Foreword

Dear participants,

It gives me great pleasure to welcome you to the RSA Conference 2023, one of the world's most prestigious cybersecurity events. With approximately 42,000 attendees, 600 speakers and 400 exhibitors, the RSA Conference is a renowned platform that brings together some of the most influential cybersecurity professionals and experts from around the globe to discuss the latest trends, threats and solutions in the field of cybersecurity.

As Dutch companies, you have demonstrated a strong commitment to innovation and technology, which has placed you at the forefront of the cybersecurity industry and earned the Netherlands a sixth-place ranking in the National Cyber Power Index. Your participation in this conference will enable you to showcase your capabilities, share your experiences and grow your network with other like-minded professionals.

This year's conference promises to be an exciting one, with numerous opportunities to learn from industry leaders and experts. You will have the chance to attend keynote sessions, technical sessions and panel discussions, where you will gain insights into the latest trends and solutions in the field of cybersecurity.

This year's theme, 'Stronger Together', is meant to encourage participants to build relationships and connections with other cybersecurity professionals from across the world, and I trust you will make the most of this opportunity.

I wish you all a successful mission and a rewarding experience!

Peter Potman

Deputy Director-General for Foreign Economic Relations

Introducing the Netherlands

How do the Dutch make a difference?

Through their interactive approach to finding innovative solutions to the big challenges facing the world today. The Dutch way of thinking and working has been shaped by centuries of living in the low-lying delta of the Netherlands. Through the ages, the Dutch have joined forces to find ingenious ways to tackle challenges like water, urbanisation, energy, food, health and security. By being inventive, pragmatic and open to new challenges, the Dutch have created a flourishing and resilient land.

The Netherlands is a constantly evolving ecosystem of cities, industry, agriculture and nature, all integrated through smart infrastructure. It is a source of knowledge and experience that the Dutch are keen to share with others. Learning from the past to create a better future. Together, seeking sustainable solutions for the most liveable world.

Worldwide ranking

1st

At WEF's ranking of most competitive economies in Europe. 4th in the world. (WEF, 2019)

Production and auctioning of cut flowers and flower bulbs

World's largest flower exporter

2nd

Largest exporter of agricultural products in the world (WTO, 2019)

5th

Greatest place to live (World Happiness Report, 2022)

6th

Best at Global Innovation Index (GII, 2021)

7th

Largest exporter of goods in the world (CIA World Factbook, 2020)

Largest foreign investor in the world (1,256 billion US dollars)

Largest recipient of foreign investment in the world (801 billion US dollars)

8th

Largest importer of goods in the world (507 billion US dollars)

Facts & Figures

Official name:
Kingdom of the
Netherlands

Capital:
Amsterdam

Seat of government:
The Hague

Form of government:
Parliamentary
democracy (cabinet
of Prime Minister
and Ministers) within
a constitutional
monarchy

Head of State:
His Majesty King
Willem-Alexander,
King of the
Netherlands, Prince
of Orange-Nassau

Location:
Western Europe,
bordering Germany,
Belgium and the
North Sea

Administrative structure:
The kingdom consists of four entities.
The Netherlands and three territories in the
Caribbean: Aruba and Curaçao and St. Maarten

Special municipalities:
The overseas islands of Bonaire, Saba and
St. Eustatius, all three of which are situated in the
Caribbean

Surface area:
41,545 km²

Number of inhabitants (2022):
17,564,623

The USA and the Netherlands

Accelerating towards a more cyber secure world

The internet has changed our lives dramatically. We live and work online. Recent history has shown that cyber incidents, such as ransomware attacks, are now commonplace occurrences. More than just long-time allies, the Netherlands and the USA share a rich history of collaboration on digital innovation. The diplomatic relations the USA and the Netherlands share is among the oldest continuous bilateral relationships in the United States. With the pandemic proving the significance of online presence and tools, ensuring secure and effective cyber infrastructure is crucial in achieving both countries' mutual goals towards a more cyber secure world. This mission offers business opportunities for companies innovating in the field of cybersecurity. The Netherlands knows how vital cybersecurity is to meeting demands of the present and future.

Together, with our partners in the USA, we are on a mission: to build partnerships and pave the way for a more cyber secure world.

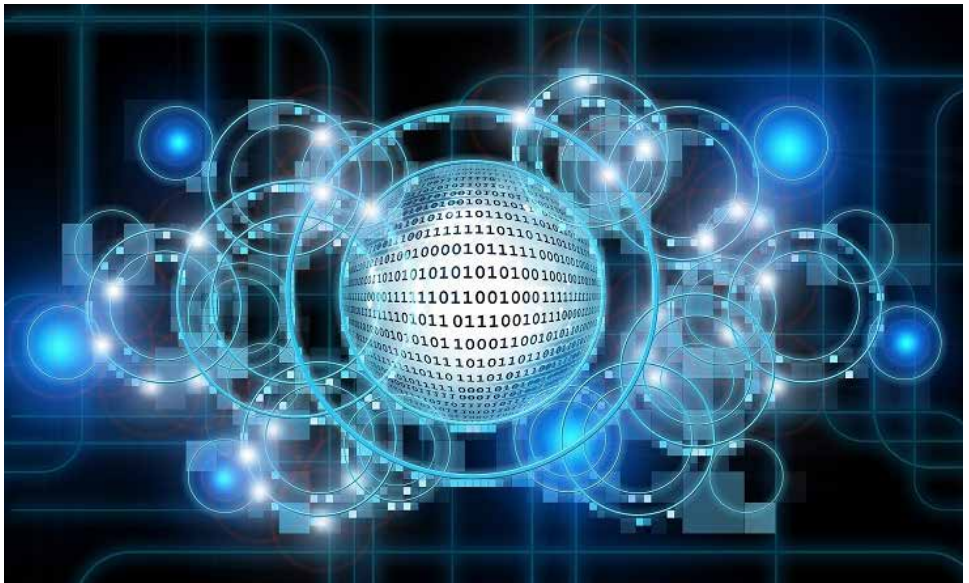

From the 23rd to the 28th of April 2023, we will be joining forces to exchange knowledge and new business opportunities.

The Netherlands as your partner in cybersecurity

As the digital gateway to Europe, the Netherlands is strategically positioned to be a key partner in cybersecurity. The Netherlands can support the USA in their cybersecurity ambitions by taking a unified approach. This is accomplished by niche experts who share knowledge and expertise in securing digital infrastructure against cyber threats, protecting human privacy and securely managing data. We are keen to work with countries around the world to share our knowledge and expertise or adapt our proven solutions to local circumstances.

Join us in securing the future, together

We invite everyone working in the cybersecurity sector to join us. The Netherlands and the USA are ready to pave the way and change the world for the better, together!

AMS-IX

AMS-IX operates multiple interconnection platforms around the world. Our leading platform in Amsterdam has been playing a crucial role at the core of the internet for more than 25 years and is one of the largest hubs for internet traffic in the world. Connecting to AMS-IX ensures customers such as internet service providers, telecom companies and cloud providers that their global IP traffic is routed in an efficient, fast, secure, stable and cost-effective way. This allows them to offer low latency and engaging online experiences for end-users.

AMS-IX stands for Amsterdam Internet Exchange. Amsterdam is where it all started, over 25 years ago. Since then, we grew to global leadership, expanding our footprint and service offerings to other locations worldwide. Even though we operate internationally today, we'll never forget where we come from: AMS-IX is our birth name and we wear it with pride.

Attic Security

Erik Remmelzwaal
CEO & Co-Founder
+31 6 5439 5489
erik@atticsecurity.com

Attic Security is the first solution to make digital security affordable for small and medium organizations. Our team of professional ethical hackers, experienced software developers and skilled security experts has built a one of kind mobile app. It hardens and monitors SaaS such as Microsoft365, finds flaws and provides business owners and IT professionals with actionable advise anytime, anywhere, anyplace. High scalability and end-to-end automation allows us to offer this service from only \$20 per month for the entire organization.

Awareways

At Awareways, we believe that a solid security culture is key. By combining psychology, educational science, data analytics, communication, gamification, and accessibility, we create a holistic learning experience that empowers your employees to become the first line of defense against security threats, while protecting the privacy of your employees and customers.

Our programs consist of various interventions in which multidisciplinary best practices are combined and incorporated. Security awareness culture scans, social engineering simulations, an interactive microlearning platform Wave and communication campaigns, fully designed by our in-house studio. In line with your organization's culture and people.

With our managed security awareness program, you benefit from a proven successful program establishing measurable behavioral change. Creating a culture, where employees are actively engaged in protecting the organization's information and technology systems. The likelihood of security incidents is reduced, and your organization can better protect its assets, reputation, customers, and compliance requirements.

Don't wait until it's too late. Invest in the future of your organization and your employees by implementing our managed security awareness program. Join the movement today.

Cybersquare

CyberSquare is a cybersecurity organization dedicated to helping organizations ensure the confidentiality, integrity and availability of their digital environments. Our cybersecurity experts guide organizations in strengthening digital resilience from start to finish through a unique formula. This starts with awareness of the dangers and identifying security risks. On that basis, we provide guidance at an organizational level in structuring information security procedures and policies by means of a tailored-fit plan of action with concrete recommendations. Our ethical hackers go beyond identifying vulnerabilities and place a high value on helping you resolve identified security vulnerabilities. Thus security vulnerabilities can be patched before they can be exploited by malicious parties, you stay one step ahead of hackers and you prevent data theft, reputational damage and financial damage.

Services

CyberSquare is part of the Cardan Group, a specialist in labour mobility. In Europe, Cardan is a specialist in Digital Accessibility (www.technobility.nl) and Cybersecurity (www.cybersquare.nl). Currently, Cardan offers the following 5 products or services for this purpose: Research (audits), Advice (consultancy), Training & Awareness (E-learning) and Recruitment & Staffing.

Frederik Schröder
Chief Advisor DigiThree
Labs
+1 408 722 5717
[frederikschröder@
digithreelabs.com](mailto:frederikschröder@digithreelabs.com)

At DigiThree Labs we enable organizations to own, manage and monetize their data, identity and assets with solutions optimized for Metaverse and Web3 environments. Our aim is to turn the issues of identity, security and privacy into bold new opportunities for businesses in the future.

Our decentralized, blockchain-secured smart layer is part of the tooling for solutions including secure passwordless authentication, peer-to-peer communication and quantum-safe storage – all of which eliminate the need for centralized third parties.

We take an enterprise approach, providing clear SLAs to ensure we're offering a real, decentralized alternative for businesses aspiring to greater independence and control of their data in the Metaverse and Web3. It's all about giving these enterprises what they need to become less vulnerable to data breaches, less dependent on vendors and more compliant with privacy regulations.

Our infrastructure is supported by a global community and based on mature, battle-hardened decentralized technologies – one of which is the DigiByte Blockchain.

DongIT

Close-knit club of ethical hackers and developers

We are a close-knit club of ethical hackers and developers, working together for over a decade with an established track record. Our highly educated and dedicated team combines extensive knowledge of web security with development skills, providing a unique character.

Reporter: pentesting made powerful

We have worked on thousands of security assessments for clients across industries worldwide. Efficient, consistent, and detailed reporting that meets our quality standards was a major challenge in our growing team. To tackle this challenge, we developed Reporter, an all-in-one workspace that makes reporting much easier.

The bigger picture

Cyber attacks are on the rise, and industry-wide legislation is tightening down. With a global shortage of 3.5 million security experts, the skills required to manage the surging demand are scarce. To make matters worse, most security experts that are available are working inefficiently by having to conduct repetitive, error-prone tasks, and the way they work even conflicts with the fundamental principles of information security.

At this critical time, your organization can stay ahead of the curve by streamlining your security processes. Reporter saves time and boosts quality, enabling security teams to focus on high-value activities that require specialized expertise.

DTACT

Sander Swinkels

Chief Executive Officer &
Co-founder

+31 6 1543 2024

sander.swinkels@dtact.com

DTACT is a privately-owned Dutch Software Company founded with deep roots in the National Security, Defense and Cyber Security domains.

DTACT developed four products in one single platform to allow clients to squeeze tremendous performance from their own (or external) siloed data sources and technology by making data and systems interoperable and data science applicable within a few clicks.

This saves tremendous time and costs (30-70% savings) on Technology use, Data Warehouse projects, SIEM/SOC cost and efficiency & Cloud data management & storage costs.

IRM360

IRM360 is a software company building Integrated Risk Management Systems to control cyber, privacy or continuity risks, improve risk awareness and to achieve certification.

It's based on a scalable Plug & Play concept that offers flexible, secure, professional, and affordable management systems like our ISMS, PIMS, CSMS, BCMS, QMS, FRMS and RAMS. Our Plug and Play design offer you an easy way to enhance your control whenever you are ready. Designed by specialists and suited for the needs of professionals such as the Information Security Officer, Privacy Officer, Business Continuity Officer, etc. With our systems you can easily comply to (certification) needs regarding ISO 27001, ISO 27701, ISO 22301, SOC2, ISAE 3402, NIS2, GDPR etc. Specific audit ready reports and dashboards like management reviews, statement of applicability, improvement, and deviation register, etc. are available to empower your staff for the certification audit. Ready-to-go templates and QuickStart guides makes it even easier to align these standards to your organization and processes.

You can find our users in small, medium sized and large organizations and in all kinds of sectors in the Netherlands (our base), Germany, Belgium, France, Spain, Czech Republic, Poland, Turkey, South Africa, Australia, Argentina, Columbia, and Brazil.

Municipality The Hague

In The Hague, The Netherlands, talented people work together on innovations for a more secure world.

The Hague, the third largest city in The Netherlands, is considered the International City of Peace & Justice and attracts international organizations, talent and innovators that want to make a difference.

The Municipality of The Hague actively works on stimulating innovation and (international) collaboration in the field of cyber security. This has led to the development of The Hague as an important hub for cyber security in Europe and a flourishing cluster around security and new technology called The Hague Security Delta (HSD) <https://securitydelta.nl>.

The cluster has a strong foundation in The Hague region, due to the presence of Europol's European Cybercrime Centre, NATO Communications and Information Agency and the Dutch cybersecurity, intelligence and security agencies.

Also, the cluster has its own HSD Campus which is the national innovation centre for the Dutch Security Cluster, with IT labs, education and training facilities, flexible office space and meeting rooms <https://hsrcampus.nl/en>.

Amongst others the cluster facilitates the soft-landing of international organizations, talent and innovators in the Dutch security ecosystem.

PRODAFT

Koryak Uzan
Managing Partner
+31 6 2165 3988
koryak@prodaft.com

PRODAFT is a leading cyber threat intelligence company that was founded in 2012. For over a decade, we are focused on a proactive approach to cyber security by intercepting and mitigating threats before they happen, not merely reacting afterwards. Our vision as a company is embedded in our name, with PRODAFT being an acronym for Proactive Defense Against Future Threats. We want to keep the citizens, businesses and governments safe from any major security threats by providing timely and accurate information.

Viktória Vargová
PR & Communications
Strategy Specialist
+41 76 801 07 51
viktoria@prodaft.com

Our main service is a cyber threat intelligence platform called U.S.T.A. The platform is unique in its ability to deliver intelligence-led data that is customized and relevant for each customer, depending on their vertical and business in question. Various detection mechanisms and intelligence collection tools, reinforced by HUMINT and real-time investigation by security analysts, ensure that any persistent threats are handled accordingly - making the platform a pivotal player in preventing data breaches and detrimental cyber-attacks.

At PRODAFT, we aim to create a security atmosphere focused on awareness, proper education, and intelligence. That is why we also collaborate with public and law enforcement authorities, university researchers and other cybersecurity enthusiasts eager to prevent the harmful impact of cybercrime operations.

Cyber attacks are an ever growing threat in today's tech environment. Cybersec Europe is the platform for experienced cyber security experts as well as next-gen start-ups to share knowledge with peers for jointly coping with the cybersecurity challenges. Business and institutions of all sectors learn how to enhance cyber resilience and protect their core.

Cybersec Europe takes place in Brussels the 29th and 30th of May 2024.

Ubiqu

Ubiqu's data provenance platform secures the supply chain of business critical data.

Boris Goranov

CEO

+31 6 4252 1605

boris@ubiqu.com

The most impactful organizations in the world – including governments and banks – are in the process of digitally transitioning their activities.

This implies that their analog business flows and -infrastructure need to be translated into a digital model. Analog business flows are often founded on legal compliance or are based upon an analog trust model. Trust models require that their actors (identities, applications, devices) and data are trustworthy, for instance notarised or authenticated.

Guus Stigter

CCO

+31 6 5172 4717

guus@ubiqu.com

In the digital landscape, data can easily be modified and ownership is hard to determine. Therefore, data cannot initially be trusted and choices in business processes based on this information can lead to huge (societal) consequences, causing a lack of trust in digital business flows. Mitigating these problems lead to high costs, long lead-times and a lot of compliance overhead.

People, applications and device are now able to secure business critical data, assuring down stream supply chain trust. In turn, enabling digital transformation of business critical processes.

Ubiqu

Molengraaffsingel 12-14

2629 JD Delft

The Netherlands

<https://ubiqu.com>

To enable this Ubiqu create the Remote Secure Element (RSE). The RSE can be added to any (mobile) device wallet or app to bring the security level to eIDAS High or FIPS 800-63-3 63b AAL3/FAL3 and use that device as a key for physical access, passport or login securely.

Utrecht University of Applied Sciences (UUAS)

The Utrecht University of Applied Sciences (UUAS) is a university with 38,000 students in Utrecht, the Netherlands. The main theme of the research group cyber security is how to improve the cybersecurity resilience of organizations, by

- prevention of security incidents by influencing behavior of users
- improving effectiveness of implementing security standards and technical security measures in organizations.

Many organizations do find it difficult to achieve an adequate level of cybersecurity. There is many cases insufficient business management attention or risk/cybersecurity knowledge. The research group aims to improve the security for organizations, by gaining knowledge and insight how organizations can improve their level of cyber resilience. The main research topics are:

- Which behavioral and attitudinal aspects influence cyber resilience and how can organizations improve these aspects for cyber resilience?
- What are the factors of that prevent effective implementation of security standards?
- How to develop security architectures for organizations and in specific branches, to provide risk-based implementation of security standards.

The research group targets at SME+ and governmental organizations.

Wortell

Wortell is the #1 Microsoft security services provider for The Netherlands with a Microsoft-centric and cloud first approach.

Our award-winning 24/7/365 Managed Extended Detection & Response (MXDR) service, helping customers avoid business disruption caused by cyber threats, by monitoring, detecting and responding on (potential) cyberincidents in an early stage, has been recognized by Microsoft with the MXDR-verified quality label that only a handful partners worldwide have.

Wortell also provides security consultancy services to help organizations increase their digital resilience by carrying out workshops, assessments and table-tops as well as implementing security baselines.

Over the past years, Wortell has been steadily focusing on delivering protection for Operational environments (OT). Under the umbrella of Industry Protect, Wortell now delivers a unique solution to detect cyberrisks in critical industries. This also helps organizations achieve the necessary requirements of the NIS2 guideline.

Wortell commits to promote diversity, equality, and inclusion in the technology industry. Our pledge outlines specific actions that we take to create a more inclusive and equal work environment, such as establishing diversity and inclusion goals, providing training and development opportunities, and actively recruiting a diverse workforce.

Zarttech

Zarttech is an HrTech company on a mission to bridge the opportunity gap by connecting diverse IT Experts with global work opportunities.

Nelson Ajulo

Founder/CEO

+31 6 2487 3322

nelson@zarttech.com

This is how we make this happen:

We bridge the talent gap by innovating technologies and processes that combat recruitment biases. We remove obstacles that prevent connecting diverse talents to global work opportunities, mitigate risks, and build trust resulting in a handshake between all stakeholders.

This is what you gain from it:

We at Zarttech, can help you scale your business with senior IT Experts from global diverse backgrounds. Zarttech can also help get your IT project done quickly and efficiently while making a social impact.

Our focus is on two main services: outstaffing and outsourcing.

Our Foundation

At Zarttech, we always pay it forward. Beyond the butterfly effect that positively impacts the global economy when you hire from us, our foundation is also dedicated to training more women tech talents in Africa.

Every year 2% of our revenue is donated to our foundation, this revenue is focused on training 2000 women in tech in the next five years in Africa, contributing to ESG.

Zivver is the effortless, smart, secure digital communications platform powering the next generation of secure digital communications. Zivver's platform includes secure email, secure large file transfer (5TB), certified email, and digital document signing, which can be easily integrated into Outlook, M365, and Gmail, as well as other existing systems commonly used by organizations.

Its unique features, such as human error prevention, zero-access encryption, strong user and recipient authentication, offers unique decision support before, during and after sending, making sure the correct information is only sent to the right recipients using the necessary security measures. Zivver is effortless to use - always there, but never in the way.

Over the past three years, Zivver has been recognized by Gartner as one of the five global representative vendors for email data protection that enhances Microsoft, Google, Proofpoint, and other cloud email providers and secure email gateways. Zivver also won the Most Impactful Privacy Product of the Year Award at the 2022 PICCASO Privacy Awards.

Currently serving over 7000 organizations globally, Zivver offers an effective solution to prevent data leaks, improve compliance, and better protect information. It also helps organizations reduce costs associated with the use of paper and point solutions currently in place for various communication use cases.

Dutch Government CISO Council

Ministry of the Interior and
Kingdom Relations

The CISO Council of the Dutch Government is the gateway to the CIO Council for all matters regarding cybersecurity.

The CISO Council consists of the CISO's of each department and is chaired by the CISO of the Central Government (CISO Rijk), Aart Jochem who also works closely with the Digital Government Directorate (DO), the intelligence agencies, the National Security Officer (Rijks BVA), the National Cyber Security Centre (NCSC) and the National Coordinator for Security and Counterterrorism (NCTV).

Several representatives of the CISO Council will join CISO Rijk to meet with industry suppliers to the Dutch Government and governmental peers to specifically discuss the use of various (inter)national frameworks for cyber resilience.
