Foreword

Ernst Noorman
Ambassador for Cyber
Affairs

Dear participants,

It is my pleasure to welcome you to the 2024 RSA Conference, one of the world's most prestigious cybersecurity events. Innovators, entrepreneurs and government officials from all over the globe are gathered here at this renowned platform to discuss the latest trends, threats and solutions in the field of cybersecurity. With approximately 42,000 attendees, 600 speakers and 400 exhibitors, all major thought-leaders are here to build connections, create opportunities and make an impact.

This year's conference will revolve around the theme 'The Art of Possible'. Encouraging us to think creatively about possibilities and opportunities in the realm of cybersecurity: a sector where technological advancements follow each other extremely rapidly. We can only take full advantage of these possibilities when the tech community, governments, the private sector, civil society and academics from all over the world develop and apply shared principles, norms, decision-making procedures and ideas. The Netherlands and its open economy benefit from initiatives that shape the development and use of open, free, secure, interconnected and inclusive internet.

As Dutch companies, you have demonstrated to be at the forefront of these technological advancements. Your participation in this conference will enable you to showcase your capabilities, share your experiences and grow your network with other like-

mindful professionals. You will also have the chance to attend keynote and technical sessions as well as panel discussions, where you will gain insights into the latest trends and solutions in the field of cybersecurity. Lastly, I would like to highlight that the RSA is embracing Dutch speakers, namely Matthijs van Amelsfort en Floor Jansen from the Dutch National Police, and Eward Driehuis and Jacqueline Nijzink from ThreatFabric .

Let's explore 'The Art of Possible' together and make the most of these opportunities. I wish you all a successful mission and a rewarding experience!

Ernst Noorman

Ambassador for Cyber Affairs

Introducing the Netherlands

How do the Dutch make a difference?

Through their interactive approach to finding innovative solutions to the big challenges facing the world today. The Dutch way of thinking and working has been shaped by centuries of living in the low-lying delta of the Netherlands. Through the ages, the Dutch have joined forces to find ingenious ways to tackle challenges like water, urbanisation, energy, food, health and security. By being inventive, pragmatic and open to new challenges, the Dutch have created a flourishing and resilient land.

The Netherlands is a constantly evolving ecosystem of cities, industry, agriculture and nature, all integrated through smart infrastructure. It is a source of knowledge and experience that the Dutch are keen to share with others. Learning from the past to create a better future. Together, seeking sustainable solutions for the most liveable world.

Worldwide ranking

1st

At WEF's ranking of most competitive economies in Europe. 4th in the world. (WEF, 2019)

Production and auctioning of cut flowers and flower bulbs

World's largest flower exporter

2nd

Largest exporter of agricultural products in the world (WTO, 2019)

5th

Greatest place to live (World Happiness Report, 2022)

6th

Best at Global Innovation Index (GII, 2021)

7th

Largest exporter of goods in the world (CIA World Factbook, 2020)

Largest foreign investor in the world (1,256 billion US dollars)

Largest recipient of foreign investment in the world (801 billion US dollars)

8th

Largest importer of goods in the world (507 billion US dollars)

per km² (2022):
423

Unemployment rate
(CBS, 2022):
3.3%

English speaking Dutch
people:
90%

The USA and the Netherlands

Accelerating towards a more cyber secure world

The internet has changed our lives dramatically. We live and work online. Recent history has shown that cyber incidents, such as ransomware attacks, are now commonplace occurrences. More than just long-time allies, the Netherlands and the USA share a rich history of collaboration on digital innovation. The diplomatic relations the USA and the Netherlands share is among the oldest continuous bilateral relationships in the United States. With the pandemic proving the significance of online presence and tools, ensuring secure and effective cyber infrastructure is crucial in achieving both countries' mutual goals towards a more cyber secure world. This mission offers business opportunities for companies innovating in the field of cybersecurity.

The Netherlands knows how vital cybersecurity is to meeting demands of the present and future

Together, with our partners in the USA, we are on a mission: to build

partnerships and pave the way for a more cyber secure world. From the 5th to the 10th of May 2024, we will be joining forces to exchange knowledge and new business opportunities.

The Netherlands as your partner in cybersecurity. As the digital gateway to Europe, the Netherlands is strategically positioned to be a key partner in cybersecurity. The Netherlands can support the USA in their cybersecurity ambitions by taking a unified approach. The Netherlands is eager to further long-standing trade relations and mutually beneficial learning efforts with the USA in advancing cybersecurity objectives through a collective strategy. This is accomplished by niche experts who share knowledge and expertise in securing digital infrastructure against cyber threats, protecting human privacy and securely managing data. We are keen to work with like-minded countries around the world to share our knowledge and expertise or adapt our proven solutions to local circumstances.

[Join us in securing the future, together](#)

This year, with a sharp focus on the swift integration of Artificial Intelligence, the Netherlands is actively addressing cybersecurity needs across large and small enterprises with offensive and defensive solutions. Dutch innovators are interested in forging partnerships with their USA counterparts, aiming for comprehensive threat management solutions in a condensed ecosystem.

We invite everyone working in the cybersecurity sector to join us. The Netherlands and the USA are ready to pave the way and change the world for the better, together!

Attic for Microsoft 365

Affordable Hardening & Automated SOC-as-a-Service

Microsoft365 is the core of IT, but does it get the defensive attention it deserves?

Attic Security, created by Zolder's ethical hackers, provides top-notch cybersecurity operations for Microsoft365. Attic offers simple tips and one-click fixes to address insecure configurations in Microsoft365 and make use of all great security features that are disabled by default. Optionally, Attic will enable the free functionality of Microsoft Sentinel and have an actual SOC function in place cover incident detection and response. Attic findings can be managed from a web-based customer portal or in our mobile app, allowing you to fix incidents anytime anyplace.

To make our helping hand reachable for even the smallest organizations, we have focused on making Attic a fully automated SaaS. As a result, you can help yourself in onboarding your Microsoft365 tenant into our service within minutes.

Attic can be acquired by individual organizations and byMSPs looking to integrate our hardening and monitoring into their own Microsoft365 offerings. And finally, Attic offers a program in which central agencies can acquire bulk licenses of a customized version of Attic for Microsoft365 and distribute it amongst their constituents.

Safeguard your business effortlessly with Attic Security today.

Bizway

Bizway offers support to ensure their clients' IT functions and continues to function. Bizway does this by taking responsibility when it comes to technical maintenance, but also by staying up to date when it comes to the latest developments in the field of security.

Bart Lageweg founded Bizway 25 years ago, where he got started helping clients with cases deemed very complex. This start served as the base of the services the company offers now. Over the last 10 years Bizway has been active in restoring organisations after large cyber-attacks. Their speciality is in getting critical systems back up and running as soon as possible in a safe manner.

What do you think the biggest challenge in security is right now?

“Of course, keeping organisations secure can be challenging, but there's a lot of new legislation and new government-issued rules on the way that many are not prepared for. These new rules will need to be enforced across so many businesses at the same time sometime in the next few years. Consider the requirements of locating all your cloud storage in Europe, for example. 1 million companies will have to take that into account, which is a massive group that are all scrambling to comply.”

“Organisations need to be aware of changes on the way and to prepare in time. This is an issue the whole market is facing. Don't wait until it's too late!”

DTACT

DTACT is a privately-owned Dutch Software Company founded with deep roots in the National Security, Defense and Cyber Security domains.

Based on Data Mesh principles, our extraordinary team developed an agnostic and open technology stack to seamlessly manage:

- Data fusion,
- Systems fusion,
- Infrastructure fusion,
- Discovery,
- AI automation and actions.

This all-in-one platform operates without a black box and without a dependency on professional services from DTACT to implement and maintain.

ESET Nederland

Astrid Oosenbrug

Public Affairs & CSR Officer

+31 6 5280 8929

astrid.oosenbrug@eset.nl

ESET, the protector of technology and progress in Europe for more than three decades, was founded in Slovakia in 1987 as a pioneer in Digital Security.

With an unwavering commitment to the protection and advancement of social, scientific, and technological progress, ESET serves businesses, critical infrastructure, and consumers worldwide. Now, years later, ESET is known as the largest IT security company in the European Union and a global leader in digital security, firmly positioned at the heart of Europe's digital safety.

Our commitment to European partnerships and scientific projects, along with our shared European core values, has earned us one of the first 'Cybersecurity Made in Europe' labels from the ECSO. This recognition underscores our mission to protect European citizens, businesses, and government agencies from digital threats, with our purpose statement "a secure digital future for everyone" at the forefront.

In an increasingly digital world, we believe that everyone should be able to fully utilize and trust technology, so that progress, driven by technology, can safely continue.

Keypasco Europe

Lydsec Digital Technology (“Lydsec”) is a mobile digital security company that offers a multi-factor authentication service called Keypasco (“Keypasco MFA”). The technology is based on several patents with device-identification application. 2023 April, Lydsec established a subsidiary in the Netherlands, the Hague, Keypasco Europe.

Keypasco’s Multi-Factor Authentication (MFA) is one of the world’s most secure authentication solutions. Keypasco MFA is developed with over 37 years of market proven identity authentication experience and six patented technologies.

Keypasco Europe uses multiple authentication factors including device fingerprints and personal device geographical location to deliver services on various network platforms to corporations and other business verticals. Keypasco MFA is used by more than 10 million users in Taiwan, Sweden, the United States, Ireland, Spain and Singapore. Keypasco MFA’s certifications include: ISO 27001, FIDO UAF, FIDO 2, PSD2, ZTA, GDPR, and other compliances. This year we were honored by NFIA in the Netherlands as the best solution in the ICT industry, and won first place in the Select USA Summit 2022 Network Security Group. We are seeking partners in the United States to jointly develop this market.

KPMG

KPMG firms operate in 143 countries and territories, and in FY23, collectively employed more than 270,000 people, serving the needs of business, governments, public-sector agencies, not-for-profits and through KPMG firms' audit and assurance practices, the capital markets. KPMG is committed to quality and service excellence in all that we do, bringing our best to clients and earning the public's trust through our actions and behaviors both professionally and personally.

A well-protected business has the potential to be confident and the most innovative. The smartest businesses don't just manage cyber risk, they use it as a source of growth and market edge. Technology makes many things possible, but possible doesn't always mean safe. As cyber threats grow in volume and sophistication and technology becomes essential for meeting the needs of your customers, employees, suppliers and society, your cyber security must build resilience and trust.

KPMG helps you create a resilient and trusted digital world — even in the face of evolving threats. That's because we bring a combination of technological expertise, deep business knowledge, and creative professionals who are passionate about protecting and building your business. Together, let's create a trusted digital world, so you can push the limits of what's possible.

Municipality of The Hague
Spui 70
2511 BT The Hague
The Netherlands
www.denhaag.nl/en

Municipality The Hague

In The Hague, The Netherlands, talented people work together on innovations for a more secure world.

The Hague, the third largest city in The Netherlands, is considered the International City of Peace & Justice and attracts international organizations, talent and innovators that want to make a difference.

The Municipality of The Hague actively works on stimulating innovation and (international) collaboration in the field of cyber security. This has led to the development of The Hague as an important hub for cyber security in Europe and a flourishing cluster around security and new technology called The Hague Security Delta (HSD) <https://securitydelta.nl>.

The cluster has a strong foundation in The Hague region, due to the presence of Europol's European Cybercrime Centre, NATO Communications and Information Agency and the Dutch cybersecurity, intelligence and security agencies.

Also, the cluster has its own HSD Campus which is the national innovation centre for the Dutch Security Cluster, with IT labs, education and training facilities, flexible office space and meeting rooms <https://hSDcampus.nl/en>.

Amongst others the cluster facilitates the soft-landing of international organizations, talent and innovators in the Dutch security ecosystem.

NFIA

The NFIA (Netherlands foreign Investment Agency) helps foreign companies to set up their business in the Netherlands. The NFIA is part of the Ministry of Economic Affairs and Climate.

Port-IT

Yuri Hart

CEO

+31 6 5106 8981

yuri.hart@port-it.nl

Port-IT is a leading IT provider in cybersecurity solutions designed specifically for the maritime industry. Our goal is to protect ships, crews, and cargo from digital threats, ensuring smooth operations in the ever-evolving landscape of cyber risks.

Port-IT has developed numerous airtime independent IT solutions, such as cybersecurity services, advanced firewalling, user friendly e-mail systems, crew Wi-Fi services and IT/OT management solutions for seagoing vessels. The Class NK endorsed Vanir product portfolio provides proactive protection of vulnerable entry points across a vessels network. Our products can operate with all maritime satellite / LTE connections and are IMO 2021 compliant. Port-IT also provides IT crew awareness training, complete network installations and manages IT/OT data with our shore-based management portal.

Additionally, Port-IT provides 24/7 support, both onshore and offshore, to ensure continuity of the devices and network onboard. The so-called 'quick response service' enables prompt onsite assistance whenever required.

Through continuous monitoring of the dynamic cybersecurity landscape and the in-house development of innovative tools and strategies to tackle potential threats, Port-IT ensures that ships and their crews remain safely connected at sea.

ReConfirm

Peter Groenewegen

Owner & CEO
+31 6 1272 5733
p.groenewegen@reconfirm.com

We believe that all businesses should be empowered to protect themselves against several forms of cybercrime. That's why we created the intelligent platform ReConfirm. ReConfirm allows companies to fully control their External Attack Surface by investigating, identifying, and neutralizing critical cybersecurity risks they weren't even aware of.

Raphael de la Vienne

Founder & CTO
+31 6 1951 7730
r.dela.vienne@reconfirm.com

The External Attack Surface of an organization consists of all assets that are accessible or discoverable via the internet. This includes computers, servers, websites, email systems, as well as leaked employee accounts and passwords. Hackers can easily gain insight into this external attack surface and get a clear picture of the vulnerabilities and risks present within it.

With their risks no longer hidden, companies operate more confidently, securely, and effectively.

ReConfirm is a Dutch cybersecurity company. ReConfirm is started by two cybersecurity experts with a combined 20+ years of practical experience in both offensive and defensive cybersecurity. Alongside with the other colleagues at ReConfirm, they focus on daily technological innovation of the platform and services. Secure-by-nature is the ethos of ReConfirm, which has earned it the label "Cybersecurity Made in Europe." This designation demonstrates ReConfirm's adherence to European cybersecurity standards, including the development of secure software and the protection of data and privacy.

www.secureme2.eu

SecureMe2 Cyber Security stands as a fully 100% Dutch corporation, since 2016 deeply rooted in the Netherlands and committed to providing state-of-the-art cybersecurity solutions. Our mission is to significantly uplift the digital resilience of our valued clients through innovative and reliable technological defenses.

Situated strategically close to Rotterdam, our headquarters is the core of our innovation and development efforts. It is here that we have conceived and refined Cyberalarm, our flagship solution designed to address the pressing needs of real-time analytics within ICT and OT networks.

Cyberalarm emerges as a groundbreaking solution, meticulously crafted to facilitate the swift identification of malicious network traffic, often detecting such anomalies mere minutes following an infection. Moreover, it delivers actionable reports concerning shadow-IT operations, alongside critical alerts regarding system misconfigurations that could potentially pave the way for cyber adversaries. What sets Cyberalarm apart is its unparalleled blend of affordability and ease of deployment. Engineered for minimal maintenance and designed to provide immediate, measurable benefits, Cyberalarm represents a prudent investment in securing your digital assets and supporting continuity of systems and applications. This solution underscores our commitment to safeguarding the digital integrity of businesses, offering a robust shield against the growing number of cyber threats.

Siri Advisory International

The Brabant Development Agency (BOM)

The Brabant Development Agency (BOM) is a regional economic development agency located in the Netherlands. Its primary mission is to support and stimulate the sustainable economic growth of the Brabant region. This includes promoting sustainable food sources, a healthy future, climate-neutral energy, and the development of promising key technologies through investment, development, and internationalization.

“Brabant is Bright” is the international campaign of Brabant aimed at promoting the region abroad and serves as the key platform for international business activities with and in the Brabant region. This platform positions Brabant on the international map as a knowledge and innovation region and offers companies the opportunity to use this information for doing business internationally.

As an organization, we facilitate connections between local innovations and the global market through networking events, advisory services, and funding opportunities, focusing on the development of the high-tech, agrifood, and manufacturing sectors within the region, including cybersecurity.

vBoxx

vBoxx is a comprehensive European hosting company offering a variety of services to meet the digital needs of businesses globally. They are focused on privacy, security, reliability and support excellence with truly European data centers. In addition to the ISO 27001 certificate of them and their datacenter, there are no subprocessors. This way, adherence to the GDPR and the new EU NIS2 directive is easier to accomplish.

Their product range includes secure cloud solutions like vBoxxCloud for business file storage, vBoxxConnect for business communication like email, calendars, and video conferencing, and vBoxxVault, a versatile password manager. In addition, they also provide hosting services, including web hosting, domain name registration, and SSL certificates, alongside dedicated servers for specific needs like Hosted Synology, Mac hosting, and more. Backup solutions include device backup, Microsoft 365, and Google Workspace.

Implementing and migrating to these products is made easy by the constant support of the IT team, that has decades of experience with very versatile use cases.

Topsector ICT

ICT is becoming a more and more important driver for innovation in the Dutch economy. At the same time, digital innovations also play a vital role in overcoming the issues facing society: providing affordable healthcare, safety and the energy transition, for example. This is why Topsector ICT has been designated one of ten Topsectors in the Netherlands.

The Netherlands is one of the world's foremost digital economies. Many households have a PC, tablet, and smartphone as well, and both physical and mobile networks are highly developed. Almost every single company in the Netherlands works online, and the national Internet servers are among the most secure in the world. ICT is vital to every single sector of the economy and digitalization is a key drive of economic growth.

The mission of Topsector ICT is to support companies, government agencies and knowledge institutions to realise ICT innovations through knowledge exchange and closer cooperation. Topsector ICT covers the entire spectrum from fundamental research up to valorization. Educating new talent, retraining, and updating skills, disseminating knowledge, actively involving SMEs, and fostering international collaboration constitute significant components of the mission.

Topsector ICT

Dutch Government delegation

Ministry of the Interior and
Kingdom Relations

Dutch Government delegation consists of members of the governmental CISO-, CIO- and CTO- council. The chairman of the CISO-council and the CIO-council together with the CIO of the Tax Office Authority and the member of the Steering Committee on Digital Resilience form the delegation leaders. The member of the Dutch Government delegation vary from the Ministries of Defence, Directorate-General for Public Works and Water Management, Justice & Security, Finance, Foreign Affairs, Healthcare Welfare & Sport, Interior and Kingdom Relations, Municipality of The Hague, Shared Service Organization North and the Tax Authority and the Land Registry organization.

This year, the theme of the government delegation focuses on assessing the cyber resilience of (cloud) suppliers for the Dutch central government. This includes various measurement models that we are currently experimenting with within the Dutch central government. At the same time, we are not only looking at cloud providers but also at all related dependencies of cloud environments behind products or software solutions. In addition, the delegation leadership team are looking to revisit their state and federal governmental peers to continue the relationship building that started in 2023.
