Foreword

Forging new partnerships

As Prime Minister of the Netherlands, I am honoured to head this important mission to Malaysia and Vietnam. I am also proud to accompany a business delegation of over 25 companies that together represent the best of our country's expertise in the high-tech sector.

The Netherlands already maintains excellent economic relations with both Malaysia and Vietnam. Malaysia has been a partner for more than 65 years, and this year Vietnam and the Netherlands are celebrating 50 years of diplomatic ties. I am confident that this visit will help us strengthen our cooperation even further in the future.

Global challenges related to climate change, urbanisation, food security and digitalisation affect us all. I believe that good collaboration between our countries can contribute to new, innovative and sustainable solutions in these areas. Thanks to the rapid economic development in Malaysia and Vietnam, demand for Dutch products and services is growing. This is especially the case in the advanced manufacturing and electronics sector, for example in semiconductor production. Working together on digital solutions will benefit not only our own business and nations, but nations all around the world.

For Dutch businesses that are already active in the region, this visit offers an opportunity to expand their networks. For others, it will be an excellent introduction to Malaysia and Vietnam and to potential business partners.

I am confident that under the guidance of Brigit van Dijk-van de Reijt, CEO of the Brabant Development Agency, all of the meetings in Penang, Kuala Lumpur, Hanoi and Ho Chi Minh City will boost trade and investment and help forge new partnerships. I wish all participants an inspiring and successful mission.

Mark Rutte

Prime Minister

Foreword

Dear esteemed participants,

A very warm welcome to all participants of the upcoming Economic Mission to Malaysia and Vietnam. This mission, under the leadership of Prime Minister Mark Rutte, promises to become an exciting exploration of business opportunities within the dynamic Southeast Asian region.

Our mission is driven by a strong belief in the transformative power of innovation related to the high-tech sector. As your economic mission leader, I have the honor to guide you throughout the program. We will witness firsthand how profound expertise in semiconductors, high-tech, and digitalization can create valuable partnerships, new business opportunities and economic and societal impact now and in the future. In these turbulent times, our high-tech sector serves as a beacon of hope, offering sustainable solutions for the energy transition, climate resilience, enhanced healthcare, digital advancement, and the establishment of a circular economy. Our mission is not just about showcasing Dutch knowledge and ingenuity; it's about nurturing relationships and creating opportunities.

Collaboration is at the heart of our mission, and it is through collaboration that we can collectively transform challenges into opportunities, laying the foundation for a brighter and more sustainable future.

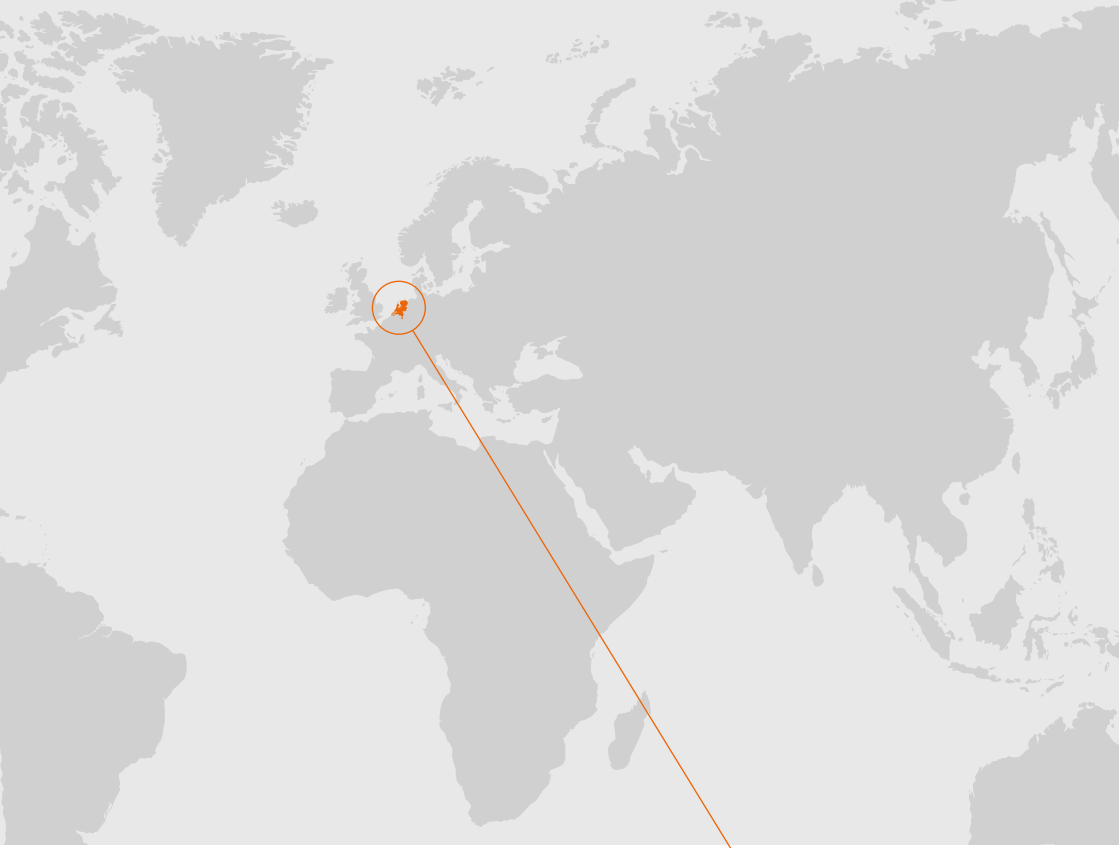

Welcome aboard, and let us jointly embark on this journey of innovation, business opportunities and collaboration.

Warm regards,

Brigit van Dijk - van de Reijt

CEO, Brabantse Ontwikkelings Maatschappij (Brabant Development Agency)

Business delegation leader

Introducing the Netherlands

How do the Dutch make a difference?

Through their interactive approach to finding innovative solutions to the big challenges facing the world today. The Dutch way of thinking and working has been shaped by centuries of living in the low-lying delta of the Netherlands. Through the ages, the Dutch have joined forces to find ingenious ways to tackle challenges like water, urbanisation, energy, food, health and security. By being inventive, pragmatic and open to new challenges, the Dutch have created a flourishing and resilient land.

The Netherlands is a constantly evolving ecosystem of cities, industry, agriculture and nature, all integrated through smart infrastructure. It is a source of knowledge and experience that the Dutch are keen to share with others. Learning from the past to create a better future. Together, seeking sustainable solutions for the most liveable world.

Worldwide ranking

1st

At WEF's ranking of most competitive economies in Europe. 4th in the world. (WEF, 2019)

Production and auctioning of cut flowers and flower bulbs

World's largest flower exporter

2nd

Largest exporter of agricultural products in the world (WTO, 2019)

5th

Greatest place to live (World Happiness Report, 2022)

6th

Best at Global Innovation Index (GII, 2021)

7th

Largest exporter of goods in the world (CIA World Factbook, 2020)

Largest foreign investor in the world (1,256 billion US dollars)

Largest recipient of foreign investment in the world (801 billion US dollars)

8th

Largest importer of goods in the world (507 billion US dollars)

Atradius Dutch State Business

Guido Minnaert

Marketing Manager

+31 6 1086 0433

[guido.minnaert@](mailto:guido.minnaert@atradius.com)

atradius.com

Atradius Dutch State Business is the official Export Credit Agency of the Netherlands. Atradius offers exporters of capital goods or international construction companies in the Netherlands a wide range of credit insurance and guarantee products when doing business abroad.

Credit insurance on behalf of and for account of the Dutch State usually involves export transactions with credit periods or a completion time in excess of twelve months. They always involve the supply of capital goods such as machinery, ships or greenhouses, or construction works.

Stephan Naber

Head of SME Underwriting
& Business Development

Banter

Banter is a global Go-to-Market and Digital Transformation specialist. We see ourselves as the quartermasters and quarterbacks of fast-paced global commercial growth. Banter's tech savvy senior experts live to get your products and services sold, even if that would require helping you craft a 'sellable' product or service to get there.

Change-makers by heart and market-makers by trade, we work with ambitious entrepreneurs, investors, inventors and corporations to unlock value and seize opportunities in high margin, sustainable, and technology driven sectors and territories.

Our tool-belts carry the most effective digital technologies to harness the full commercial potential of any product, technology or brand.

Our process is simple, affordable and pragmatic: lead by example, eradicate all costly silo thinking and make what's good great.

Our pledge is that we will remove any barrier that gets in the way on the journey towards higher margins and a larger scale. Banter's 'rolled up sleeves' methods have moved the needle for some of the largest global brands and local brands with global aspirations.

In addition to our extensive experience with a diverse portfolio of consumer and b2b brands, Banter has developed a knack for working with industrial, financial, agricultural, telecoms and automotive companies around the world.

Besi

Besi is engaged in one line of business: the development, manufacturing, marketing, sales and service of semiconductor assembly equipment for the global semiconductor and electronics industries.

Besi's customers are primarily leading multinational chip manufacturers, assembly subcontractors and electronics and industrial companies. Customers are either independent device manufacturers (IDMs) which purchase Besi's equipment for internal use at their production facilities or subcontractors which purchase Besi's equipment to assemble packages for third parties on a contract basis. Besi's equipment performs critical functions in customers' assembly operations and in many cases represents a significant percentage of their installed base of assembly equipment.

Besi is a global company with headquarters in Duiven, the Netherlands. It operates seven facilities in Asia and Europe for production and development activities, as well as ten sales and service offices across Europe, Asia and North America. End 2022 Besi employed a total staff of 1,675 fixed and 144 temporary personnel of whom approximately 67% were based in Asia and 33% were based in Europe and North America.

Besi was incorporated under the laws of the Netherlands in May 1995 and had an initial public offering in December 1995. Besi's Ordinary Shares are listed on Euronext Amsterdam (symbol: BESI) and are included in the AEX Index. Besi's level 1 ADRs trade on the OTC markets (symbol: BESIY).

Brabant Development Agency

**Brigit van Dijk -
van de Reijt**
CEO

The Brabant Development Agency (BOM) is a regional development agency located in the North Brabant province of the Netherlands. BOM stands for sustainable growth of the Brabant economy. BOM focuses on acceleration of transitions within four societal themes: Climate Neutral Energy Solutions, Healthy Future, Sustainable Food Systems and Promising Key Technologies.

Eelko Brinkhoff
Managing Director
Foreign Investments &
International Trade
+31 6 5260 6820
ebrinkhoff@bom.nl

BOM is creating high impact growth by offering products & services to entrepreneurs through our innovation programs and projects. This includes providing venture capital & support for venture building, exploring international market opportunities and attracting high-value foreign companies to our region.

Liane Bok
Project Coordinator
International Trade
+31 6 5260 6440
lbok@bom.nl

In this age of rapid change, our high-tech industries serve as a beacon of hope, offering sustainable solutions for the energy transition, sustainable food systems, climate resilience, enhanced healthcare, digital advancement and the establishment of a circular economy. Brabant is a technological accelerator, one where ground-breaking technologies are developed and produced. BOM works together with businesses, government, education, and knowledge institutes to create a future-proof economy for Brabant and to bring these innovations and solutions to foreign countries.

John Blankendaal
Managing Director
+31 6 5263 2936
[j.blankendaal@
brainportindustries.nl](mailto:j.blankendaal@brainportindustries.nl)

Brainport Industries

Tier-one, tier-two and tier-three suppliers in the open High-Tech supply chain in The Netherlands have joined forces to create Brainport Industries. Brainport Industries designs, develops and manufactures leading, advanced, precise and intelligent high tech equipment.

Brainport Industries provides a fertile ground and a solid structure for collaborative projects whether they are related to technology, market or people. It's an environment that provides for a continuing flow of knowledge workers and experts and enables suppliers to increase their output and steadily grow into market leaders. OEMs competing on the international market for high-mix, low-volume, high-complexity machines have been outsourcing the manufacturing of sub-assemblies and larger non-core submodules to strategic suppliers for quite some time and are now increasingly outsourcing the design and development of the equipment they manufacture as well. This shift is driving suppliers to push their own boundaries in terms of feasibility and responsibility, and to extend their reach across international borders in order to tap into new, foreign markets. Therefore, we are exploring the possibilities to expand our business in ASEAN.

Eindhoven International Project Office (EIPO)

Joost Helms
Co-founder/Director
+31 6 5245 6862
joost@eipo.nl

Eindhoven International Project Office (EIPO) is a Brainport Eindhoven based international business developer and strategic advisory, with a focus on socio-economic development, innovation ecosystems and (industrial) transformations.

We support cities, regions, developers and businesses in their need to change, towards a sustainable and resilient future by creating strategies for innovation, industrialization, urban development, smart city planning and resilient economic development. In our inclusive approach we engage with multi-helix partners to deliver tangible strategies and plans that deliver social and economic impact.

Dang Tan Duc
Representative of EIPO
Binh Duong / Assistant to
BOD of Becamex
+84 163 696 5486
tanduc.dang@becamex.com.vn

For the last 7 years, EIPO is the strategic partner of Binh Duong Province and Becamex IDC working on the Binh Duong Smart City project and developing the Binh Duong high-tech and innovation ecosystem.

Becamex IDC is Vietnam's leading industrial and urban real estate developer. Over the last 30 years, Becamex has played a pivotal role in Binh Duong's remarkable industrialization and socio-economic development, that has driven Binh Duong to become the country's leading manufacturing hub.

**Eindhoven International
Project Office (EIPO)**
Poorterslaan 19
5611 LA Eindhoven
The Netherlands
<https://eipo.nl>

Becamex is also partnering with Singapore's Semcorb Industries in the Vietnam Singapore Industrial Park (VSIP), developing a growing network of high-level industrial parks (currently over 11,000 hectares) across Vietnam (currently 11 locations and 10 more in preparation).

Rob Zomer

Director International
Trade

+31 6 4383 4336

r.zomer@evofenedex.nl

evofenedex is the organisation for International Trade and Logistics in the Netherlands. Established more than 75 years ago it has a membership base of 12.000 companies and is active in all kind of sectors like Agro-Food, Water, Pharma, High Tech, Chemicals, Wholesale and of course Logistics. The Company headquarter is based in Zoetermeer just outside The Hague and evofenedex has a staff of around 150 people next to a large network of specialists.

Products and Services

evofenedex offers a large range of products and services in consultancy and education & training to it's members. Training on Custom's and Trade Affairs, Export management, Cultural Awareness but also management training on distribution and logistics and the transport and storage of dangerous goods are included in the product range. Furthermore evofenedex is active in consultancy and project management both for the private sector as well as for the Dutch Government and the European Commission and is a recognized partner in the field of sustainable export, trade compliance and digitization.

Unique Selling Points

The evofenedex organization claims to be a thought leader in the area of International Trade and Logistics, Trends in Export and influencing it's environment by lobbying and collective action. Our key competence on matters like Free Trade Agreements (FTA's), Trade Facilitation and Trade Promotion and Supply Chain Management & Logistics is constantly expanding and used for our members and customers in typical issues related from Brexit to the current geopolitical tensions.

Incooling

Rudie Verweij
Co-founder & CEO
+31 6 4534 9040
r.verweij@incooling.com

Incooling was founded in 2019 with the goal of cooling down the planet one server at a time. In collaboration with world renowned CERN and the semiconductor giant ASML Incooling was able to introduce a revolutionary server cooling system that increase server performance while reducing power consumption.

With proprietary cooling systems based on CERN technology Incooling is capable of producing world record-breaking servers without the need for any modifications to the traditional air-cooled datacenters. This allows fast implementation anywhere in the world.

Helena Samodurova
Co-founder & COO
+31 6 4187 8521
h.samodurova@incooling.com

Incooling has been built on the shoulders of giants, with partners such as ASML, Rheinmetall, AMD, DELL OEM, and many more Incooling is capable of delivering high-quality products at scale.

Customer seeking

Incooling is currently actively engaging in pilot and established data centers and end users and are able to offer custom solution based on the specifics of HPC.

Funding

Incooling is currently engaging for their pre-A/A round in 2024.

Incooling
High Tech Campus 29
5656 AE Eindhoven

InPhocal

Founded in 2019 as a CERN spin-off, inPhocal creates a unique new type of laser beam that challenges the current standard: With our innovative optical technology we can improve the efficiency of production lines in terms of output, speed, sustainability and cost.

Our technology can be used for marking, cutting, welding and even for applications in the semiconductor industry. We can outperform current inkjet and laser marking technology and introduce the next generation technology in laser based wafer dicing both for traditional semiconductor technology and photonics technology.

Invest International

Who we are

Invest International invests in Dutch solutions for global challenges. We offer tailor made financing and project development expertise for international projects. Invest International is a private company financed by public means. The company opened its doors in October 2021, in The Hague. Shareholders are the Dutch Ministry of Finance (51%) and Dutch Entrepreneurial Development Bank, FMO (49%). Invest International has 131 employees.

What we do

We provide capital solutions for companies and investment funds whose international activities contribute to realizing the Sustainable Development Goals (SDGs). For governments in emerging economies, we make funds accessible for infrastructure projects. We also provide project development capacity. In combining these, we support projects at every stage of their maturity making use of all funding sources at our disposal.

MSG Precision & Tooling

At MSG, we believe in “Making Specials Together. With our powerful Special Makers team, we deliver high quality in making Precision Parts, Tooling (tool making) and a variety of post-treatments and cleaning. Not just the beaten path but also off-road. We dare to be different and special, to take on challenges, to innovate, to think and advise and always do this together.

MSG is always moving and growing in a profession that never stands still. With our young, committed and experienced team, advanced machinery and the latest techniques, we like to look to the future without losing sight of our old specialties.

Precision parts

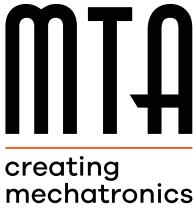

Our Special Makers have extensive experience in producing precision components. We do this with 100% attention and precision, always in close cooperation with our customer. We think along and advise where necessary so that a quality end product is created that can be realistically applied.

Tooling

Our tool shop specializes in the development, manufacture and maintenance of tracking, cutting and bending tools for the various branches of the stamping industry. With our specialized approach and more than 30 years of experience, we always ensure a high-quality and durable stamp that will provide our customer with a return on investment for years to come.

Netherlands Enterprise Agency (RVO)

The Netherlands Enterprise Agency (RVO) supports entrepreneurs, NGOs, knowledge institutes and organisations.

We aim to facilitate entrepreneurship, improve collaborations, strengthen positions and help realise national and international ambitions with funding, networking, know-how and compliance with laws and regulations.

We are a government agency which operates under the auspices of the Ministry of Economic Affairs and Climate Policy.

Its activities are commissioned by the various Dutch ministries and the European Union.

RVO supports companies with strategic international business development. Together with the embassies in ASEAN-5 and the Dutch Ministry of Foreign Affairs RVO developed a multi annual strategic plan for the high tech sector in ASEAN-5.

After the market studies for Malaysia, Singapore and Vietnam this mission is the next step. During the mission my first goal is to provide information on how RVO can support businesses with next steps in the region. RVO offers networking, subsidies and programs. Secondly, my goal is to define, together with the involved stakeholders - and based on the needs of the businesses, the next steps for collective business development as follow up of this mission.

Neways Electronics

With more than 50 years' experience and strong engineering power, Neways is proud to act as technology innovation partner for the most demanding customers in the electronics industry. Neways develops and produces electronics that facilitate major trends in smart mobility, semicon solutions and connectivity from design to series production and aftermarket solution in PCB and Boxbuild assemblies.

Services

Neways supplies electronic PCB and Boxbuild assemblies in three key markets. For Smart mobility Neways is supporting solutions for the entire electric power control, from EV charging, charging cables, inverters to the electric drivetrain. For Semicon Neways is supporting their customers with solutions for lithography systems such as high-speed data processing, motor control, and power measurement. For connectivity Neways offers a wide array of industrial automation solutions based on our expertise in sensors, controls and gateways.

Outsourcing Parts Supplies (OPS)

Tijvoortsebaan 8-01

5051 HJ Goirle

The Netherlands

www.outsourcingparts-supplies.com

Outsourcing Parts Supplies

We achieve synergy with outsourcing of small quantities in lower-cost-country Malaysia.

Outsourcing by OPS fits seamlessly with the needs of our target group; sub-contractors and OEMs in the small and medium size -machine -industries. Especially companies who are responsible for the -functionality of assemblies, machines and modules for direct use.

OPS is supplier of fine mechanical precision parts, tooling and mechanical assemblies. We outsource the production of customer specified products in Malaysia. We Select the right manufacturer from our selected supplier base, classified per product group. Our delivery is short irrespective of order size since we have multiple manufacturers per product group to meet the customer's demand.

(CNC) turning and milling • (CNC) surface grinding and cylindrical grinding • Electrical discharge machining (EDM) • Wire sparking • Laser engraving • Welding (TIG, MIG/MAG, laser) • Surface treatments

Small quantities per order line

Due to demand-driven production and customer-specific requirements for machines and equipment, our customers need single items up to small numbers per order line. By creating economies of scale in outsourcing and logistics we enable outsourcing for small numbers per order line to 'lower-cost-country' Malaysia.

Province of Noord-Brabant

Miguel van Raamsdonk

Policy Advisor

International Affairs Asia

+31 6 5279 4572

mvraamsdonk@brabant.nl

The Province of Noord-Brabant is an enterprising, innovative and successful Dutch region in Europe and a wonderful place to live. High tech and high touch are inseparable. The close collaboration between the Brabant partners, in national and international networks, stimulates the further development of innovation and entrepreneurship. Noord-Brabant is centrally positioned between the port cities of Rotterdam and Antwerp and the German Ruhr area. It has an international reputation as a European top region for innovation and knowledge with an inspiring business climate. Brabant has the ambition to maintain and enhance this leading position.

Joost de Laat

Policy Advisor

International Affairs Asia

jlaat2@brabant.nl

The Province of Noord-Brabant represents the administrative layer between the national government and the local municipalities. The provincial administration takes initiatives on an economic, social and cultural level and coordinates actions. The provincial administration of Brabant is primarily concerned with spatial development, accessibility and mobility for the region, regional economic policy, culture and regional identity.

Royal HaskoningDHV

At Royal HaskoningDHV, we're more than an international engineering firm - we're a group of consultants who are committed to enhancing society together. With over 140 years of engineering expertise and a focus on digital technologies, sustainable solutions, and design knowledge, we're dedicated to creating a positive impact on the world through our work.

We help organizations turn challenges into opportunities and make the transition to smart and sustainable operations. Especially because of the global demand for batteries, semiconductors and other electronic solutions there is a need for improved, faster and more sustainable production facilities. Additionally, supply chain innovation is required in the High Tech industry.

We offer a faster time to market and lower total cost of ownership that require high-quality manufacturing, R&D and cleanroom facilities and buildings. We commit to sustainability by ensuring optimal and efficient use of materials and resources, layout, operations and maintenance.

Royal HaskoningDHV is successfully running projects all around the Asia Pacific region (Vietnam, Malaysia, Thailand, Cambodia, Laos, Philippines, Singapore, Myanmar and Indonesia). Our expertise in our Vietnam office (>170 fte) covers the entire spectrum of consultancy activities, ranging from project appraisals and market studies to engineering, contract management and climate resilience development projects.

Sempro Technologies

Sempro is the expert in Trim & Form and Singulation solutions for the semiconductor and microelectronics industries. Customer success is always our priority. We combine extensive analytical research with the best available expertise to create the optimum solution for each client.

Sempro supports its customers with new package design - from Proof of concept tooling to fully automatic Trim Form and Singulation solutions in the semiconductor backed industry.

Integrated Deflash or cleaning systems for the highest automotive requirements.

Our solutions combine decades of experience with the latest technology in the field. We work closely with our customers to identify and understand their unique requirements, ensuring that our world-class, customized solutions offer absolute reliability and the highest performance. From our Engineering and manufacturing offices in the Netherlands and Asia, we work seamlessly to deliver solutions quickly and efficiently, without compromising on quality or service.

VHE Industrial automation

Joop Essing

CEO

+31 6 1093 7318

joop.essing@vhe.nl

VHE is the co-development and production partner for innovative OEMs specialised in Machine Control, Machine Connectivity and Motion Control systems. We develop innovative solutions in close co-operation with our clients and partners; from concept to successful serial production.

VHE Industrial automation started out 70 years ago as Van Hout Aandrijftechniek & Besturingstechniek. Over the years we have worked with many prestigious clients to produce innovative solutions. VHE is active in the Semicon, (Smart) Energy and High-Tech sectors. There are 200+ people working at our engineering and production facility in Eindhoven (6000 m²) and at our LEAN-production facility in Veldhoven (3000 m²).

- Machine Control: we develop and assemble complex control cabinets, panels and PCB solutions, as well mechanical components such as plating, gutters and hoses. We are electro-specialists with a feel for mechanics.
- Machine connectivity: We design, assemble and test complex cable sets and harnesses that are renowned for their excellent performance and reliability in very demanding settings.
- Motion Control: we develop and dimension the complete Motion system, including the control software.

We are the certified motion partner of Bosch Rexroth, Lenze and Siemens.

Let's Develop Machines Together.
