

Netherlands Pavilion ReBuild Ukraine Conference

13 -14 November 2024, Warsaw, Poland

Netherlands

Foreword

After more than two and a half years of war, the damage Russia has inflicted upon the Ukrainian people and Ukraine's social and physical infrastructure is immense. Power plants and other vital infrastructure have been damaged or destroyed, and many people have lost their homes and their livelihoods. Reconstruction cannot wait; it must start now, hand in hand with early recovery.

The private sector has a crucial role to play in rebuilding Ukraine. Dutch companies with their extensive knowledge and expertise – especially in the areas of circular construction, sustainable energy, agriculture, water, and life sciences and health – can make a key contribution to the country's reconstruction.

The ReBuild Ukraine conference is an excellent opportunity to learn first-hand about Ukraine's most urgent needs and priorities, to showcase Dutch knowledge and expertise, to network and establish contacts with governments, businesses and financial institutions, and to engage in sustainable cooperation with partners.

During the conference, several panels will hold in-depth discussions on Ukraine's needs and provide insights on how we can best work together to rebuild Ukraine in a resilient and sustainable way.

Your participation is therefore essential for building Ukraine back better in the years ahead. Ukraine needs our support – we must rebuild Ukraine together.

I look forward to meeting you in Warsaw and supporting you in your efforts.

Erica Schouten
Special Envoy for Ukraine

The Netherlands

Introducing the Netherlands

How do the Dutch make a difference?

Through their interactive approach to finding innovative solutions to the big challenges facing the world today. The Dutch way of thinking and working has been shaped by centuries of living in the low-lying delta of the Netherlands. Through the ages, the Dutch have joined forces to find ingenious ways to tackle challenges like water, urbanisation, energy, food, health and security. By being inventive, pragmatic and open to new

challenges, the Dutch have created a flourishing and resilient land.

The Netherlands is a constantly evolving ecosystem of cities, industry, agriculture and nature, all integrated through smart infrastructure. It is a source of knowledge and experience that the Dutch are keen to share with others. Learning from the past to create a better future. Together, seeking sustainable solutions for the most liveable world.

Oost NL

East NL (Oost NL) is the regional development agency for East Netherlands. Commissioned by the Ministry of Economic Affairs and the provinces of Overijssel and Gelderland, we strengthen the regional economy by investing public funds in entrepreneurs. We also provide knowledge, expertise, and networks to both local and international companies.

East NL coordinates the GO4EXPORT program, working with our partners and the two provinces to stimulate international trade. In cooperation with European, national, and regional public institutions, as well as private companies, we are joining forces in the rebuilding of Ukraine.

Pon Equipment & Pon Power

We provide solutions for construction, roadworks, and specialized earthmoving equipment. We also deliver innovative electric power generation and our energy services include the construction of microgrids.

Our sustainable technologies include methanol-based marine engines, solar parks, batteries and generators that power equipment reliably. These include top-tier systems capable of consistently powering equipment when it's needed most.

Provincie Overijssel

With our GO4EXPORT program the Province of Overijssel supports SME's in taking steps over the border. We have established strong connections with representatives of companies and the government of Ukraine and with participation in this event our goal is to help connect the SME's of Overijssel and the Netherlands to the representatives in Ukraine to help with the reconstruction of the country.
