastructure nor any storage of gas is required. Dangerous and expensive transport and storage are completely eliminated. The key element 'on demand' implies that the H₂O systems generates hydrogen 'on location' and 'on call' when the consumer turns on the system needing heat or heated tap water. This high potential research company holds the Intellectual Property (IP). Currently worldwide is no comparable system available. The Company's potential is based on international expansion as well as financial performance, shareholder and stakeholder value.

H2Storage B.V.

Mr André Molengraaf
Prinses Margrietplantsoen 33
2595 AM The Hague
The Netherlands

+31 (0)6 25 19 72 51
www.h2storage.nl
info@h2storage.nl

H2Storage is a 100% Dutch company with experienced executives (from the energy, composites, aviation and automotive sectors) as the driving force behind this successful start-up. By combining our years of experience gained from the aforementioned sectors we developed a viable solution for long term energy storage. We have fulfilled an essential step towards a hydrogen economy by introducing the use of high pressure lightweight composite storage tanks from recyclable material to store hydrogen. Now we have an alternative solution to store more hydrogen under high pressure in the whole supply chain, from production all the way till the end user. This can be realized by type 4 composite cylinders with NWP of 700 bar. Portfolio of H2Storage consists of single

lightweight composite cylinders and standard 10-45ft container containing tenfold(s) of these cylinders including the essential appendages for hydrogen storage. The solution to store locally, transport and use locally (e.g. an off-grid (emergency)generator) large quantity of hydrogen. These products are developed according to the International (ISO/ADR/ADN/TPED) and European standards (R134) for the automotive, shipping, stationary and transportation industry.

Currently we are fully involved in, among other things, the SHIP2DRIVE consortium, the realization of a sustainable inland vessel and the realization of a sustainable excavator. Naturally, our role is to realize the most efficient storage and transport of hydrogen systems.

H2Trac BV

Mr Paul van Ham
Westervoortsedijk 73 GE-29/30

The Netherlands

+31 (0)900 428 72 28
www.h2trac.com
info@h2trac.com

For Farmers, the soil is their best friend, a gift that needs to be nurtured. That's our belief too, and that's why we help farmers with innovative ways to keep the soil healthy and to maximize their yields at the same time. By developing machines that enable Controlled Traffic Farming and that run on electricity.

Not just another tractor, but a versatile electric powertrain with excellent traction, based on a smart modular chassis, super sight, adjustable track width, ultra-short turning, very fuel-efficient and with GPS 2 cm precision steering. We call it the EOX, and it gives you up to 20% higher yield with lower input and, equally important, a healthier soil. Just by letting the soil do the work.

H2Trac develops and builds electric tractors for the professional market. At the moment 6 people are working full time on the development and

construction of the EOX 175. EOX 175 is the first professional electric tractor on the market and ready for series production. EOX 175 was developed by Paul van Ham. Together with his brother Peter-Jan and an investment company, there is an ambitious plan to build five tractors in 2021 and 40 in 2022. H2Trac is located in Arnhem. The new EOX -175 is available with three different energy solutions: a euro6 diesel-range extender, a version that runs entirely on batteries (capacity 6-8 hours) and (from 2022) completely on hydrogen.

A healthy soil was the starting point for our machines. Together with 7 Dutch arable farmers, we have listed all requirements and developed the most innovative tractor since decades. And now we are working with farmers and hydrogen suppliers to organize a local hydrogen network that fits agricultural use.

HAN University of Applied Sciences

HAN H2Lab frontoffice
Ruitenberglaan 26
6826 CC Arnhem
The Netherlands

Hinicio

Mr Thomas Winkel
Boulevard Saint-Lazare 4-10
B-1210 Brussels
Belgium

+31 (0)6 14 53 72 04
www.hinicio.com
thomas.winkel@hinicio.com

Hinicio is a strategy consulting firm specialized in sustainable energy, with areas of expertise including hydrogen, renewable energies, energy storage and transport. Since 2007 Hinicio has developed a leading European competence centre on hydrogen and fuel cells. Our team collectively combines many decades of experience in the sector, including working in senior positions with leading industry players.

With offices in the EU, China and Latin America and an extensive partner network in Australia, Canada, USA, Korea, Japan, Hinicio supports customers globally on topics ranging from strategic assessments, innovation and marketing strategies, business plan appraisal, innovative business models development, market and techno-economic feasibility studies, due diligence, etc.

Hinicio has been working for players involved at every step of the value chain, from upstream (industrial gas companies, utilities, O&G companies, TSOs/DSOs), to chemical companies, equipment manufacturers (electrolysers and fuel cells), car makers and suppliers, fleet owners, public and private investors as well as industry associations and public institutions at all levels.

Over the years, Hinicio has developed world-class expertise on the development of infrastructure, a unique proprietary industry database on hydrogen and transport technologies, in-house modelling tools as well as knowledge on the (upcoming) regulatory framework.

HOWDEN

Mr Gerald Peppelman
Havelandseweg 8a
6991 GS Rheden
The Netherlands

+31 (0)26 497 52 00
www.howden.com
gerard.peppelman@howden.com

Howden is one of the world's leading manufacturers of air and gas handling solutions. We address the challenges of the energy transition with highly innovative solutions to contribute to the deployment of renewable and low-carbon hydrogen. Hydrogen compression is a key aspect in hydrogen applications to move hydrogen efficiently across the value chain from production to consumption. With over 100 years of experience in the compression of hydrogen, we have developed highly innovative solutions for our customers, optimising the availability, reliability and installation footprint, while reducing the total cost of ownership of operations. 'Advanced compression solutions across the hydrogen value chain' says it all. Whether gasification or electrolysis are involved, we combine innovative technology and worldwide engineering expertise across the hydrogen value chain, from the world's largest centralized opera-

tions to smaller scale decentralized applications. Howden compression technology, based on reciprocating pistons and diaphragm compressors, enable large volumes of hydrogen and associated pressures to get the energy values needed. Howden designs and manufactures compression solutions as individually engineered packages to meet the specific demands of unique applications and requirements. Nevertheless, production and life cycle follow our established standards to meet with speed of delivery and life cycle of the compression solutions' requirements. Howden's highly innovative compression solutions can be found at the heart of leading clean hydrogen projects around the world, playing a key role in supporting the global energy transition. We have successfully supplied globally state of the art compression technologies to a large number of projects.

Hy-Cell Co. Ltd.
Mr Wybe Kerkhof
Westervoortsedijk 73
6827 AV Arnhem
The Netherlands

+31 (0)6 27 18 51 76
www.hy-cell.com
info@hy-cell.com

Hy-Cell is a fuel cell stack and system development partner, with a design team based in The Netherlands and a 20,000m² high-tech manufacturing and R&D site in China. We are specialized in the design, testing and manufacturing of heavy-duty fuel cells for trucks, trains, busses, marine and energy storage solutions. Hy-Cell can provide cell plates, fuel cell stacks, fuel cell systems and do the fuel cell system integration into your product or provide assistance for system integration. Our experience of over 15 years, plus our holistic approach enables us to make design and manufacturing decisions to minimize the Total Cost of Ownership (TCO) of your application, while guaranteeing high quality, durability and safety.

Our Design & Sales office is based in Arnhem, the Netherlands. From here we design fuel cells and serve our Western customers. Our 20,000m²

high-tech manufacturing site is located in Jinan, China. From here we develop, produce and test fuel cells and serve our Asian customers. Our design team covers all steps of the fuel cell development, allowing us to efficiently support you with the design of the cell plates, stacks and systems. Our experienced production team verifies our designs in-house and produces your high-quality fuel cells and components with state-of-the-art production and testing equipment.

Hy-Cell significantly invested in testing equipment and uses a high-end short and full stack test station up to 200 kW. The test stations, including software, are designed in-house and have extensive safety features to ensure stack and operator safety. Hy-Cell's ISO 9001 compliant plant is equipped with high-tech international test equipment.

Hydrogen Powered Solutions BV

www.hydrogenpoweredolutions.com
info@h2ps.nl

We at Hydrogen Powered Solutions (HPS) are convinced of the possibilities of hydrogen to accelerate the achievement of the environmental targets for 2030. We offer solutions and products with hydrogen technology for financially sound conversion and sustainability of heating and combustion/incineration installations or plants. After several years of intensive R&D work, adjustment and assessment, the time has come that HPS can actively contribute to the current environmental problems. The developed hydrogen technology coupled with a combustion appliance such as a gas wall-mounted boiler or add-on burner offers a wide range of options for drastically reducing natural gas consumption and significantly minimizing the CO₂ emissions simultaneously. The Hydrogen Power Unit (HPU) developed for this purpose, in combination with a

combustion appliance, is capable of minimizing natural gas consumption by up to 50%. The new technology offers a wide range of optional and on-demand operational capabilities for the HPU system to meet all requirements. The system is robust, compact, safe and requires no end-user intervention. It is fully automated and can be monitored in real time by H2PS. With remarkable and significant performance and efficiency, you can ensure that natural gas consumption is minimized by up to 50%. At present, the HPU is extensively available and finds its way into housing associations, office complexes. The HPU is committed to further developing and improving its technology to be compatible with all residential or industrial facilities with the best possible expectations.

TU Delft Hydro Motion Team

info@hydromotionteam.nl

The TU Delft Hydro Motion Team is one of the Dream Teams at Delft University of Technology. Our team consists of 25 ambitious students from eleven different fields of study. Our team is fully committed every year to show the applications of our advanced technologies at spectacular races. For over 15 years, we have been designing, building and racing cutting-edge boats driven by sustainable tech. Each year the team builds a new boat made in conjunction with the knowledge of industry experts and the experience of alumni.

With our project we want to work together with the maritime sector to accelerate the transition to green energy. There is still a lot to be gained in this sector and by thinking together with the

maritime world and innovating in the field of sustainability, we contribute to a better and greener future. Because only together we can make a change.

This year, we optimize every part of our boat for the use of hydrogen. We will design our boat to excel in endurance, speed and manoeuvrability. To put our boat to the test, we will participate in the Offshore Competition of the Monaco Energy Boat Challenge to become world champions. Our team shows what a multidisciplinary team of driven students can achieve with the right mindset and by combining their strengths. Being the engineers of the future, we take the next step towards a sustainable world.

Hydron Energy

Mr Sander ten Hoopen
Energieweg 15
3771 NA Barneveld
The Netherlands

+31 (0)34 240 31 66
www.hydron-energy.com
info@hydron-energy.com

Hydron Energy is a technology innovator that develops and manufactures advanced electrolyser stacks for hydrogen production equipment.

Hydron's cutting edge Polymer Electrolyte Membrane Water Electrolyser (PEMWE) technology offers an efficient, cost effective and reliable way to produce hydrogen (and oxygen) out of water and electricity.

Our technology delivers high performance and efficiency, with an exceptional small footprint. Hydron's electrolyser stacks feature a wide operating range and excellent dynamic response, making the technology ideally suited to be coupled to intermittent renewable energy sources. Because of the application of state-of-the-art membranes, hydrogen can be produced at high pressure and purity.

The company's product portfolio consists of a range of electrolyser stack platforms that can be used in various applications: from flexible screener cells for materials development, to robust large capacity stacks for application in industrial processes.

HyET Hydrogen B.V.

Mr Marco Betting
Westervoortsedijk 71K
6827 AV Arnhem
The Netherlands

+31 (0)26 362 39 44
www.hyethydrogen.com
sales@hyethydrogen.com

HyET Hydrogen

HyET Hydrogen is an international company based in Arnhem, the Netherlands. HyET Hydrogen is a leading SME in the field of electrochemical hydrogen compression, extraction and separation, also referred to as Hydrogen Processing Technologies. HyET Hydrogen was founded in 2008. HyET has introduced the first commercially viable Electrochemical Hydrogen Compressor (EHC) in 2017. HyET enters partnerships with key stakeholders all over the world to develop products with a focus on application within the Hydrogen value chain. HyET's headquarters are located in Arnhem, the Netherlands and is run by an experienced interdisciplinary team. HyET Hydrogen had expanded its focus to the USA with a subsidiary, HyET Hydrogen LLC based in Colorado. HyET's Electrochemical Hydrogen

Compression (EHC) is completely silent, safe, cost effective, energy efficient and has no moving parts. The fact that the electrochemical compressor has no moving parts is also advantageous because it avoids wearing of parts which reduces the overall maintenance costs. The absence of moving parts contributes significantly to the reduction of maintenance costs and the prevention of damage, when compared to mechanical compressors. HyET's Electrochemical Hydrogen Processing technologies can significantly lower CAPEX and OPEX in the H₂ supply chain for many existing industrial H₂ markets as well as for the upcoming FCEV markets. Besides compression of Hydrogen, HyET Hydrogen also developed a technology which can extract and purify Hydrogen from mixed gas streams.

HYGEAR

THE GLOBAL HYDROGEN SOURCE

Our company is built on a vision that Hydrogen will be the fuel of the future. Once this happens, the current supply method of central hydrogen production and delivery by road transportation is no longer an economically viable option.

At HyGear, we developed technologies to generate and recycle hydrogen at the end-users' site. We have been applying these technologies in many different industrial applications over the past decades offering advantages in reliability, cost, and environmental impact.

In years to come, we will continue to focus on these industrial applications as well as grow our install base in hydrogen energy applications and thus become an enabler for a clean and sustainable future.

Most industrial gases in the bulk segment are produced at central locations and delivered to the end-users by road transportation. This method of supply is inefficient and expensive as the amount of gas that can be delivered is bounded by the limitations of the storage capacity on the trailers and distances are often large.

At HyGear, our focus is to downscale gas generation and purification systems to a size that matches the needs of bulk users. This creates independence from suppliers and also the limitations dictated by existing sources. Our technologies guarantee a major step forward in a more efficient supply of industrial gases and can act as enablers for the upcoming transformation of our energy system towards hydrogen as a carrier.

HyMatters Operations B.V. /
HyMatters Research & Consultancy B.V.

HyMatters

Are you looking for a sustainable solution to correct a mismatch between supply and demand of energy? Or do you want to use hydrogen as a sustainable fuel? HyMatters helps you to become more sustainable with an integrated approach between energy production, energy use and grid capacity using hydrogen.

By analysing your specific situation, we will arrive at a hydrogen solution that is in line with your local energy infrastructure. We develop this complete solution for you. From concept to design, up to and including realisation.

Wondering if hydrogen is the energy solution for you? No matter where you are in the process, we can assist you. With these services we offer you customised solutions.

- Hydrogen Course
- Feasibility Study
- Engineering and Implementation
- Monitoring

HyMatters helps you achieve your sustainability goals with an integrated approach between energy production, storage, use and grid capacity using green hydrogen. We can help you achieve your goals via hardware-based, modular solutions, tailored to your needs. We can produce high quality hydrogen, but we can also stabilise your local grid while doing so. We can manage Power Quality issues, for instance through automated dynamic voltage control.

We service a wide arrange of customers like industrial clients and hospitals.

HyMove B.V.
Mr T.P.M. Hendriks
Westervoortsedijk 73
6827 AV Arnhem
The Netherlands

+31 (0)6 21 17 44 46
www.hymove.nl
info@hymove.nl

HyMove is builder and integrator of the most efficient fuel cell systems and integration techniques for heavy-duty applications such as buses in city and regional transport, trucks, construction equipment and inland vessels.

These systems work on hydrogen and oxygen from the air and supply electricity and heat. They only emit water. Due to their high efficiency and long lifespan, the HyMove systems are suitable as the 'heart' of hydrogen applications in transport, construction and shipping. The nitrogen reduction achieved through the use of hydrogen fuel cell systems in vehicles and construction equipment is 100%.

Theo Hendriks is mainly concerned with the question how zero-emission applications can be implemented. This is usually not a question of technology or money, but of bringing together the entire supply chain of committed parties. The transition is not a matter of an individual, it is a change to do together.

The technology that HyMove uses is now mature, ready for the market and can be rolled out. HyMove now has a number of years of experience. These systems have been proven in buses for urban and regional transport in Gelderland. Ten buses are under construction for Münster in Germany.

Hysolar

Mr Jos Boere / Mr Robert Scholman
Groningenhaven 7
3430 BB Nieuwegein
The Netherlands

+31 (0)30 606 96 00
www.hysolar.nl
info@hysolar.nl

Hysolar, founded in 2019, focuses on green hydrogen for mobility. In our vision, green hydrogen is a key element in a circular economy. Relying on practical experience in combination with scientific know-how we develop green hydrogen ecosystems, where continuous innovation is crucial. Hysolar activities are threefold:

1. The supply of green hydrogen as of 2021 in Nieuwegein (NL) by opening our public 350 and 700 bar Hysolar / Greenpoint hydrogen refuelling station.
2. Using local solar power and green electricity from the grid, Hysolar realises a 2-2,5 MW electrolyser to supply 250 tons of green hydrogen starting Q2 2023. To make the electrolyser an integrated part of the energy system, it will be utilized for the dispatchable

capacity of the national grid operator.

Moreover, the residual heat will be used locally to reduce the consumption of natural gas.

3. Innovation and consultancy activities to support businesses, local governments and other parties in their transition towards green hydrogen.

Over the years we have helped municipalities and businesses with our innovation and consultancy activities. We've developed solutions in which grid congestion is solved by producing green hydrogen and we work closely together with an inland shipping company to decarbonize their activities. Last but not least our innovative 'dual fuel' solution has led to the launch of the first tractor on hydrogen. We are busy applying this innovation to other heavy machinery such as excavators.

Hystream B.V.

Mr Joep Coenen
Kanaalweg 14 Gebouw A5
3526 KL Utrecht
The Netherlands

+31 (0)6 11 14 91 85
www.hystream.nl
info@hystream.nl

Hystream develops and realizes state-of-the-art local green hydrogen solutions. Our objective is to decarbonise society by realising end-to-end green hydrogen solutions for mobility, such as transport, cars, inland shipping and utility buildings. As such, we are committed to realize and manage an emission-free hydrogen value chain that simultaneously creates value for all stakeholders involved in this value chain. Our collaboration with local partners and stakeholders is central to this. In this way we can accelerate the energy transition locally and make industry and mobility more sustainable. Our partners can provide all the necessary elements of the hydrogen value chain.

Our solutions resolve grid congestion problems, provide zero-emission construction power and make hydrogen available on-demand at different locations. Examples of current projects are hydrogen-based stable supply of green electricity whenever and wherever required, the local production of green hydrogen from solar or wind power and the realization of filling stations for the distribution of green hydrogen for cars, busses and trucks in areas where hydrogen is not yet available.

Hystream aims to realize a local public network of hydrogen production and distribution points for different types of users.

HYZON Motors Europe B.V.

www.hyzonmotors.com
europe@hyzonmotors.com

HYZON

As an industry, transportation was responsible for approximately 26% of worldwide CO₂ emissions in 2018. The mandate is clear: we must transition these vehicles to clean energy to protect the planet and future generations.

That's where Hyzon comes in. Headquartered in Rochester, N.Y, with U.S. operations in the Chicago and Detroit areas and international operations in the Netherlands, Singapore, Australia and China, Hyzon is a leading global supplier of zero-emissions hydrogen fuel cell powered commercial vehicles, including heavy-duty trucks, buses and coaches. Hyzon makes it easy for private and public fleet operators to

transition to zero-emission vehicles, helping them meet ambitious environmental standards and contribute to global decarbonization. Hyzon sets the pace for global zero emission trucking.

Hyzon Motors Europe office and production location are located in Winschoten, just outside Groningen (The Netherlands) and close to the German border. At this location Hyzon produces the Hyzon's HyMax series for the European and Australian market.

Visit www.hyzonmotors.com for more information.

Kenter B.V.

6921 RL Duiven
The Netherlands

+31 (0)88 191 15 55
www.kenter.nu
info@kenter.nu

Kenter is a Dutch energy solutions provider, currently serving over 30,000 customers in the Netherlands. Specialized in metering services, energy infrastructure and electric vehicle charging solutions, we help organizations to optimize their energy use and adopt innovative solutions to aid the process.

As a leading energy solutions provider, we're also specialized in hydrogen metering. This can be applied in various ways and with different purposes. For example, when you want to know the exact amount of produced hydrogen.

Kenter is at the heart of today's fast-moving energy world and is ready for a challenging future. As an independent part of Alliander, we are an experienced and knowledge-intensive partner. From the local bakery to large multinationals and from sport clubs to municipalities. They can all count on the expertise of more than 300 specialists working at Kenter.

We provide a complete package of energy services and metering solutions based on an up-to-date understanding of the market and innovative technologies. Would you like to learn more? Contact us by calling +31 (0)88 191 15 55 or send an e-mail to info@kenter.nu.

Kiemt

Mr Jochem Garthoff
Westervoortsedijk 73 - HB
6800 AW Arnhem
The Netherlands

+31(0)26 446 14 69
www.kiemt.nl
garthoff@kiemt.nl

kiemt

Kiemt is a triple helix network organization located at Industriepark Kleefse Waard (IPKW) in Arnhem. As Energy Valley Bureau, Kiemt accelerates the development of innovations for energy transition and circular economy in the Eastern part of the Netherlands.

More than 200 members are participating in this active innovation network, consisting of knowledge institutions, SME's (start- and scale-ups) and (semi-)governmental organizations. These members are frontrunners in the field of energy and/or circular economy. Kiemt accelerates opportunities by scouting and screening of innovations, connecting these with the triple helix network and initiating projects and programs. By doing so, innovative, viable and sustainable products, services and companies arise from their original ideas.

Kiemt programs and organizes a regional hydrogen cluster, consisting of more than 30 SMEs (start-ups and scale-ups) and knowledge institutions. The aim of this cluster is to stimulate innovations for the further development of the East Netherlands as a hydrogen technology research & development region. This facilitates the implementation of hydrogen technology on a large scale and strengthens the regional economy at the same time.

The cluster focuses on:

- Starting up and accelerating initiatives;
- Matchmaking of parties to value chain(s);
- Exchange of knowledge and information.

Kiwa

www.kiwa.com
hydrogen@kiwa.com

Kiwa is a world-leader in Testing, Inspection and Certification (TIC) , Training, Technical Advisory and Consultancy. With a background of more than 90 years in water, energy, and gaseous fuels Kiwa is a knowledge institute, and international quality authority.

Our services in the field of renewable energy production, power2X and hydrogen (low & high pressure) cover the complete value chain: Generation, Transportation, Distribution, Storage and Application of Hydrogen and Sustainable Fuels.

Key Services:

- Wide range of Solar and Hydrogen Testing Facilities 17025 accredited;
- Inspections of Solar, Wind, Sustainable Fuels and Hydrogen installations, including pre-compliance and consultancy inspections;
- Testing, assessment and certification of components and systems like electrolysers, fuel cells, appliances, pressurized tanks and components, pipes, valves and fittings;
- Consultancy supporting R&D programs, tecno-economic feasibility studies, support in innovation and transition, technical due diligence, business and investments planning, pilots design and development, risk analyses, material research, failure analyses, etc;
- Training and qualification of personnel working in the renewable energy production and hydrogen fields.

KLINGER The Netherlands

Mr Cor van der Hoek
Nikkelstraat 2-4
3067 GR Rotterdam
The Netherlands

+31 (0)10 455 75 55
www.klinger.nl
info@klinger.nl

KLINGER is the world's leading manufacturer and provider of industrial gaskets and valves. Formed in 1886 as a family enterprise, the pioneers in gasket technology today are a globally active Group of manufacturing, sales and service companies that offer unique know-how and competent on-site consultancy services.

Our know-how, which in the meantime spans more than 130 years, enables us to be fully committed to supplying not just products, but tailored state of the art sealing, fluid control and fluid monitoring solutions, using the latest design and pilot technology.

KLINGER products contribute to the safety of transport, storage and processing of hydrogen. KLINGER gaskets and valves will keep the connections of constructional elements leak

tight and impermeable, even for the extremely small molecules of hydrogen. Leak tightness is essential when handling hydrogen. After all, it can ignite within seconds when coming into contact with oxygen and a spark. All KLINGER gaskets have been tested by TÜV with regards to hydrogen and are recognized as particularly high-quality seals. From the revolutionary development of the compressed fiber gasket to the advanced sealing material technology and high tech valve solutions of today, development, innovation and problem-solving abilities have always been the pillars of our philosophy. Our products are 'trusted. worldwide.' as a result of their high reliability, long life cycle and extremely low total cost of ownership.

Koedood Marine Group

www.koedood.nl
hydrogen@koedood.nl

The Koedood Marine Group observes an increasing demand for electrification and sustainable inland shipping. Our group is comprised of several specialized companies centred around the development and implementation of future proof marine power trains. Koedood is the largest dealer of Mitsubishi engines in The Netherlands. With an innovative heart Koedood leads the development in the inland marine sector by example. Our group has knowledge stretching far wider than the inland marine sector alone and we are active in all markets involving maritime activities. Koedood now exists for over 40 years and has always been a driving force in the Dutch maritime industry.

Our mission is to maintain a leading role in sustainable technology for the maritime sector. With more than an decade of experience with hybrid systems and almost half a century of experience in the Dutch marine sector, our hydrogen technology can be seamlessly integrated in modern hybrid vessels. Our vision is to develop systems that can sail completely zero-emission on longer routes.

We seek strategic partners and contribute to several hydrogen projects and consortia. In the role of system integrator we take part in the Rh2ine consortium and actively develop hydrogen enabled drive train systems to further green the European waterways.

Koninklijke Van Twist
 Mr Martijn Friederichs
 Keerweer 62
 3316 KA Dordrecht
 The Netherlands

+31 (0)78 632 66 44
 www.kvt.nl
 mfriederichs@kvt.nl

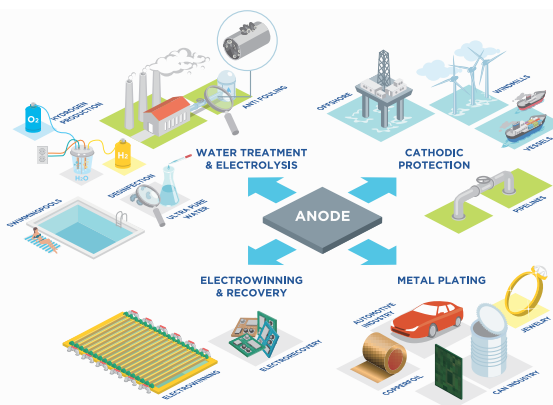

Royal Van Twist is a family owned business with a history of more than 180 years. 80 years ago the distributorship for Perkins Engines was acquired. Based on the strong core engine Royal Van Twist started the development for gas fuelled engines 40 years ago. This resulted in the approval as Perkins official gas partner in 2014. The current gas engine range goes from 10 to 1200 kilowatt electrical.

During the 40 years of history we developed a great amount of knowledge with a large variety of gasses as Natural gas, Biogas and LPG. The last 10 years we have focused on gasses with a low methane number, mainly for thermal waste recycling processes. During these processes waste as tires, plastics, MDF and even medical waste is heated to high temperatures resulting in products like nafta (raw gasoline), carbon black, active coal and ash. As by-product a waste gas is

produced. This is used as fuel for the gas generator providing electricity to the grid). As low methane gasses could cause serious engine damage we have developed our own engine control systems. The systems are tested in our state of art in-house test facility. As hydrogen could be considered as a gas with a low methane number we asked ourselves if it would be possible to use hydrogen as a fuel for our engines. After a positive conclusion from the feasibility study during the first half of 2019 we started the technical design at the end of 2019. The design includes a custom-built hydrogen injection block which is connected to the inlet manifold of the engine. The hydrogen engine was first started in October 2020. The first pre-production engines will be available for trail applications in the first quarter of 2021. Full production will start by the end of 2021.

MAGNETO special anodes B.V.
 Mr Matti M. van Schooneveld, Ph.D.

 magneto-special-anodes/
 sales@magneto.nl

MAGNETO special anodes strives to be the best designer, producer and supplier of titanium anodes for electrochemical applications. Inventor and proud supplier of high-quality titanium anodes and electrochemical cells for a variety of applications, MAGNETO has been catering to the electrochemical industry for more than six decades. We aim to ensure our customers are satisfied with their anodes.

The right anode is key for electrochemical applications. Selecting the correct one can lead to substantial cost savings. MAGNETO understands that your application – whether it's metal plating, water treatment, electro winning, cathodic protection, or hydrogen production – has its unique features. That's why we pride ourselves on our ability to manufacture custom

electrodes that meet your requirements, regardless of the specifications. In fact, we're well known in the industry for providing the optimal anode for every individual application.

A green economy will increasingly make use of hydrogen produced by water electrolysis. It is expected that water electrolysis will play a pivotal role in the future energy landscape. MAGNETO produces several components for PEM electrolyser systems in a cost-efficient and flexible manner.

We're committed to designing, manufacturing and supplying titanium anodes for hydrogen production systems that fit your needs, withstands the test of time and reduce your operational costs.

Marsh Netherlands

Mr Hendrik van Duijn
Conradstraat 18
3013 AP Rotterdam
The Netherlands

+31 (0)6 20 36 44 08
www.marsh.nl
hendrik.van-duijn@marsh.com

Marsh is a global leader in insurance broking and risk management. In more than 130 countries, our experts in every facet of risk and across industries help clients to anticipate, quantify, and more fully understand the range of risks they face. In today's increasingly uncertain global business environment, Marsh helps clients to thrive and survive. We work with clients of all sizes to define, design, and deliver innovative solutions to better quantify and manage risk. To every client interaction we bring an unmatched combination of deep intellectual capital, industry-specific expertise, global experience, and collaboration. We offer risk management, risk consulting, insurance broking, alternative risk financing, and insurance program management services to

businesses, government entities, organizations, and individuals around the world. Marsh JLT Specialty provides flexible project risk management and insurance placement services for the full value chain of hydrogen investments, in combination with other renewable energy sources and Carbon sequestration if required. Our service framework will enable control over risk and insurance issues and is supported by hydrogen and other renewable energy risk engineering capabilities to provide a seamless project to operational risk transfer product that will enhance bankability of your projects. The product will provide comprehensive risk protection around your planned balance sheet.

Mechatest Sampling Solutions

Mr André van Roon
Koperslager 3
2631 RK Nootdorp
The Netherlands

+31 (0)15 310 51 83
www.mechatest.com
sales@mechatest.com

Mechatest, is a leading certified manufacturer and worldwide supplier of analyser and sampling solutions specific for the Hydrogen market but in general for the petrochemical, chemical, oil & gas, pharmaceuticals, and power industry.

We offer advice, engineering 3D design and manufacturing capability for the supply of Hydrogen measurement solutions, our solutions are suitable for outdoor use in an industrial environment and ATEX Zone 1 or 2.

Hydrogen (wet gas) analyser or detection systems should be considered for product quality control and/or protection of the environment. The major challenge in measuring hydrogen samples in wet gas in an electrolyser system is to protect

the hydrogen sensor and ensure a long service life and high-quality measurement.

The output of the electrolyser is Hydrogen and Oxygen as a gas composition and might be saturated with water vapour. To take in a wet gas a Hydrogen sample is not easy, most sensors for this typical measurement in this acceptable price range are mostly not suitable for wet gasses.

Mechatest designed for the new electrolyser unit a Hydrogen gas measurement solution that allows for analysis of the wet gas Hydrogen stream in Oxygen composition and the Oxygen in Hydrogen composition. For more information go to: www.mechatest.com/hydrogen-measurement/

Metalot Future Energy Lab

Dr. Erik Langereis
Randweg Zuid 34
6021 PT Budel
The Netherlands

+31 (0)6 15 31 11 11
www.metalot.nl
info@metalot.nl

Metalot Future Energy Lab aims to accelerate the energy transition by boosting the development and market introduction of promising technologies in the sustainable energy domain. Particular focus is placed on Metal Power: the circular use of iron powder for large-scale import of renewable energy and for which H₂ is the key to convert rust into iron powder that can be combusted later and elsewhere.

Within the Hydrogen domain Metalot Future Energy Lab currently builds the hydrogen community in Southern Netherlands that focusses on the acceleration of experimental Hydrogen technology from TRL 4 and up, for production, storage and application. For this purpose, the Metalot H₂ Fieldlab has recently come available for responsible testing of small-scale hydrogen prototypes.

Together we achieve acceleration by:

- Building new value chains together with knowledge institutes, governments and companies;
- Developing joint visions and roadmaps on technology application and adoption in the market.
- Building consortia to work on concrete R&D projects to realize innovative technology and equipment.
- Joint commercialization of potential Intellectual Property.

For more information check out www.metalot.nl or contact us via info@metalot.nl to get in contact with the Hydrogen Community.

Mokveld Valves BV

Mr Paul Kamermans
Nijverheidsstraat 67
2802 AJ Gouda
The Netherlands

+31 (0)182 597 500
www.mokveld.com
sales@mokveld.com

A future with hydrogen fits in the vision of Mokveld Valves in The Netherlands, being that the world's energy, water and material demand can be met in a sustainable way, with a responsible and environmentally safe use of our planet's resources.

Mokveld contributes to this by developing and manufacturing state-of-the-art equipment and services, based on innovative technology and best available techniques. The full scope of Mokveld valves is H₂ ready.

Moreover, the latest innovation of Mokveld is highly suitable for hydrogen: a true zero emission valve! Integration of the actuator inside the valve

removes the need for a dynamic stem seals thus eliminating the main potential leak path of common valve designs with external actuators. On top of the zero external leakage throughout the lifetime of the valve, this valve offers very low electric power requirements, extreme accuracy and our well-known axial design with the inherent streamlined flow path, high capacity and low weight. All benefits have a positive effect on the opex and GHG emission reduction scopes allowing energy companies to achieve their net-zero goals. After successful long term field testing technical readiness level 7 was reached. Mokveld is ready to help energy companies to reduce their environmental footprint and to achieve their net-zero goals.

MTSA Technopower B.V.

Mr Rob van der Sluis
Westervoortsedijk 67
6827 AT Arnhem
The Netherlands

+31 (0)26 363 63 10
www.mtsa.nl/lines-of-business/
waterstof-technologie/
info@mtsa.nl

MTSA Technopower develops decentralized energy management systems that convert green electricity into hydrogen and vice versa to make green energy available 24/7 and to prevent peak loads from solar and wind farms on the electricity grid.

Sun and wind energy is sustainable, CO₂ free and can be generated almost anywhere. On location, however, most of the day's yield is usually produced in just a few hours, while during the rest of the day hardly or no green power is available. Often the 80/20 rule applies.

Another obstacle to the large-scale application of solar and wind energy is the current grid capacity. This is often not sufficient to handle peak production from (planned) wind and solar parks.

MTSA Technopower offers a solution. MTSA Technopower develops product lines for:

- Power to Gas (P2G): Electrolyser systems for the production of green hydrogen in the capacity range of 1-10 MW.
- Gas to Power (G2P): Fuel cell systems for the production of electricity from hydrogen in the capacity range of 0.5-5 MW.
- Power to Power (P2P): Integrated energy management systems that combine hydrogen and electricity production.

Please visit our website: www.mtsa.nl or www.mtsa.nl/lines-of-business/waterstof-technologie

Micro Turbine Technology BV (MTT)

Mr F. Brand
Esp 310
5633 AE Eindhoven
The Netherlands

+31 (0)88 688 00 17
www.mtt-eu.com
info@mtt-eu.com

Historic city centres and energy transition: Where heat pumps fail, and solar PV cannot be used, the Energy Transition for build environment has serious challenges to overcome. This is especially the case in Europe's historic city centres, which are essential for our European culture, identity and economy. Regulations prescribe that historic buildings must be preserved. Modern energy technologies (wall insulation, solar panels, double glazing or floor heating) are not desirable, not allowed or have severe restrictions. Heat pumps cannot be used because low-temperature floor heating will affect building structures. EnerTwin solution: The EnerTwin is the perfect solution to improve the energy efficiency and CO₂ emission reduction of a building. EnerTwin is a small-scale heat and power plant combined in one sustainable device. Its core is a micro turbine that drives a generator. Micro turbines have great advantages in

terms of reliability and lifetime, and bring low maintenance, high-efficiency and significant CO₂ emission reduction. EnerTwin is also suitable for clean fuels such as green gas, biomethane and gas mixtures with up to 23% hydrogen, but it can also run on natural gas. By using renewable fuels, 100% green electricity is produced. Moreover, this leads to additional CO₂ emission reductions. Plug and play installation (no renovation required) makes EnerTwin the perfect solution for rapid energy transition of historic buildings. Hydrogen: The EnerTwin is currently CE certified for fuels with up to 23% Hydrogen (mix). It will be adapted to 100% Hydrogen in 2 steps (50%, 100%), while backwards integration is still possible in case a hydrogen infrastructure is not available yet. A 50% Hydrogen solution is expected to be commercially available by the end of 2022.

Nedstack fuel cell technology

Ambrose Feukkink
Westervoortsedijk 73 VB
6827 AV Arnhem
The Netherlands

+31 (0)26 319 76 00
www.nedstack.com
sales@nedstack.com

Nedstack is a leading player in the PEM fuel cell industry with a strategic focus and unique track record on the high power and mission critical domain.

At Nedstack we enable the hydrogen economy by developing, realising, verifying, applying and servicing PEM fuel cell solutions. Our products and services are superior in quality, durability, safety and reliability and are cost competitive. Our responsibility is to be a partner to industry and a partner to society by tailoring our solutions and services to achieve optimal energy efficiency, large scale deployment of zero-emission power systems and balanced power grids.

At Nedstack we are confident that Hydrogen will be a backbone of the future global energy system. The rise of renewables provides for an abundance of excess hydrogen making it a widely available future commodity.

There is an increasing need for electrifying such green hydrogen in both stationary and mobile applications. As this hydrogen economy matures, the market for reliable and durable solutions will emerge.

Hydrogen will power the energy transition and we at Nedstack are strongly committed to develop and industrialize our PEM-technology and -products to enable the hydrogen economy.

Neptune Energy Netherlands B.V.

Mr René van der Meer
Pr. Beatrixlaan 5
2595 AK The Hague
The Netherlands

+31 (0)85 208 75 00
www.neptuneenergy.com
communication@neptuneenergy.com

Neptune Energy is the largest gas producer on the Dutch part of the North Sea. We are experts in producing and transporting molecules; whether those are gas or hydrogen molecules. We are moving towards a climate-neutral energy system that is reliable and affordable. The key lies in the integration of the offshore energy systems on the North Sea. It has an extensive gas infrastructure and offers opportunities for large-scale wind energy, green hydrogen production and CCS. We believe that green hydrogen is vital to the energy transition. That is why we are participating in PosHYdon, the world's first offshore green hydrogen production pilot. The pilot aims to integrate 3 energy systems in the North Sea: offshore wind, offshore gas and hydrogen by producing green hydrogen from seawater on our Q13a-A platform. The aim of the pilot is to gain experience of

integrating working energy systems at sea and the production of hydrogen in an offshore environment. "The Netherlands is in a special position as, in addition to an extensive gas infrastructure network, we can harvest large amounts of wind energy in the North Sea, quantities that are also important internationally. The wind energy can be used to generate hydrogen, which can then be transported onshore along with natural gas via existing pipelines for industry, the transport sector and for Dutch homes. PosHYdon is key to accelerating this." In February 2022 Neptune with consortium partner RWE announced the next step towards large scale green hydrogen production further off shore on the North Sea ahead of 2030: H2opZee. We aim to build 300-500MW electrolyser capacity and transport the green hydrogen via an existing pipeline to shore.

Netherlands Enterprise Agency (RVO)

Mr Kenneth Colijn
Prinses Beatrixlaan 2
2509 AC The Hague
The Netherlands

+31 (0)70 379 80 00
english.rvo.nl
redesk@rvo.nl

Netherlands Enterprise Agency

The Netherlands Enterprise Agency stimulates entrepreneurs in sustainable, agricultural, innovative and international business. It aims to improve opportunities for entrepreneurs, strengthen their position and help them realise their international ambitions with funding, networking, know-how and compliance with laws and regulations. As a government agency, it operates under the auspices of the Ministry of Economic Affairs and Climate Policy, and its activities are commissioned by the various Dutch ministries and the European Union. The Netherlands Enterprise Agency runs a number of programmes and supports business initiatives with various grant schemes.

Energy and Climate is one of the agency's key topics. The Dutch government is investing billions of euros in energy efficiency, sustainable energy and CO₂ reduction. In line with this, the Netherlands Enterprise Agency supports Dutch and international entrepreneurs and researchers in developing sustainable projects related to energy, climate and the environment. Innovation and public-private partnerships are key to the Dutch approach: the government, private sector, and academia co-operate on topics such as sustainable energy technologies, green materials, built environment, sustainable mobility, chain efficiency, sustainable electricity, new gas, and greenhouses as a source of energy.

New Cosmos - BIE

Mr Dries Boereboom
Maxwellstraat 7
1704 SG Heerhugowaard
The Netherlands

+31 (0)72 576 56 30
www.newcosmos-europe.com
info@newcosmos-europe.com

New Cosmos - BIE is a manufacturer of stationary and portable gas detection equipment, mixing high qualified gas detectors with smart forms of (wireless) communications suitable for applications in the hydrogen industry as well as for many other types of industries. With more than 60 years of experience in gas detection, New Cosmos - BIE serves beside Europe also customers in the Middle East and Africa. New Cosmos has gas detection solutions for a variety of applications within the hydrogen market including detection at the fuel cell, filling stations, FCV workshops, hydrogen production, hydrogen storage, residential detection for hydrogen smart meters, hydrogen boilers and hydrogen cookers. Together with our R&D team in Japan we can find the best solution to suite your requirement.

Our mission is to create a safer global environment with a reduced number of accidents. Our strengths:

- Sensor technology in house
- Over 60 years of experience
- Reliability
- Unique selectivity
- Long lifetime
- Extended range of sensors for different gases

Solutions for the following markets:

- New Energy Markets
- Oil & Gas Exploration
- Chemical & Petrochemical
- Automotive Industry
- Laboratories
- Micro Electronics
- PV Industry

New Energy Coalition

Mr Patrick Cnubben
Nijenborgh 6
9747 AG Groningen
The Netherlands

+31 (0)88 116 68 00
www.newenergycoalition.org
p.cnubben@newenergycoalition.org

New Energy Coalition is a continuously growing network and knowledge organisation that aims for a sustainable future by accelerating the energy transition on a national and international level. A triple-helix organisation funded by public and private parties, it connects energy knowledge, policy and markets. New Energy Coalition resulted from the merger of established energy associations, creating a comprehensive coalition of research and educational institutes, leading energy companies and government parties.

The coalition focuses mainly on the development and valorisation of growth potential of the energy sector in the provinces of Groningen, Friesland, Drenthe and Noord-Holland-Noord, the region being a perfect breeding and testing ground for

energy innovation. The accumulated knowledge and results are available for the benefit of all.

New Energy Coalition is the catalyst behind Hydrogen Valley, a six-year European programme in which more than thirty public and private parties contribute to the construction of a hydrogen network in the Northern Netherlands. From large-scale production of hydrogen up to expansion of the number of hydrogen vehicles and fuelling stations, and from underground hydrogen storage to heating of residential areas. All these initiatives are being developed within the Hydrogen Valley (www.newenergycoalition.org/en/hydrogen-valley/), which has put the region on the international map as the exemplary region for hydrogen.

NOGAT B.V.

Mr Hans Janssen
Pr. Beatrixlaan 5
2595 AK The Hague
The Netherlands

+31 (0)85 208 76 00
www.nogat.nl
hans.janssen@neptuneenergy.com

NOGAT BV is the owner and operator of a 250 kilometre offshore pipeline system connecting Danish, German and Dutch natural gas fields with the onshore Dutch network with a daily capacity of 36 million Nm³. With declining natural gas production, NOGAT is working on a new business model to accommodate large scale offshore green hydrogen production. The NOGAT system has the capacity to transport

approximately 10 -12 GW of wind power in the form of green hydrogen. A pilot project bringing together offshore wind, hydrogen production and transportation is being prepared at one of the connected platforms and is expected to be on stream in 2026. NOGAT is member of the European Clean Hydrogen Alliance and consortium partner in PosHYdon, H2opZee, North Sea Energy Program 4 and PHD@Sea.

NGT BV

Mr Kees Mark
Middenweg 2
9981 VG Uithuizen
The Netherlands

+31 (0)595 447 000
www.noordgastransport.nl
kees.mark@noordgastransport.nl

NGT B.V. owns and operates a nearly 500 kilometer network of pipelines in the North Sea. For 50 years we have been successfully transporting natural gas to shore. By transforming the existing infrastructure into an integrated offshore hydrogen backbone, we aim to accelerate the green hydrogen economy.

With natural gas production declining and a new sustainable energy generation growing we aim to reuse our existing pipelines to transport offshore produced green hydrogen from sea to land. Initial research results show that our extensive gas pipeline infrastructure – running from the North Sea UK border to Uithuizen, Groningen – is potentially suitable to transport hydrogen.

The North Sea is becoming a major European hub for sustainable energy. There is an extensive gas infrastructure – like NGT’s pipeline system – that can be reused for hydrogen transport. We believe that green hydrogen is vital to the energy transition. Converting wind into green hydrogen offshore and transportation via the existing pipelines to shore opens up a green energy system with many advantages; we can accelerate and scaling up projects while relieving the environment as the infrastructure is already there.

Integrating existing infrastructure is the smart way forward. We join relevant consortia and projects to share knowledge and expertise. Among others, we are member of the European Clean Hydrogen Alliance and consortium partner in PosHYdon. NGT brings energy ashore.

North Sea Port

Mr Daan Schalck
Schelpenpad 2
4531 PD Terneuzen
The Netherlands

+31 (0)115 647 700
www.northseaport.com
port@northseaport.com

North Sea Port is taking a lead in the energy and climate transition and playing the hydrogen card. As one of the Europe's ten largest ports and one of the top industrial regions of Western Europe, North Sea Port is in an excellent position to secure a leading role in the production, storage, transit and distribution of green hydrogen as a sustainable energy source and circular raw material. The cross-border port area is already the largest hydrogen cluster within the Benelux countries, producing and consuming 580,000 tonnes of the gas every year. The unique combination of the steel and chemicals industries and the presence of large solar and on/offshore wind farms enable interactions between major players committed to greening and sustainability who are using hydrogen as a lever to that end. Several projects to build electrolysers and installations to convert

hydrogen into synthetic fuels and raw materials are at the construction stage and will be operational in the near future. In many cases, these are 'first of their size' projects. North Sea Port and its partners are also further developing the necessary basic pipeline infrastructure to link together supply and demand. They are working towards a marketplace for hydrogen as an indispensable link in a value chain extending beyond the port area. In addition, the port is releasing more than 400 hectares for investments that will reinforce this circular dynamic and pave the way for sustainable economic growth and jobs. The strategy and aims of North Sea Port are in line with the objective shared by Europe, the Netherlands, Belgium and Flanders of a climate-neutral and zero-emission future.

Netherlands Hydrogen & Fuel Cell Association NWBA

Ms Ellen van Driel
P.O. Box 2162
3800 CD Amersfoort
The Netherlands

+31 (0)6 51 45 20 34
www.nwba.nl
info@nwba.nl

Our aim is to make Dutch society more sustainable through the development and application of hydrogen technology and fuel cells. We do this by means of the following activities:

Combining strengths: the NWBA combines the strengths of governments, industry and research institutions in order to accelerate the development and application and create opportunities for the Dutch business community.

Sharing knowledge: the NWBA gathers relevant knowledge and shares it with its stakeholders. The NWBA acts as an advisor and knowledge partner in this regard. Training and education is also provided.

Representing: the NWBA represents the Netherlands in European initiatives and conveys the Dutch vision on hydrogen and fuel cell technology both nationally and internationally.

NXT Mobility

Mr Erik Metselaar
Vennewatersweg 2b
1852 PT Heiloo
The Netherlands

+31 (0)88 472 04 72
www.nxtmobility.nl
info@nxtmobility.nl

Due to environmental and climate challenges, the demand for more sustainable mobility is growing. There are good alternatives to petrol and diesel available, but the availability of these alternatives is not yet optimal. NXT Mobility is a total concept to make mobility more sustainable. We offer climate-neutral mobility cards and charging solutions for electric vehicles. With NXT Energy Hubs, our filling stations of the future, we already offer less environmentally and climate-damaging

fuels and energy solutions. We increase the availability of more sustainable fuels and make the energy transition locally possible. In addition to traditional fuels, we offer more sustainable variants at our NXT Energy Hubs such as LNG, HVO, electricity and hydrogen. The first hydrogen filling point will be realised mid 2022 at our NXT Energy Hub in Alkmaar. The second will be opened at the end of 2023 at our NXT station in Westzaan.

Port of Amsterdam

Mr Floris van Foreest
De Ruijterkade 7
1000 GK Amsterdam
The Netherlands

+31 (0)6 82 05 48 29
www.portofamsterdam.com
floris.van.foreest@portofamsterdam.com

The Port of Amsterdam is currently one of the leading energy hubs in Europe with availability of large scale flexible tank storage terminals, supported by extensive blending infrastructure for oil products, and its role as a supplier of kerosene to Schiphol Airport through a direct pipeline.

The Port of Amsterdam is however strongly committed to play an active role in the transition towards sustainable energy production and use in both local, regional, national and international supply chains. The Port of Amsterdam therefore aims to become the largest hub for the storage, blending and transit of renewable and synthetic fuels in Europe. In addition, it enhances the investment climate for existing and new companies to establish production facilities for these types of fuels.

The port is working closely with different partners to establish new value chains based on for example hydrogen, synthetic kerosene, and methanol. Therefore the proposal presented by the Port of Amsterdam reflects the strategy of the port in the development of creating the 'building blocks' for the Future Fuels Hub containing the following clusters of projects:

Infrastructure projects

- Regional Integrated Backbone (RIB): development of a newly constructed regional hydrogen pipeline connecting production sites (e.g. project Hermes / 100 MW electrolysis with Nouryon and Tata Steel) as well as the national hydrogen backbone, with partner Gasunie.
- Development of a hydrogen distribution network in the port area.
- Development of a (green) CO₂ distribution network in the port.

Port of Rotterdam

Mr Randolph Weterings
World Port Center (WPC)
Wilhelminakade 909
The Netherlands

+31 (0)10 252 10 10
www.portofrotterdam.com
infomail@portofrotterdam.com

Rotterdam is the largest energy hub in Europe and is a frontrunner in the energy transition. Hydrogen is a key element in this transition. Together with its partners, the Port of Rotterdam is working on a series of projects to develop the production, use, infrastructure, import and transit of hydrogen. The H-vision project is focused on the production of blue hydrogen. Regarding green hydrogen, several companies are making plans to ensure that an electrolysis capacity of 500 MW will be operational by 2025. This capacity has to be scaled up to 2 GW by 2030, among other things by realising 2 GW of additional wind at sea, connected to Rotterdam. For the exchange of hydrogen between companies, there will be a hydrogen pipeline through the port area in 2024. This is a boost for the development of a physical hydrogen market, and so is the realisation of a hydrogen exchange.

Together with a large number of partners, the Port of Rotterdam is examining the import and transit of hydrogen from overseas, to replace the current European energy imports (oil, coal). This is done with parties from many countries, ranging from Iceland to Australia and from the Middle East to South America. To be able to accommodate these imports, the focus is on realizing terminal facilities in Rotterdam and a robust infrastructure to the hinterland, especially hydrogen pipelines to Chemelot and North Rhine-Westphalia. Simultaneously, the application of hydrogen is encouraged, as fuel for industry and the transport sector, and as raw material for chemical products. Current projects include one that is aimed at having 1,000 hydrogen-powered trucks on the road between Rotterdam, North Rhine-Westphalia and Antwerp by 2025, and projects on the use of hydrogen as a fuel for inland shipping.

Pro Control Process Automation BV

Mr Ger Bloem
MC v Voordenstraat 5
1483 GB De Rijp
The Netherlands

+31 (0)299 630 690
www.pro-control.nl
info@pro-control.nl

Pro Control is an engineering company with a very clear focus on the delivery of process control (PLC controls) and data acquisition systems for process installations (lab, bench and pilot scale) and skids. We have been doing this for over 20 years and work for well-known organizations active in the world of Chemicals, Oil & Gas, Seed Breeding, Aerospace and Defence. We distinguish ourselves through our knowledge and expertise of measurement & control technology applied in these demanding and often complex environments. We have knowledge of Siemens, Eurotherm, Honeywell, DeltaV, Rockwell, Beckhoff, Hitachi, Wonderware, iFix, Reliance and National Instruments LabVIEW (we are NI Alliance Partner). Supplemented with our expertise in the field of measurement and control technology, integration of analytical instrumentation (GC, MS, FTIR, etc.),

recipe control, data processing and the fact that we can deliver E&I projects turn-key, makes us a serious discussion partner in the field of automation and control engineering.

To give you some examples:

- For several skid builders active in Petro Chemical environments we are supplying the automation for the process skids they developed. Units have spread all over the world;
- We are an automation partner for a seed breeder in Enkhuizen and we supply turn-key machine controls and carry out extensions/adjustments/renovations to the automation of existing installations;
- For the space authority we supply the automation (software, cabinet, cabling) of a vacuum set-up in which materials are tested in extreme conditions.

Proton Ventures BV

Karel Doormanweg 5
3115 JD Schiedam
The Netherlands

+31 (0)10 426 72 75
www.protonventures.com
info@protonventures.com

Proton Ventures is an engineering company specialised in ammonia related technology and products. Proton Ventures is experienced in building and running pressurised and refrigerated ammonia terminals. Therefore our portfolio ranges from liquid chemical storage facilities, De-NO_x and N₂O removal systems up to modular production facilities of green ammonia. Hence, Proton Ventures is an experienced partner when it comes to hydrogen carrier and storage concepts needed for the energy transition. Next to this, Proton Ventures also enables the agricultural industry to switch towards green fertilisers. Whether you need a new facility built from the ground up, or an existing one upgraded, we are happy to be of service. Our team consists of talented developers, design engineers and project managers whom develop, design and

execute projects, meeting your requirements and exceeding your expectations.

Our modular ammonia plants are based on our NFuel concept. The feedstock for this ammonia production is power produced from renewable sources (solar, wind turbines, hydro). This new concept allows production of green ammonia in a de-centralised fashion, which can be further used as:

- Nitrogen carrier (fertiliser)
- Hydrogen carrier/storage
- (Combustion) Fuel

As a basic starting point for our designs, Proton Ventures works with three different production capacities. Within this range of the capacities Proton Ventures deals with the supply and demand of the energy market.

Province of Noord-Holland

Ms Ellen van der Heijden
Houtplein 33
2012 DE Haarlem
The Netherlands

+31 (0)800 020 06 00
www.noord-holland.nl
servicepunt@noord-holland.nl

Reducing greenhouse gases is one of the absolute priorities of our time. The province of Noord-Holland as Hydrogen Hub Noord-Holland therefore puts a lot of effort on hydrogen development. We believe that hydrogen is an indispensable element in a carbon-free society. By replacing fossil fuels by hydrogen we also contribute to healthy living environment. In addition, the hydrogen developments can boost our economy and employment, with spin-offs in innovation and knowledge development. Our region can play a strategic role in the new hydrogen economy and can contribute to the climate goals of Europe. All steps in the hydrogen value chain are present in our region. Due to our geographical location at the

North Sea, offshore produced green electricity and hydrogen will come ashore at our coasts. This hydrogen will be used in our industrial clusters, Schiphol Airport, ports, agriculture and transportation sector. The province of Noord-Holland supports companies and municipalities in realizing their ambitions regarding sustainable energy and CO₂ reduction. We do this by providing funds and human resources, by bringing parties together, by having research and explorations carried out, by making pilots and projects possible through spatial integration etcetera. The province of Noord-Holland is a member of Europe's Clean Hydrogen Alliance and is part of various partnerships in the field of sustainable energy and CO₂ reduction.

Pure Water Group

Mr Jerry Hager
Korte Hei 3
4714 RD Sprundel
The Netherlands

+31 (0)165 348 252
www.purewatergroup.com
info@purewatergroup.com

Pure Water Group is a leading manufacturer of advanced and sustainable water purification equipment. We partner with innovative technology suppliers to develop and expand our product range. Core technologies include: Electro Deionization (EDI), Membrane Degassing (MD) and Electro Dialysis Reversal (EDR) which are used for the production of High Purity and Ultra Pure Water or the treatment and recovery of challenging water streams. Pure Water Group cooperate globally with water system integrators who fully rely on our expertise, extensive experience and dedicated support. Pure Water Group: engineering purity.

PwC

Chris Winkelman
Thomas R. Malthusstraat 5 /
Fascinatio Boulevard 350
1066 JR Amsterdam /
3065 WB Rotterdam
The Netherlands

+31 (0)6 51 54 18 97
www.pwc.nl
chris.winkelman@pwc.com

PwC is one of the global leading energy transition tax and advisory firms. We understand the challenges resulting from the fundamental changes to the energy system. For the energy transition hydrogen is an essential energy carrier. Without hydrogen it will be hard to meet the ambitious climate targets. We support both leading companies in the hydrogen industry, as well as Dutch government on the challenges of this quickly developing and innovative industry.

We help solve these important problems, with our broad industry knowledge, deep technical financial expertise and thorough understanding of the technical challenges. We help companies turn their (infrastructure) projects with high capex and uncertainties into a success or assist

governments in kickstarting a hydrogen market and infrastructure by tapping into all opportunities to optimise their investments. We assist companies and governments with understanding the challenges related to hydrogen projects and ensure these projects are optimally prepared for access to (equity) funding, green (project) financing, subsidies and other European and local (tax) incentives. With our vast global network, we are also well positioned to help companies expand cross border.

We can support from the early stages (market analyses and -entry studies, feasibility studies, business case set-up), towards the realisation (funding, financing, subsidies) until exploitation (management, reporting and compliance).

REDstack BV

P. Hack
Graaf Adolfstraat 35 G
8606 BT Sneek
The Netherlands

+31 (0)515 745 582
www.redstack.nl
p.hack@redstack.nl

REDstack is an impact scale-up company, developing and implementing technology and membrane-stacks, for per example:

Reversed Electro Dialysis for sustainable and continuous power generation out of 2 waterflows with different salinities. The Pilot-Plant at the Afsluitdijk is running successful, and now ready for upscaling into a 0.5 MW Demonstration-Plant. The stacks generate DC, full continuous and very suitable for feeding directly into Hydrogen Electrolysers.

Electro Dialysis for water desalination. The new developed ED-technology and ED-stacks from REDstack have a significant lower energy consumption than traditional stacks. Industrial Electro Dialysis applications, per example for Nutrient recovery.

The stacks and system-design and supply is done in close cooperation with companies within the group: W&F Technologies and Pure Water Systems.

As REDstack has significant experience in designing and assembling various membrane-stacks, REDstack is a good partner in developing and realizing alkaline Hydrogen Electrolysers.

Remeha

Mr Raymond van den Tempel
Marchantstraat 55
7332 AZ Apeldoorn
The Netherlands

+31 (0)55 549 69 00
www.remeha.nl
info@remeha.nl

Remeha develops innovative and energy-efficient comfort solutions for the indoor climate. With a broad product and service portfolio, for heating, cooling and hot water, we make sustainable comfort solutions accessible to everyone. With more than 500 employees, Remeha gives a contemporary interpretation to the development and production of comfort solutions, with which it has grown into a leading manufacturer in the Netherlands and in Europe. Remeha is one of the main brands within BDR Thermea Group. Remeha has developed the world's first hydrogen boiler and is one at the forefront of the hydrogen transition in the Netherlands. In combination with hybrid heat pumps, the application of hydrogen becomes even more relevant. This makes a reduction in hydrogen consumption of up to 70%, just like with natural gas, achievable. Remeha believes in the application of this energy carrier and therefore

invests heavily in hydrogen development:

- 20% hydrogen mixture with Remeha gas boilers: Hydrogen blending is a pragmatic way to quickly make a big step towards the CO₂ targets. In November 2019 various Remeha gas boilers have been certified for the mixture of up to 20% hydrogen.
- 100% hydrogen gas boiler: Remeha Hydra: In June 2019 we had a world premier: a 100% hydrogen boiler used in an existing apartment complex in Rotterdam. In the upcoming years the Remeha Hydra will be used extensively in projects in the Netherlands and abroad.
- Hydrogen ready gas boiler: Remeha and BDR Thermea Group are working on the development of 'hydrogen ready' gas boilers. A hydrogen-ready boiler runs on natural gas, but can be converted to hydrogen relatively easily.

Resato International
Mr Francois Hemmerlin
Duitslandlaan 1
9403 DL Assen
The Netherlands

+31 (0)50 501 68 77
www.resato.com
info@resato.com

Resato is a Dutch provider of smart high pressure solutions with the aim to increase the productivity of its worldwide customers. It is our mission to meet and exceed the expectations of our customers. With more than 25 years of experience in high pressure technology, we are equipped with the knowledge to provide reliable and safe solutions. We want to support the hydrogen mobility sector with our high pressure solutions.

Therefore we have developed hydrogen refuelling stations to tackle the 'chicken and egg' dilemma: there is a lack of hydrogen filling stations due to a shortage of hydrogen cars, and vice versa. Resato's vision is to meet this challenge with compact and efficient refuelling solutions that support the development of a hydrogen economy.

For smaller hydrogen-powered vehicle fleets, such as cars and buses, hydrogen is still not readily available. By developing a compact and cost-efficient refuelling station (Fleet Owner Station), the first step has been taken to break through the high investment and make it possible for companies with fleets to refuel with hydrogen.

This way, the number of hydrogen filling points can be increased. When demand grows, the compact stations can be replaced by a centrally located public hydrogen station, where you can refuel your car within 3 minutes. This makes it easy to expand the network by relocating the compact filling stations.

Royal HaskoningDHV
Mr Juriaan Mieog
Laan 1914 35
3818 EX Amersfoort
The Netherlands

+31 (0)88 348 28 87
www.royalhaskoningdhv.com
juriaan.mieog@rhdhv.com

Royal HaskoningDHV has been an independent engineering services, consultancy and project management agency since 1881. Our nearly 6,000 professionals worldwide innovate by collaborating with customers and partners to have a positive impact on people, the environment and the economy.

We advise companies and (semi) governments on all parts of the hydrogen chain, from the first idea to the conceptual design phase. We provide technical-economic feasibility studies in which we involve stakeholders and society. We also provide specific services related to safety, permits, legal and policy advice.

We are active in all parts of the hydrogen chain, including the demand-side options. For us, one of the major challenges is to bring the high level

ideas to realisation as many parts of the chain are still in development, both in the technologically as well as organisational and regulatory.

Next to that we understand that hydrogen has a key role in energy transition and complements electricity to have a sustainable energy system. As such, H₂ may be the best option, but in other cases a different solution such as electrification or CCS may be the most optimal option.

RHDHV has carried out over 50 hydrogen projects in various roles. These are projects for the production and import of hydrogen, such as our 1 GW parametric design; transport and storage like a QRA for a H₂ pipeline or in the use phase the development of the business case for H₂ buses.

SALD bv

Mr Erik Kremers
Zwaanstraat 1 TX
5651 CA Eindhoven
The Netherlands

+31 (0)40 238 05 00
www.spatialALD.com
info@spatialALD.com

SPATIAL ALD
INNOVATORS

With 'Spatial Atomic Layer Deposition', SALD has developed a globally unique, patented process for applying functional nanolayers as thin as a single atom on an industrial scale. These conformal nanocoatings are deposited via a self-limiting gas-phase process with web speeds up to 60 meters/min. We can apply it under ambient conditions on nearly any substrate, like metal, glass, wafers, plastics, textiles or membranes.

Spatial ALD process will revolutionize entire industries, including the electrolysis technology industry, the production of battery cells for cars and smartphones, the textile industry, printed electronics (organic computer chips), the new solar energy industry and the packaging industry for consumer goods and convenience food.

Samotics

Mr Simon Jagers
Bargelaan 200
2333 CW Leiden
The Netherlands

+31 (0)6 53 32 52 56
www.samotics.com
info@samotics.com

Samotics seeks to address the factors that contribute towards an efficient operation of AC-driven rotating assets, and with it reduce electricity consumption and GHG and carbon emissions. AC motors are an integral asset across various industries. These motors however, have critical problems, such as failing unexpectedly, being used inefficiently, and being selected inadequately (right sizing). Energy waste occurs as a result of all three of these factors. Samotics strives to solve these three issues by providing a combined energy and condition monitoring service, called SAM4. SAM4 is a plug-and-play solution and service for critical AC motors and rotating equipment. SAM4

utilizes electrical signature analysis (ESA) and powerful AI-driven algorithms, which use voltage and current data of AC motors and rotating equipment. This data is obtained by plug-and-play, easy to install (and scale), SAM4 hardware, which is installed in the easy to reach and safe environment of the motor control cabinet of the assets, instead of on the assets themselves. To date Samotics has 120+ clients to which energy and condition monitoring services are provided and is monitoring thousands of assets in the field. Moreover, Samotics has multiple global partnerships, amongst others with Schneider Electric. Would you like to get know more about our solution, SAM4, do not hesitate to reach out.

SHV Energy N.V.

Sustainable Fuels: Attention Hydrogen Team
Capellalaan 65
2132 JL Hoofddorp
The Netherlands

+31 (0)23 555 57 00
www.shvenergy.com
sustainablefuels@shvenergy.com

SHV Energy is a Netherlands based, family owned multinational distributing LPG, LNG and sustainable fuels servicing the energy needs of over 30 million customers worldwide.

We are proud to provide energy for hundreds of applications, ranging from cooking to heating to powering low-polluting vehicles. Through our local brands including Calor, Primagaz, Ipragaz, Liquigaz, Supergasbras, Xiwei, Supergas and Pinnacle Propane, we serve our customers through our market-leading LPG companies on four continents: Europe, Asia, North and South America. It is our mission to help clients find unique energy combinations, going beyond our responsibility of simply supplying energy.

Everyday we provide people and businesses beyond the gas grid with the opportunity to switch from high-polluting, carbon-intensive fuels to cleaner forms of energy. In 2018, we pioneered the launch of renewable propane (also known as bioLPG) to offer our customers a drop in replacement with up to 80% carbon reduction. Our activities within our Sustainable Fuels team are to explore, encourage and develop solutions for decentral off-grid domestic heating and cooking, industrial process heat and transportation applications. We already operate Hydrogen infrastructure in China and we see long term potential for global growth. Our focus is on collaborative action to tackle the challenges of green hydrogen for off-grid production and usage.

Sia Partners

Micky van Gemert
Amstelplein 1
1096 HA Amsterdam
The Netherlands

+31 (0)20 240 22 05
www.sia-partners.com/en
micky.vangemert@sia-partners.com

Sia Partners is a next-generation consulting firm focused on delivering superior value and tangible results to its clients as they navigate the digital revolution. Sia Partners was founded in Paris in 1999. Today, Sia Partners is still headquartered in Paris but developed into an organization with over 1800 consultants, active in 31 offices around the world.

With its global expertise in the energy sector and its recognized know-how in business transformations, Sia Partners is able to seize the opportunities offered by hydrogen to its clients from a business and technology perspective. The added value of Sia Partners:

- 1. Our teams work on projects all along the energy value chain – from strategic to operational steps – and are therefore familiar

with a large spectrum of actors/possible partners;

- 2. Sia Partners' expertise on the energy sector, especially on the stakes of energy transition and;
- 3. Sia Partners' knowledge on the hydrogen market and the actors of the ecosystem, which is deeply fragmented.

So far, Sia Partners has helped major gas infrastructure companies, energy producers, energy suppliers and research and knowledge institutions on a wide variety of hydrogen projects. Examples of Sia Partners' project focus areas are contextualization and challenges of the hydrogen sector, definition of hydrogen development strategies, support for project management and development of analytical tools.

Siemens Energy B.V.

Mr Leo Freriks
Stadhouderslaan 800
2382 BL Zoeterwoude
The Netherlands

www.siemens-energy/hydrogen
leo.freriks@siemens-energy.com

Energy systems around the world are undergoing fundamental changes: the balance of fossil fuels and renewable energy sources is shifting. Global demand for energy could increase by around 25 percent by 2040 – and, if we don't act, the amount of climate-damaging greenhouse gases could rise accordingly. The central question is: How can we meet the rising demand for energy worldwide and at the same time protect the climate – and do so in an economically sensible way? Siemens Energy can deliver answers.

We are convinced that a climate-neutral energy supply is not only technologically feasible, but also economically profitable. In this sense, the global energy transformation offers many opportunities that we intend to seize with determination.

We energize society around the world and thus enable successful and sustainable growth – that is our promise, indeed our purpose. As a competent partner and advisor, we want to enable our customers to realize their ambitious goals and commitments. All along the entire energy value chain, we accompany our customers on their way to a more sustainable future – no matter where they are.

Siemens Energy has a complete portfolio of products, solutions and services, ranging from the generation of (renewable) electricity, power transmission, to conversion into (green) hydrogen or e-fuels, including compression and industrial heat production, heat storage and heat recovery solutions. Together with our customers, we energize society worldwide.

SoluForce B.V.

Mr Robert-Jan Berg
Flevolaan 7
1601 MA Enkhuizen
The Netherlands

+31 (0)228 355 688
www.soluforce.com
info@soluforce.com

SoluForce is the originator and technological leader in long length high pressure Reinforced Thermoplastic Pipe systems (RTP, also known as Flexible Composite Pipes or FCP). They are used for many applications, such as hydrocarbons, hydrogen, water, offshore and mining.

The SoluForce RTP system has been certified for hydrogen applications up to 42 bar of operating pressure. Unique in the world of hydrogen transport and a global first. Based on proven technologies, it can be the perfect accelerator to achieve local (green) hydrogen distribution in a fast, flexible and cost-efficient manner.

The SoluForce system is completely flexible, meaning it can go round corners, up hills, down slopes, across gullies, under water and more with ease. Being non-metallic, it is also fully corrosion-free, does not suffer from hydrogen embrittlement and is quick and simple to install.

Reusable and with a significantly lower CO₂ eq. footprint compared to alternatives, this ready to use pipeline solution has a major impact on the feasibility of (green) hydrogen projects and a sustainable energy mix.

R. Stahl Electromach

Mr Marc Zengerink
Jan Tinbergenstraat 193
7559 SP Hengelo
The Netherlands

+31 (0)6 13 20 97 43
www.zone-atex.nl
marc.zengerink@r-stahl.com

R. Stahl Electromach is an international leading design company with an extensive engineering and manufacturing expertise in explosion proof control systems. Our components and systems can be applied in areas where gas and dust explosions may occur. Therefore, we are the obvious partner of choice for oil, gas, petrochemical and offshore applications such as in refineries and oil and gas.

All safety solutions by R. Stahl Electromach are customer-based and include the development of application software, manufacturing, assembly, testing and on-site commissioning. R Stahl Electromach offers these solutions as full-service packages, from consultation and conceptual design to operation. We also take care of all international certification and providing after-sales support.

Stork

Mr Willem Hazenberg
Van Deventerlaan 121

www.stork.com
marketing@stork.com

Stork is a value-driven provider of fully integrated operations, maintenance, modifications and asset integrity solutions. By setting new standards of excellence in various sectors, we aim to be the industry reference. Every day, everywhere. Our global network includes our headquarters in the Netherlands, plus operations in the UK, Continental Europe, Americas, Middle East and Asia Pacific. Stork has a global workforce of 18,000 employees.

Stork has more than 60 years' experience in Hydrogen projects and is involved in several green Hydrogen projects. Stork has conducted market studies on Hydrogen for the EU and on various Hydrogen applications for companies. Stork has built the first 1 MW electrolyser in the Netherlands, builds and maintains Hydrogen fuel stations and is frontrunner in Hydrogen and Oxy

fuel combustion. Stork was the consortium lead for the development of a hydrogen house heating project in Hoogeveen, involved in energy and Hydrogen partnerships, education and Hydrogen standardization.

Stork is part of Fluor Corporation, one of the world's largest publicly traded engineering, procurement, construction and maintenance companies. Together Fluor and Stork are your partner for total Hydrogen assets lifecycle solutions, from feasibility to construction and maintenance.

With its more than 190 years of industrial experience, Stork is committed to play its leading role in the energy transition, also announced as 'the next great economic revolution'.

Summit Engineering B.V.

Mr Robbert van der Pluijm

www.summitengineering.nl
info@summitengineering.nl

“Leaving a world to thrive in for future generations.”
We want to use our personal energy for that.

Summit Engineering was founded by Arjan Hartemink and Robbert van der Pluijm after a trip to Mount Kilimanjaro. The journey to the top and back, has inspired them in many ways. The glacier at the summit is becoming smaller every year due to global warming. Being confronted with this so closely, was the final push: we have to do something.

Summit Engineering now supports companies and governments with their Energy Savings Programmes and Sustainable Energy Projects. We also share our knowledge with the future generation by teaching classes at universities.

Together we work on reducing CO₂ emissions and on taking steps towards a CO₂ neutral world. Hydrogen can play an important role in achieving this goal.

At Summit Engineering we have experience in the various aspects of the hydrogen supply chain. From production, to transport storage and utilisation in different areas. We provide concrete advice and excellent project support you can count on. Whether you are at the concept phase of your project or already working towards project implementation.

We use our knowledge, experience, as well as our extensive sector network, to provide a tailor-made programme for achieving optimal results.

SuWoTec B.V.

www.suwotec.com
lammert.dewit@suwotec.com

To secure a sustainable future for generations to come, We develop sustainable circular technologies that are inspired by the way nature works.

First understand nature.

Nature has its own unique ways and systems to create, utilize and recycle. These are proven processes, fine-tuned over thousands of years. More often than not, the way we humans have built today's energy and transport infrastructure, however, follows completely contrary ideas. Then, develop game-changers.

Identifying nature's fundamentally efficient and resilient processes, we develop game-changer technologies that are circular by design and feasible over time. Our work must have a positive effect on people and planet, right where it matters most.

One of the game changers is the development of non-corrosive electrodes and membranes. Ongoing development for electrolyzes, fuel cells, batteries, water cleaning and carbon capture. Electrodes with longer life time and not participating in the process. We expect suitable for multiple energy carriers next to hydrogen.

Swagelok Nederland

Swagelok actively supports companies developing alternative fuel technology for the any industry, designing fluid system components and assemblies for use in hydrogen applications. We not only understand the fluid system performance needs of the industry, but also the complex approval processes and compliance requirements that govern them. We provide solutions that range from easy-to-install tube fittings to custom-designed fluid system assemblies that deliver longlasting performance in hydrogen applications. We also provide fluid system evaluation and advisory services to help customers improve the performance of their existing systems, and we provide product design support for fuel systems in vehicles and filling station infrastructure. Swagelok products and services are also integral to success in transportation industry sectors including

shipbuilding, aerospace, and tire manufacturing. Our widely certified fluid system products are the standard choice for use in many military and commercial maritime applications. At Swagelok, we recognize that safety is often the number one priority of our customers, especially those working with and transporting highly volatile fluids as part of their daily business. We can help you build safety into your fluid system-related practices from installation through routine maintenance. We provide:

- A comprehensive program of safety training and competency skills development
- Leak-tight fluid system designs based on best practices for operator safety
- Evaluation and advisory services that help you address risk factors throughout your fluid systems
- High-quality Swagelok components and assemblies engineered and tested to be safe to operate and maintain throughout their lifecycles.

Tebulo Engineering

The sectors for which we carry out our engineering work are Chemicals and Petrochemicals, Offshore, Food, Utilities and Energy, Nuclear, Pharmaceutical, Automotive and Steel industries.

The projects mostly concern front-end engineering processes. However, parts of this, such as studies, risk inventories, basic and detailed engineering are also important activities.

The Engineering projects are multi or single disciplinary, in which Process, Piping, Mechanical, and Electrical Engineering play a leading role. Naturally, civil and structural also have their share.

We are a professionally organized engineering company and have a reputation for providing solutions that go beyond the standard. Tebulo Engineering is active in various markets, based on the broad knowledge gained, we function as a technical partner for our clients.

We do not lose sight of trust and integrity. The great diversity of clients makes it possible to realise innovative multidisciplinary projects that appeal to the imagination. Our working method is aimed at building long-term relationships. Our targeted training program ensures that our people are known with recent developments in the fields. Our designs are in accordance with current standards and legislation.

T.EN Netherlands B.V.

Mr Aksel Aksam / Mr Martin van 't Hoff
Afrikaweg 30

The Netherlands

+31 (0)79 329 36 00
www.technipenergies.com
TEN-Netherlands@technipenergies.com

Technip Energies (T.EN) is a leading Engineering & Technology company for the energy transition, with leadership positions in LNG, hydrogen and ethylene as well as growing market positions in blue and green hydrogen, sustainable chemistry and CO₂ management. The company benefits from its robust project delivery model supported by extensive technology, products and services offering.

Operating in 34 countries, our 15,000 people are fully committed to bringing our client's innovative projects to life, breaking boundaries to accelerate the energy transition for a better tomorrow.

Technip Energies, headquartered in Paris and registered in the Netherlands, is listed on

Euronext Paris with American depository receipts ('ADRs'). For further information: www.technipenergies.com.

The office in Zoetermeer is Technip Energies' centre of excellence in Hydrogen Technologies. Competences comprise: R&D, product development (e.g. industrial burners able for 100% H₂ firing) as well as the full spectrum of EPC competences through which it offers worldwide proprietary grey, blue and green hydrogen technologies as well as revamps (conversion of grey to blue, plant modernization (e.g. energy efficiency), capacity increase, etc.). Our services include (digital) client support in day-to-day plant operation including furnace/reformer surveys and supply of spares.

TKI New Gas (Topsector Energy)

Mr J. K (Jörg) Gigler
Groen van Prinstererlaan 37
3818 JN Amersfoort
The Netherlands

+31 (0)6 45 25 15 71
www.topsectorenergie.nl/en/tki-new-gas
jorg@gigler.nl

Topsector Energy (TSE) is the driving force behind innovations that are necessary for the transition to an affordable, reliable and sustainable energy system. The Dutch Knowledge and Innovation Agenda, as a part of the National Climate Agreement, determines the priorities of the TSE.

The specific innovation agenda of TKI New Gas focuses on the following topics:

- Hydrogen: full hydrogen chain as well as the system role that hydrogen can play;
- Green gases from biomass through different processes, such as digestion, gasification and supercritical water gasification;
- Capture, Utilisation and Storage of CO₂;
- Geo energy, with focus on subsurface innovations regarding energy storage and geothermal energy.

Hydrogen is a cross-cutting theme for the Topsector Energy because it deals with all sectors of our national climate agreement as well as addressing the system role which could be beneficial for all stakeholders in the energy transition.

Our main activities include 3 types of activities:

- roadmapping, such as defining innovation agendas together with Dutch stakeholders;
- facilitating innovators, for example finding partners, matchmaking and access to funding opportunities;
- communication and information on activities, projects, research programmes and relevant developments.

TNO

Mr Lennart van der Burg

2595 DA Den Haag
The Netherlands

+31 (0)6 43 95 46 85
www.tno.nl/hydrogen
lennart.vanderburg@tno.nl

TNO is an independent research organization. TNO believes in the joint creation of economic and social value. TNO connects people and knowledge to create innovations that boost the competitive strength of industry and the well-being of society in a sustainable way. This is TNO's mission and it is what drives the over 3,200 professionals in their work every day. In 2018 TNO came together with ECN to form a Unit solely dedicated to the energy transition, with 1,000 energy professionals covering the full breadth of knowledge disciplines to support industry and drive sustainable innovations forward to reach their 2050 CO₂ neutral goals. TNO is one of the leading applied research institutes in the field of hydrogen. More than 15 research departments spread over 5 units are collectively working on innovations along the

entire hydrogen value chain from production to infrastructure, storage and final applications. We bring engineers, business analysts and social scientists together to create insights into the future of hydrogen technologies. TNO is involved in over 50 hydrogen related projects in 2020 only. From developing new materials for PEM and SOE in our Faraday lab, test on industrial scale up to 2.500 cm², 250 KW in the Hydrohub and in our new power2X fieldlab Rotterdam. We work on pre-feasibility and engineering studies for large scale deployment in project such as NorthH2 and the Gigawatt project. In the unit Traffic & Transport we work on amongst others fuel cell integration in heavy duty vehicles and energy management. With our facilities it is possible to speed up the R&D process and time to market for the industry.

Energetic Chemistry, Safe and Reliable. That is our ambition. Hydrogen Safety and Secure Hydrogen Infrastructure are core activities that contribute to that goal within the energy transition. We have unique capabilities for testing the behaviour of dangerous chemicals and examine chemistry at extreme process conditions. We apply our hazardous chemistry expertise, explosion safety knowhow and highly specialized infrastructure, to assess and prevent risks related to processing, handling and storage of hazardous materials. Our unique expertise supports your pursuit towards inherent safety.

We have a proven track record in (customized) testing the behaviour of processes and materials linked to hydrogen. Our hydrogen expertise include:

- both liquid and gaseous hydrogen testing capabilities
- from 0 to 2000 bar pressure
- from cryogenic to high temperatures
- from lab-scale to pilot-scale.
- permeability and compatibility
- explosion safety
- stability and sensitivity
- consultancy
- large-scale hydrogen storage and transport development

Our team of multi-disciplinary specialists and facilities allow a broad range of possibilities and enable the exploration of innovative developments without compromising on safety.

To70 aviation

Mr Vincent de Haes
Oranjestraatsingel 6
2511 VE The Hague
The Netherlands

+31 (0)70 392 23 22
www.to70.nl
vincent.dehaes@to70.com

To70 is a leading aviation consultancy firm based in the Netherlands with more than 12 offices worldwide. To70 provides environmental, operations, safety and efficiency services to a wide range of stakeholders within the aviation sector. These include airports, public institutions and government bodies as well as air traffic management and private businesses. At To70 we are strongly committed to a sustainable aviation sector, and aspire to work together with our partners and clients to ensure aviation becomes carbon free and future proof.

An increasing area of attention within sustainable aviation is the development of hydrogen fueled

aircraft. Although still in the early stages of development, increased public awareness of aviation emissions as well as national and European hydrogen developments are pushing innovation. Besides changes in aircraft, the transition to hydrogen will require the wider aviation ecosystem including airports, regulatory bodies and air traffic management bodies to adapt. At To70, we are able to provide research services and strategy guidance for hydrogen infrastructure, operations, safety and risk management. Our years of experience, international presence and sustainable vision allow us to support all stakeholders within aviation that aim to develop future hydrogen powered aviation.

Torrgas bv

Mr Erwin Eijmans
Herikerbergweg 292
1101 CT Amsterdam
The Netherlands

+31 (0)6 51 11 88 31
www.torrgas.nl
e.eymans@torrgas.nl

Torrgas is a leading technology company in the production of renewable syngas and bio-char. Syngas is the building block of the chemical industry. Torrgas offers viable and profitable opportunity as an alternative for the world's addiction to fossil fuels. After the torrefaction of the waste streams, the Torrgas process converts low value waste into bio-based commodity products with a high added value. Syngas is used for the synthesis of almost any bio-hydrocarbon that are currently produced from fossil fuels; among others in this case Hydrogen.

Toyota Material Handling

Toyota Material Handling helps businesses of all sizes across Europe meet today's materials handling challenges with a full range of Toyota counterbalanced forklift trucks, BT warehouse equipment, and services and added value solutions, including service contracts, short term rental, used forklift trucks and the Toyota I_Site information service.

Active in more than 30 countries across Europe and with headquarters in Sweden, TMHE has a European Office in Brussels and production centres in Ancenis (France), Bologna (Italy) and Mjölby (Sweden).

With nearly 5,000 service engineers, around 10,800 employees, along with a network of independent distributors and dealers, TMHE is the

European regional organisation of Toyota Material Handling Group (TMHG), which is part of Toyota Industries Corporation (TICO) – the global leader in materials handling equipment. Since the acquisition of Vanderlande and Bastian Solutions, it's TICO's ambition of becoming the first-choice partner in the material handling business as a total solution provider for projects of all sizes.

Our customers are our number-one priority. By staying in close contact with you we can understand your needs and provide the solution, technology, energy, service and financial flexibility that fits your operation. We can do this by working according to TPS and TSC (Toyota Service Concept), and by continuously improving.

Tradinco Instruments

www.tradinco.com
sales@tradinco.com

Tradinco instruments, is a supplier for sensors, calibration, equipment, services and software. We have an excellent track record since 1963 and have strong links with the process industry and equipment manufacturers. With our knowledge and hands-on experience, we provide expert advice and if necessary we can design and supply custom instrumentation to match requirements in your application. Customizations can range from small modifications on existing equipment and sensors to completely new developed instruments and software. Our calibration test benches and AutoCal+ calibration software are used around the world. With our ISO17025 accredited calibration lab, we offer facilities and knowledge to do research or qualification tests.

Specifically for hydrogen applications, we offer dedicated sensors and can calculate expected service life of pressure transmitters based on the process conditions and advice on the best option for your application. Our sensors are already used for many years in hydrogen installations for the automotive and semiconductor industry. Next to this we offer customized test, measurement and calibration solutions. For more information, please visit our website or contact us via email or phone.

TSG Group
Mr Paul Simons
Furkapas 8
5624 MD Eindhoven
The Netherlands

+31 (0)40 254 82 22
www.tsggroup.nl
info@tsggroup.nl

TSG Group is a Dutch engineering company headquartered in Eindhoven with subsidiary at Brightlands Chemelot Campus. We design, develop and realize new products, special machines and industrial automations including tools and web applications. Portfolio in the field of novel development of sustainable energy systems, is present.

TSG Esempio is active in the field of new products with Industrial & UX Design. We also make use of CAE tools like FEM, CFD and topologic optimization. We create and build prototypes including functional models and proof-of-concepts. We have our own workshop in Eindhoven. We are also experienced in pilot production, ramp up and industrialization. TSG Innoteq has a focus on development and realization of special machines, automation of

processes and the tools that come along in this trajectory. This includes automatic packaging lines and custom test equipment. One of the specializations can be found mass production techniques for plastic deformation of metals and in joining and assembly methods.

TSG Engineering provides technical capacity and knowledge for projects at our customers' offices. Finally, sister company Finetic build websites, web portals and web based applications. An inhouse developed CMS called Wenetic, is the stabile and proven system where everything is based on.

Within TSG Group, this combination of expertise, knowledge and skills under one roof, can offer integral solutions for technical challenges and engineering projects.

TSG Netherlands BV
Mr Robbert Schirmer

robbert.schirmer@tsgnortheurope.com

TSG Solutions is a global solutions provider. TSG Solutions has a large sales and service network across Europe and Africa. Thousands of TSG engineers and technicians across 30 countries serve our customers promptly and efficiently: Wherever the client is located TSG is around the corner. TSG provides a wide array of solutions combining equipment sales, services and projects to the energy distribution networks both retail and non-retail (industry) aimed at fuelling mobility systems through its six business segments. The business Segment TSG Gas is focusing on solutions for alternative fuels based on gasses CNG, LNG, LPG and Hydrogen. Regarding the hydrogen market, TSG Gas is a

system integrator of storage, mobility, marine and industry applications. We can provide several products from electrolysers, hydrogen fuel stations for mobility and marine sector until hydrogen storage systems in an EPC project approach. Storage systems with type 4 CPV up to 500 bar(G) with H₂ capacity of 560 kg complete installed on 20 FT trailer or ISO container. TSG Gas has a high-level service degree and can provide 24/7 services to their customer due to the automated field services system. Currently we are working on several projects mainly focused on hydrogen mobility systems and storage systems. If you have any questions or requests do not hesitate to contact TSG Gas.

TwynstraGudde

Mr Jan Willem de Kleuver
Oliemolenhof 14a
3812 PB Amersfoort
The Netherlands

+31 (0)33 467 77 77
www.twynstragudde.nl
jwk@tg.nl

TwynstraGudde is an independent consultancy firm, serving public and private sectors. We build relationships and value chains for hydrogen eco-systems, focusing on decarbonisation of industry and mobility (road, shipping, aerospace). We believe managing transitions is not merely a technological challenge and that social, economic and governance aspects are equally important.

In the hydrogen sector, our strength lies in building and managing public-private partnerships and navigating challenges that come with complex collaborative projects. To foster upscaling of hydrogen innovation, we build on our strong expertise in infrastructure, energy and mobility and provide a variety of

services including strategic and project management, feasibility studies, business model development and pilot development.

Our experience in the hydrogen sector ranges from production and infrastructure to end user by executing projects in regional, national and international (NWE, CE) contexts. Using our Cordence Worldwide network and working closely with our international partners, we offer global perspectives and track records to our customers.

Navigating hydrogen innovation in energy and mobility transitions is a complex endeavour. At TwynstraGudde, we are looking forward to help implement hydrogen projects.

Van Campen Ecotechniek B.V.

Mr Marcel van Campen
Keerkade 2
3831 SN Leusden
The Netherlands

+31 (0)6 22 46 05 75
www.vcebv.nl
mvancampen@vcebv.nl

Van Campen Ecotechniek, dealer for GreenMachines streetsweepers in the Netherlands, can deliver the GM500H₂ 'Hydrogen' as OEM worldwide.

The streetsweeper is very useful for city cleaning and silent while working, less dust, less heat, less weight, small and compact and with more range, it is a logical application.

If you lack the infrastructure, you can choose the cartridge system with H₂-PODS and simply replace the empty ones when needed. Or you choose for the fixed hydrogen tank system when your city has an H₂ fuelling infrastructure in place.

It's that simple.

Van Doorne N.V.
Ms Léone Klapwijk
Jachthavenweg 121
1081 KM Amsterdam
The Netherlands

+31 (0)20 678 94 93
www.vandoorne.com/energy
klapwijkl@vandoorne.com

Currently hydrogen is not (yet) regulated, however going forward this may change. The government might put rules in place for network management, (third party) access and network tariffs.

Without exception, collaboration between parties (public and private) in hydrogen projects is key. The parameters for this collaboration are set during the first phase of a project and are reflected in joint venture agreements and concession models. In this respect, regulatory limitations, tendering issues, spatial planning, engineering and construction arrangements, state aid and financial issues need to be identified and resolved. Subsequently, agreements must be made regarding source exploitation, grid management, supply, storage and offtake. Each of these issues has its own

dynamics and requires close cooperation and coordination, taking into account potential carbon costs, applicable tax credits and subsidy schemes.

Our multi-disciplinary team uses its extensive know-how in all legal areas that are necessary to realise your hydrogen project. The members of our Hydrogen team have many years of experience in the field of energy law regulation and energy contracting, in renewable energy project development, in carbon capture and carbon storage and in (gas) pipeline development. Furthermore we have a proven track record in environmental permitting, spatial planning, finance, taxation, transactional, state aid and construction agreements in connection with infrastructure projects.

VDL Energy Systems B.V.
M.P. Rine
Industriplein 1
7553 LL Hengelo
The Netherlands

+31 (0)74 240 20 00
www.vdlenergysystems.com
m.rine@vdlenergysystems.co

VDL Groep, headquartered in Eindhoven, the Netherlands, is an international industrial family owned business group. The group consists of 104 operating companies, spread throughout 20 countries, with over 16,500 employees. The VDL companies break down into four divisions: Sub-contracting, Car Assembly, Buses and Coaches and Finished products. (See www.vdlgroep.com). VDL ES is part of the VDL Group and focuses on developing, testing and manufacturing of new products, for power generation and -storage. The objective is to develop environmentally-friendly and innovative hardware and software solutions. Applications for Zero-Emission (ZE) power generation and storage. With a background in packaging of turbines and compressors for the oil and gas industry, we now use our competences to produce Battery Energy Storage Systems (BESS), Fuel Cell systems, Electrolysers, and solutions for

Heat Re-Generation. With batteries and fuel cells we create stationary power solutions for energy, utility and maritime industries. VDL has an extensive knowledge and experience in the field of ZE services. As one of the European Pioneers VDL realized the first introduction of large scale deployment of ZE bus fleets in Europe, VDL has gained a lot of knowledge of the challenges of additional 'beyond the bus' demands. Securing and providing enough clean renewable energy, on specific locations and times needed is the key of daily success. Especially as this is a major driver in the Total Cost of Operation (TCO) and thus the main driver of customer acceptance. The current challenge through the arrival of new ZE services is accelerating the efforts to improve the air quality in the growing cities with Green Energy, with more and more smart technology to be used in stationary and mobile applications.

Veco B.V.

Mr Hans Berenschot
Karel van Gelreweg 22
6961 LB Eerbeek
The Netherlands

+31 (0)6 10 96 95 47
www.vecoprecision.com
hans.berenschot@vecoprecision.com

Veco is a world-leading manufacturer of micro-precision metal parts. It serves the world's most innovative, hi-tech companies from industries that demand high quality and precision. To meet customers' specifications and demands, Veco has developed high standards of performance in Electroforming. This technology allows a powerful combination of precision and economical production; for high volumes and prototypes, standard and custom-made products.

Veco's Ni-E³ electrode solutions with surface enlargement up to 20,000 times. With the worldwide ongoing energy transition from fossil into green energy, electrodes are gaining more and more interest. Veco's electrodes solution with its unique properties can be used for Electrolysis, Fuel-cells, and Desalination.

The main difference and advantage of Veco's electrodes is the enlarged surface area that can be achieved. Up to 14 times enlargement has been achieved when this Ni-E³ process is used. In addition, several coatings can be applied that can further result in a surface enlargement of up to 20.000 times resulting in yields that are unprecedented in today's world. The process is sustainable due to zero waste, making it a very cost-effective and future-proof technology in producing Electrodes.

Vecom Group B.V.

Mrs Sandra Vintges
Mozartlaan 3
3144 NA Maassluis
The Netherlands

+31 (0)6 82 24 68 09
www.vecom-group.com
s.vintges@vecom.nl

Vecom is specialist in chemical technical cleaning on-site (worldwide) with over 65 years' experience. We can also carry out metal surface treatments in our metal laundries, located in The Netherlands, Belgium and the United Kingdom.

Vecom focuses on customer and process-specific solutions for complex contaminations and strives to be the best quality service provider in metal surface treatment. Knowledge and experience is combined with flexibility and operational perfection. When it comes to metal surface treatment, Vecom has the knowledge, expertise and equipment to deal with chemicals, metal and waste streams in a responsible way. Safety for people, the environment and your assets are key.

What can Vecom do for the H₂ network? When changing from natural gas to H₂ gas, the existing piping may need to be cleaned depending on fouling. Vecom has the knowhow and experience to chemically clean and/or decontaminate piping systems with a proven method of removal of hydro carbon and sulphur contaminations. Optionally also rust and other inorganic contaminations can be removed. If ultraclean specifications apply, oxygen cleaning and DNV approved methods will be used.

Furthermore, prefab parts for H₂ handling equipment can be pickled and passivated in our metal laundries. If required, the oxygen cleaning method can be applied as well. Please contact our specialists for suitable solutions.

Visser & Smit Hanab, a VolkerWessels company is highly motivated to realize the energy transition. We have been building underground and above-ground infrastructure and installations in the fields of energy, electricity, water and industry for more than 150 years. Hydrogen related activities are design, built and maintenance of new hydrogen pipeline infrastructure, as well as refurbishing existing natural gas pipelines for built environment, industry and hydrogen refuelling stations. We distinguish ourselves by working with the best in-house professionals such as installers, welders, low, medium and high voltage technicians who enable our clients to make the necessary change to sustainable energy.

Visser & Smit Hanab has its own engineering team with advanced specialist knowledge and the most modern 3D scanning equipment. Our professionals, together with a dedicated network of suppliers and subcontractors, ensure that we get the job done safely, on time and on budget. With respect for people and drive to protect the environment.

VONK
Mr Bart de Vries
Dr. Klinkertweg 22b
8025 BS Zwolle
The Netherlands

+31 (0)85 303 20 40
www.iivonk.com
info@iivonk.com

VONK (fka Ampulz) is a solution provider for Power Conversion, Electrical & Instrumentation and Control & Automation Challenges. Inspired by technological innovations we contribute to a more sustainable society. We are an internationally recognized specialist when it comes to Power Conversion & Power Electronics. With our expert knowledge and extended experience as our foundation, we strive at all times to rise to the challenges of tomorrow. Current developments in the field of energy transition play an important role in this.

The incorporation of large-scale renewable energy sources requires power conversion solutions which can be used on a Megawatt level. The power converter determines the behaviour to the electricity grid, the extent of reactive currents and other power quality issues.

Cooperation with VONK will result in a power supply that exactly fits the electrolyser, with better integration characteristics and the lowest possible cost per kW. We aim for a collaborative approach and use standard building blocks to ensure rapid development for power supplies ranging from 1 to 250+ Megawatt. VONK has developed its own innovative electronics control platform to support our solution. The control platform is the heart of the power converter and is capable of forcing the maximum power point of the electrolyser. With its dedicated communication links it can align energy from fluctuating sources with the electrolyser capacity, to optimize the use of available renewable energy.

Royal Vopak

Mr Hans de Willigen
Westerlaan 10
3016 CK Rotterdam
The Netherlands

+31 (0)6 13 43 18 40
www.vopak.com
hans.de.willigen@vopak.com

Royal Vopak is the world's leading independent tank storage company. We store vital products with care. With over 400 years of history and a focus on sustainability, we ensure safe, clean and efficient storage and handling of bulk liquid products and gases for our customers. By doing so, we enable the delivery of products that are vital to our economy and daily lives, ranging from chemicals, oils, gases and LNG to biofuels and vegoils. We are determined to develop key infrastructure solutions for the world's changing energy and feedstock systems, while also investing in digitalization and innovation. Vopak is listed on the Euronext Amsterdam and headquartered in Rotterdam, the Netherlands.

Vopak is exploring how to set up new renewable hydrogen supply chains between production and

demand centres in Europe and beyond. Next to pipelines, other infrastructure will be needed to enable safe, substantial, flexible and cost-effective international transportation, storage and distribution of hydrogen. Vopak aims to provide solutions by creating open access terminal infrastructure at both export and import locations. Together with partners in various countries, Vopak aims to develop storage and transportation, using three technologies: Liquid Organic Hydrogen Carriers, Green Ammonia, and Liquefied Hydrogen.

Vopak is also a partner in the H-vision project that aims to substantially reduce emissions of the Rotterdam industry through low-carbon hydrogen. Please visit www.vopak.com.

Water Alliance is a unique partnership of public and private companies, government agencies and knowledge institutes involved in the Dutch water technology. We focus on innovative and sustainable water technology that can be used worldwide and support small and medium sized enterprises in the water technology industry in terms of (international) matchmaking, networking and business development. Water Alliance is based at WaterCampus Leeuwarden, the Netherlands. WaterCampus Leeuwarden is the physical core of the Dutch water technology sector and has the ambition to play a sector uniting role for the rest of Europe as well. The WaterCampus is an innovation eco-system, which brings together a complete chain of innovation for water technology, from first ideas to research & development, specialised laboratories, a water application centre and

various demo sites to launching customers and ultimately tangible business. We help companies to find the best way through the innovation chain to cover their needs and speed up their developments. WaterCampus stimulates cooperation between (inter)national businesses, knowledge institutes and governments within the water technology sector, in order to create synergy for world class innovation, education and entrepreneurship. This strengthens the global position of the European water technology sector. Additionally, WaterCampus offers a unique research infrastructure, and is a meeting point for scientists and companies from all over Europe. The international cooperation organised and stimulated by WaterCampus Leeuwarden leads to knowledge, talent and entrepreneurship that contribute to solutions for global water problems.

WE | doubleyouenergy b.v.

Mr René Wit

rene@horizonfuelcell.com

WE | doubleyouenergy is a sales and engineering startup in Hydrogen systems. WE | doubleyouenergy is the exclusive distributor of H2planet and therefore the distributor of Horizon and further agent of UMOE advanced composites in the Netherlands. H2planet is an Italian company who has been selling and manufacturing Hydrogen systems for the last 17 years, from Electrolyser's for domestic use PEM and Alkaline from 400 Watt units up to 2 MW systems for industrial use. And PEM fuel cells for Educational, Domestic and Industrial use from 20 Watt up to 385 kW. Further H2planet manufactures Metal hydride hydrogen storage cylinders and cartridges and holds patents for this in Europe, USA and China. Horizon ultimately emerged as the world's largest volume producer of fuel cells regardless of size or power level, serving customers in over 65 countries with the widest selection of commercial products in the fuel cell

industry, with industry leading technical performances. Over the course of its 17 year history, Horizon went on to spin-off 3 application focused companies, including Horizon Educational – the world's leading clean energy and hydrogen science education company, HES Energy Systems – a global leader in hydrogen-electric aerial mobility solutions, and more recently – HYZON Motors, a fast-growing global leader in hydrogen electric heavy vehicles. UMOE advanced composites is a well known Norwegian company, they deliver type IV pressure vessels for storage of CNG, biogas and hydrogen at production sites, such as electrolysis at windmills or solar/biogas plants, as well as at consumption sites, such as industrial plants or filling stations. UAC pressure vessels are delivered with plastic liner, stainless steel end bosses and composite structure, made of high-strength, lightweight fibreglass and epoxy resin.

Wigersma & Sikkema B.V.

Mr Willem Jan Mulder
Leigraafseweg 4
6983 BP Doesburg
The Netherlands

www.ws-gas.com
info@ws-gas.com

Wigersma & Sikkema B.V., founded in 1921, develops, produces and delivers measurement and control equipment for gas distribution. Products include Electronic Volume Conversion Devices (UNIGAS 300), remote reading systems such as dataloggers and modems (UNICOM 300), gas pressure regulators (RS350S) and inspection systems for gas pressure regulating stations (PLEXOR). With these high-tech products, we are the market leader in the Netherlands and are increasingly gaining a foothold internationally. With years of knowledge and experience and our own R&D and production, we can optimally respond to changes in the market, such as hydrogen and green gas. Wigersma & Sikkema is known for quality products, fast delivery and excellent technical service. KIWA was commissioned by Netbeheer

Nederland to investigate whether existing gas pressure regulation stations for natural gas are suitable for the use with 100% hydrogen. The gas pressure regulation station which was tested had an W&S RS350S DN50 regulator built in. The station was equipped with BMA and BDA system couplings to connect the PLEXOR inspection system. A UNIGAS 300 electronic volume converter was used to measure and record pressure, temperature and flow. For several tests, the PLEXOR inspection system was used. The conclusion is that the station can be operated with 100% hydrogen without modification. Please find the link to the report of KIWA (April 2021) here:

7411 TJ Deventer
The Netherlands

+31 (0)6 13 53 24 28
www.witteveenbos.com
raphael.van.der.velde@witteveenbos.com

Witteveen+Bos is an international consultancy and engineering firm that offers solutions to complex engineering and societal issues in the fields of energy, water, infrastructure, the environment and construction. We strive to operate at a high-quality, international level of engineering. Our staff of some 1,400 employees work in multidisciplinary project teams on innovative projects all over the world. The energy transition, climate adaptation, flooding problems, healthy cities, the circular economy and large-scale replacement of infrastructure are just some of the major challenges which we can help to overcome. Specifically for hydrogen,

Witteveen+Bos offers services on the following topics: system integration, risk assessments (QRA), safety (HAZID/HAZOP), permits, techno-economic feasibility, roadmaps (vision and strategy), innovation, engineering, stakeholder management, grant support, project management and consortium formation.

WSP

Mr Tom Klaassen
Tramsingel 2
4814 AB Breda
The Netherlands

+31 (0)88 910 20 00
www.wsp.com
nl.info@wsp.com

WSP is a consulting and engineering firm operating worldwide. In the Netherlands, we have 400 employees working at 10 local offices, offering technical expertise and strategic advice to clients in the sectors Buildings, Infrastructure, Energy, Water and Environment.

Having spent decades working within the gas industry, coupled with our Carbon Capture Utilisation and Storage (CCUS) experience and experience with re-purposing natural gas pipelines to hydrogen pipelines, or engineering new ones, we believe we are strongly positioned to deploy market-leading, clean hydrogen projects for our clients. We have harnessed a multi-disciplinary, global approach when tackling the hydrogen challenge. We understand the complete hydrogen value chain and offer

sector-wide expertise and consultancy; with the ability to harness knowledge from a broad range of disciplines and services, as well as internationally. This enables us to advise throughout the design lives of our client projects for hydrogen production, storage, transmission, distribution, and utilisation across multiple sectors.

Hydrogen aligns with our 'Future Ready' innovation programme, which supports our ambition to advise on solutions that are both ready for today and the years to come, giving our clients confidence that we will tailor our approach on a project by project basis to embed sustainability and resilience into our planning and designs.

XINTC

Mr Wilko van Kampen
Wesselseweg 132
3774 RL Kootwijkerbroek
The Netherlands

+31 (0)85 070 25 48
www.XINTC.global
wka@XINTC.global

XINTC is shaping the future of hydrogen by developing, producing and marketing modular, scalable industrial alkaline electrolysers (AEL) in the power range from 150kW to 20+ MW at the desired purity and with a variable output pressure between 1 bar (14.5 Psi) and 30 bar (435.1 Psi). XINTC electrolyser systems can be used in a wide variety of applications, ranging from mobility to build environment and industry. They are very well suited for dynamic operation and direct connection to renewable energy sources (PV-field, wind turbines). Each system comprises a family of interconnecting gas modules, supported by all necessary supporting components and auxiliary systems for

operational performance and plant safety. Gas modules are equipped with embedded electronics and smart control software, allowing the electrolysis process to run smoothly at maximum efficiency. System design is based on product configuration rather than custom engineered solutions. In order to execute capacity expansion rapidly, XINTC uses modular and standardized components. Time-consuming EPC procedures therefore belong to the past. To satisfy future demand throughput, capacity is expandable in chunks of 3,6kW. Efficiency, low operating costs, ease of use, and high safety standards are key values of XINTC electrolyser systems.

zepp.solutions

Mr Jonas Brendelberger
Paardenmarkt 1
2611 PA Delft
The Netherlands

+31 (0)15 203 00 44
www.zepp.solutions
info@zepp.solutions

zepp.solutions develops hydrogen fuel cell systems for clean, mobile power generation. Our systems are based on a highly scalable and modular platform to allow the fast adaption to different use cases and applications. This technology enables the emission-free propulsion or operation of any application, vehicle or vessel without any drawbacks.

We also support concepts and projects with our consulting and engineering services.

Some of the current projects include the development of hydrogen fuel cell powered yard tractors with vehicle OEM Terberg Special Vehicles. These vehicles enable an emission free horizontal container transport in ports and distribution centres. The first prototype is in active operation.

Furthermore, we develop different size fuel cell system solutions for the maritime sector. Examples are the first hydrogen fuel cell powered Watertaxi in the Port of Rotterdam and a scalable, high power fuel cell module for auxiliary or main propulsive power in large vessels and shipping operations.

Zeton BV

Mr Herman Bottenberg
Marssteden 206

www.zeton.com
info@zeton.nl

Are you looking for a partner, which provides the expertise in designing and building process systems to prove your scaled-up technology? As the world's leading Designer and Builder of innovative lab scale systems, pilot plants, demonstration plants and small modular production plants, Zeton helps its customers bring their processes from lab to market, faster, with less risk and lower cost. Our projects are realized in a vast range of industries, amongst which CO₂ utilisation, Pharma, Chemicals, Biobased fuels and chemicals, Petrochemicals, Oil&Gas, Food, Paper & Pulp. In many of these industries projects are realised which use hydrogen either as raw material, intermediate or product. Our full suite of pilot plant and engineering solutions allows us to deliver scale-specific

projects with design, procurement and fabrication executed in parallel – compressing the overall project schedule and maximizing cost-efficiency with our unique project methodology. Your intellectual property is protected as our engineers optimize the design and build of your project, allowing you to take your process technology to market sooner. With state-of-the-art, integrated design-build facilities in Enschede, The Netherlands, and Burlington, Ontario, Canada, Zeton has successfully completed over 800 projects in 35 countries across six continents. For more information, please visit our website www.zeton.com

ZETON, one partner from early phase concept to real built process plants.
